Volume II - Data Appendix

September 1997

Prepared for the U.S. Department of Energy Under Contract Number DE-AC03-76SF00098

Ernest Orlando Lawrence Berkeley National presents *Volume II, Data Appendix* as a reference document to supplement the *1996 Site Environmental Report.* Volume II contains the raw environmental monitoring and sampling data used to generate many of the summary results included in the main report for both routine and nonroutine activities. This appendix includes a legend that cross-references the enclosed data tables with summary tables in the main report. The legend also provides a listing of more detailed descriptions for the station location codes used in the appendices' tables. Data presented in the tables are given in Système International (SI) units. The glossary found in the main report contains a listing of the SI units.

The following results for catch basin sampling (samples CB-1 through CB-25) are as reported by the analytical lab for the total sample submitted. Those samples contained aqueous materials along with the solids. Therefore in order to arrive at the true metals content of the solids it is necessary to divide the results by the lab-supplied percent solids for each sample. The percentages are listed in parenthesis below each location.
