CENSUS SNAPSHOT

VIRGINIA JANUARY 2008

Adam P. Romero, *Public Policy Fellow* Clifford J. Rosky, *Research Fellow* M.V. Lee Badgett, *Research Director* Gary J. Gates, *Senior Research Fellow*

Using data from the U.S. Census Bureau, this report provides demographic and economic information about same-sex couples and same-sex couples raising children in Virginia. We compare same-sex "unmarried partners," which the Census Bureau defines as an unmarried couple who "shares living quarters and has a close personal relationship," to different-sex married couples in Virginia.¹

In many ways, the almost 20,000 same-sex couples living in Virginia are similar to married couples. According to Census 2000, they live throughout the State, are racially and ethnically diverse, have partners who depend upon one another financially, and actively participate in Virginia's economy. Census data also show that 20% of same-sex couples in Virginia are raising children. However, same-sex couples with children have fewer economic resources to provide for their families than married parents: they have lower household incomes and lower rates of homeownership.

SAME-SEX COUPLES AND THE LGB POPULATION IN VIRGINIA

- In 2000, there were 13,802 same-sex couples living in Virginia.²
- By 2005, the number of same-sex couples increased to 19,673.³ This increase likely reflects same-sex couples' growing willingness to disclose their partnerships on government surveys.
- In 2005, there were an estimated 220,309 gay, lesbian, and bisexual people (single and coupled) living in Virginia.⁴

INDIVIDUALS IN SAME-SEX COUPLES ARE DEMOGRAPHICALLY AND GEOGRAPHICALLY DIVERSE

- There are more male same-sex couples (51%) than female same-sex couples (49%) in Virginia.⁵
- Individuals in same-sex couples are, on average, 41 years old, and significantly younger than individuals in married couples (47 years old) in Virginia.

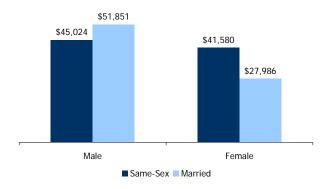

- Same-sex couples live in every county and independent city in Virginia and constitute 0.9% of coupled households and 0.5% of all households in the state.⁶ Fairfax City reported the most same-sex couples with 2,088 couples (0.60% of all households in the county), followed by Arlington City with 1,095 couples (1.27%), and Alexandria City with 687 couples (1.11%). The localities with the highest percentage of same-sex couples are Arlington City (1.27% of all county households), Alexandria City (1.11%), Manassas City (0.89%), Falls Church City (0.83%), and Richmond City (0.77%).⁷
- Virginia's same-sex couples are as racially and ethnically diverse as their married counterparts: 21% of same-sex and married couples are nonwhite.

PEOPLE IN SAME-SEX COUPLES ARE ACTIVELY ENGAGED IN THE STATE ECONOMY

 Individuals in same-sex couples in Virginia are significantly more likely to be employed than are married individuals: 81% of individuals in samesex couples are employed, compared to 67% of married individuals.

- Contrary to a popular stereotype, the annual earnings of men in same-sex couples are significantly lower than those of married men. On average, men in same-sex couples in Virginia earn \$45,024 each year, significantly less than \$51,851 for married men. The median income of men in same-sex couples in Virginia is \$36,000, or 10% less than that of married men (\$40,000).
- Women in same-sex couples in Virginia earn an average of \$41,580 per year (with a median of \$34,000), more than married women, whose earnings average \$27,986 (with a median of \$22,400). Women in same-sex couples earn less than married men as well as men in same-sex couples.

Average Individual Earnings

- Individuals in same-sex couples in Virginia are more likely to work in the private sector: 71% of individuals in same-sex couples work in the private sector, compared to 67% of married individuals; 22% of individuals in same-sex and married couples work in the public sector; and 7% of individuals in same-sex couples are self-employed, compared to 11% of married individuals.
- Individuals in same-sex couples are significantly more likely to have a college degree: 45% of individuals in same-sex couples, and 33% of married individuals have earned a college degree.
- Despite the military's historic policies of excluding gay men and lesbians from service, individuals in same-sex couples have served in the military: 15% of individuals in same-sex couples are veterans, compared to 18% of married individuals.

SAME-SEX PARTNERS IN VIRGINIA DEPEND UPON ONE ANOTHER IN WAYS THAT ARE SIMILAR TO MARRIED COUPLES

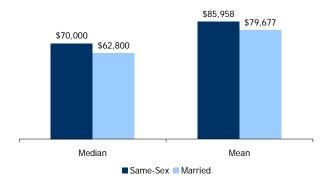

Couples in which one partner does not work or earns significantly less than the other partner may indicate financial interdependence. 20% of same-sex couples have only one wage earner, compared to 31% of married couples.

- The income gap between same-sex partners is \$25,198, compared to \$31,623 for married couples.
- 22% of same-sex couples have at least one partner who is disabled, compared to 27% of married couples.
- 7% of same-sex couples have at least one partner who is age 65 or older, compared to 16% of married couples.

SAME-SEX HOUSEHOLDS IN VIRGINIA HAVE SIMILAR ECONOMIC RESOURCES TO MARRIED **HOUSEHOLDS**

The median income of same-sex coupled households in Virginia is \$70,000, more than that of married couples (\$62,800). The average household income of same-sex couples is \$85,958, more than \$79,677 for married couples.

Household Incomes

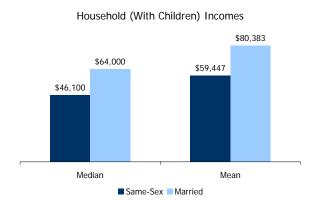

Same-sex couples are significantly less likely than married couples to own their homes: 70% of samesex couples in Virginia own their home, compared to 82% of married couples.

SAME-SEX COUPLES ARE RAISING CHILDREN IN VIRGINIA, YET WITH FEWER ECONOMIC RESOURCES THAN MARRIED PARENTS

- 20% of same-sex couples in Virginia are raising children under the age of 18.
- As of 2005, an estimated 6,503 of Virginia's children are living in households headed by same-sex couples.8
- In Virginia, married and same-sex couples with children under 18 in the home have, on average, 2 children.
- 3% of Virginia's adopted children (or 1,143 children) live with a lesbian or gay parent.9
- 37% of same-sex parents have only one wage earner, compared to 34% of married parents.

- Same-sex parents have fewer financial resources to support their children than married parents in Virginia. The median household income of samesex couples with children is \$46,100, or 28% lower than that of married parents (\$64,000). The average household income of same-sex couples with children is \$59,447, significantly less than \$80,383 for married parents.
- While 50% of same-sex couples with children own their home, a significantly larger percentage of married parents (78%) own their home.

CONCLUSION

Census data provide valuable information about gay and lesbian couples in Virginia. While in many respects Virginia's same-sex couples look like married couples, same-sex couples with children have fewer economic resources to provide for their families than married parents and lower rates of homeownership.

About the Authors

Adam P. Romero is Public Policy Fellow at the Williams Institute, UCLA School of Law. J.D. Yale Law School; A.B., summa cum laude, Cornell University. His current research examines the significance of family in society and law, especially as relevant to disabled adults without family.

Clifford J. Rosky is Research Fellow at the Williams Institute, UCLA School of Law. J.D. Yale Law School; B.A., summa cum laude, Amherst College. His current research examines the significance of gender in family law cases involving lesbian and gay parents.

M.V. Lee Badgett is Research Director at the Williams Institute, UCLA School of Law, and Director of the Center for Public Policy and Administration at the University of Massachusetts Amherst, where she is also on the faculty of the Department of Economics. She studies family policy and employment discrimination related to sexual orientation.

Gary J. Gates is Senior Research Fellow at the Williams Institute, UCLA School of Law. He studies the demographic and economic characteristics of the lesbian and gay population.

For more information, contact: The Williams Institute UCLA School of Law Box 951476 Los Angeles, CA 90095-1476 T (310)267-4382 F (310)825-7270 williamsinstitute@law.ucla.edu

¹ Unless otherwise noted, we calculate the demographic characteristics from the Census 2000 Public Use Microdata Sample (5% file) available from the U.S. Census Bureau. For a detailed discussion of the Census 2000 methodology used in this report, see Census Snapshot: Methods Note, available at http://www.law.ucla.edu/williamsinstitute/ publications/MethodologicalDetailsForCensusSnapshots.pdf. In estimating numbers of same-sex couples and children raised by same-sex couples, however, we use the total number of same-sex couples from 2005 and the proportion of couples with children from 2000 in order to provide a more up-to-date estimate.

Tavia Simmons & Martin O'Connell, U.S. Department of Commerce, U.S. Census Bureau, Married-Couple and Unmarried-Partner Households, Census 2000 Special Reports, CENSR-5, p. 4, tab. 2 (Feb. 2003).

³ Gary J. Gates, The Williams Institute, Same-sex Couples and the Gay, Lesbian, Bisexual Population: New Estimates from the American Community Survey, p. 11, apx. 1, available at http://www.law.ucla.edu/williamsinstitute/publicat ions/SameSexCouplesandGLBpopACS.pdf. Sample sizes for individual states in 2005 are not sufficiently large for the analyses presented in this report, we therefore use data from Census 2000 where samples are on average five times larger than 2005.

⁴ *Id*.

⁵ Simmons & O'Connell, *supra* note 2.

⁶ In Virginia, there are incorporated places, known as "independent cities," that are independent of any county organization and thus constitute primary divisions of the state. These incorporated places are treated as equivalent to counties for census purposes. See U.S. Census Bureau, 2000 County & County Equivalent Areas, available at http://www.census.gov/geo/www/cob/co_metadata.html.

⁷ U.S. Census Bureau, *Unmarried Partner Households by Sex of Partners*, PCT14. Percentages of total households computed by dividing data in PCT14 by data in P15 (total households).

Computed by multiplying the number of same-sex couples times the percent of same-sex couples with children times the average number of children under 18 in the household.

⁹ Gary J. Gates, M.V. Lee Badgett, Kate Chambers, Jennifer Macomber, The Williams Institute & The Urban Institute, Adoption and Foster Care by Gay and Lesbian Parents in the United States (2007), available at http://www.law.ucla.edu/Williamsinstitute/publications/Policy-Adoption-index.html.

¹⁰ Due to rounding, percent may not add to 100.
