PUB-429 12-82/1200

Prepared for the U.S. Department of Energy under Contract DE-AC03-76SF00098

TERMINAL SWITCH ACCESS NAMES

COMPUTER	DEVELCON DIRECTORY NAME	- - - GANDALF CLASS CODE - - -		
		300 bps	1200 bps	9600 bps
VAX Program Development Machine	PDM	na	na	na
VAX Numerical Modeling Machine	NMM	na	na	71
VAX Interactive Graphics Machine	IGM	na	na	73
PDP 11/70 (UNIX 1)	UNX1	15	na	11
PDP 11/70 (UNIX 3)	UNX3	55	na	51
CDC 6600B, 6400C	RECC	05	03	01
IBM 4341 (UCB)	CCDB	na	na	na

- (1) **na** means NO DIRECT ACCESS. However, Indirect access from GANDALF to all computers is available via DEVELCON.

GANDALF class code **67** connects you to DEVELCON.

(Then) enter **return** (<cr>) so that DEVELCON can determine your terminal speed.

DEVELCON responds with **Request**:

(Then) you enter your DEVELCON directory name and a carriage return.

(If you use this method more than occasionally, please contact Sig Rogers, x6713):

- ‡ **Note:** There are many additional hosts operated by other groups that are available on the terminal switches. To gain access, you should make arrangements directly with the appropriate group representative.

(2) ACCESS FROM GANDALF/DEVELCON

GANDALF -- with TSB[♠]

1. Turn on terminal.
2. Push button on TSB.
3. When green light comes on, hit <cr> (return).
GANDALF will prompt with an asterisk (*)
5. Enter class code (e.g., "51" for UNX3) & <cr>
GANDALF will prompt with **SERVICE XX START**
6. Another <cr> will get you the host prompt.

GANDALF -- without TSB[♠]

1. Turn on terminal.
2. Hit **BREAK** key.
GANDALF will prompt with an asterisk (*)
3. Enter class code (e.g., "11" for UNX1) & <cr>
GANDALF will prompt with **SERVICE XX START**
4. Another <cr> will get you the host prompt.

DEVELCON

1. Turn on terminal.
2. Push button on TSB[♠]. When green light comes on, hit <cr>.
3. When you get a **Request**: prompt, enter host directory name (e.g., **unx1**), followed by a <cr>.

- (3) **DIAL-UP ACCESS** to DEVELCON is available.

486-4959 -- 300 BPS

486-4979 -- 1200 BPS

VA-3400 & 212A equivalent.

... Sig Rogers, x6713

NEWS OF LOCAL USER GROUPS

Lab folks who are interested in establishing a Local User Interest Group on site should contact Sally Shlaer, x4687.

DATATRIEVE LUG NEWS

The next meeting of the Datatrieve User Group will be held at 1:30 PM Monday, July 18, in the Bldg. 70A Conference Room (70A/3377). There will be discussion of appointment of group officers. For more information, contact LUG facilitator . . .

. . . Valerie Sherriffe, x5362
or x4460

=====

VAX LUG NEWS

The next meeting of the VAX Local User Group will be held at 2 PM Tuesday, July 19 in the Directors' Office (50A/5142). For more information, contact LUG facilitator . . .

. . . Nancy Deerinck, x4691
or x6411

=====

GRAPHICS LUG NEWS

Users who are interested in organizing a GRAPHICS Local Users Group at LBL are requested to contact Maggie Morley (x5529, mam/MAM on unx/VAX) or . . .

. . . Jim Miller, x6255
(JMILLER on IGM)

RSX LUG NEWS

Users interested in attending the July meeting of the RSX Local User Group should contact . . .

. . . Everett Harvey, x6411

=====

RT-11 LUG NEWS

The next meeting of the RT-11 User (Lunch) Group will be held at noon on Thursday, July 7 in the Bldg. 46A Conference Room. **Sally Shlaer** will talk about Modern Software Engineering. For more info, contact . . .

. . . Mike I. Green, x4607

=====

PERSONAL COMPUTER LUG

After the recent IBM PC (extended) and APPLE LISA demonstrations, several users expressed interest in forming a Personal Computer Local User Group.

The contact person at UCB for pricelists and discount packets is Penny Gee, 642-5205; the contact person at LBL is Kathleen Handron, x5474.

Those interested in initiating an organizational meeting should contact Maggie Morley, x5529 (mam/MAM on unx/VAX) or . . . or . . .

. . . Jim Miller, x6255
(JMILLER on IGM)

VAX CLASSES IN AUGUST

VAX user classes will be given in August from 10 AM to noon in the NRCC Conference Room, Bldg. 50D, Rm. 116.

Wednesday	August 3
Friday	August 5
Wednesday	August 10
Friday	August 12

The number of participants is limited, and advance registration is required. To register, please contact Lisa Long, x5947.

. . . Noel Brown, x4387

"The race may not be to the swift,
nor the victory to the strong,
but that's how you bet."

. . . Damon Runyon

THE 50A USER AREA IS GONE

Recent programmatic and organizational additions and changes have required consolidation of activities in many areas. One result is that the Computer Center activities must be consolidated with less space than present. Rm. 1175 in Bldg. 50A will become occupied by members of the Administrative Data Processing group. There is no space available to relocate the user lockers in that room. Out of a total of 548 half-lockers in both user room, we will lose 318. The 230 half-lockers in Bldg. 50B, Rm. 1237 will remain.

We compared the distribution of lockers with computer usage, and reassigned space as fairly as we could. Persons with more than one locker in **either** of these rooms have been required to give up space, and persons not now using computer time have been asked to remove their materials to their own facilities. The lockers in 50A-1175 will be removed on **JUNE 24**. If lockers are not cleared & materiel moved by that date, contents will be stored in a temporary location (to be announced).

We have tried to get in touch with all locker assignees affected by the loss of locker space, both by telephone and by letter. If you have any questions about your current locker assignment, or need to retrieve stored materials, please call Lisa Long or Peggy Yamada at x5947.

The user terminals in Rm. 1175 have been relocated to Bldg. 50B, Rm. 4224.

... F. Marvin Atchley, x5455

HELPFUL HANDOUTS

The following handouts, which might prove helpful in **GETTING STARTED** on Computation Department systems, are available at the Consultants' office, Bldg. 50B, Rm. 1245.

- (1) * **The Berkeley Campus Link To LBL**
Describes how to use the link between the Lawrence Berkeley Laboratory (LBL) CDC computers and the Berkeley campus general access computing facilities.
- (2) * **Transferring Files via Hyperchannel**
Describes the hyperchannel as a high speed link allowing users to submit jobs to the BKY (CDC) 7600 and 6000's. This link may also be used to transfer files from one machine to another by way of the BKY (CDC) machines.
- (3) * **Help Mail**
Describes how to send mail from one system to a different system.
- (4) * **ENCODE -- Creating ASCII/EBCDIC Tapes**
Describes ENCODE -- a utility program that allows users to create an ASCII or EBCDIC tape. This program is for users who want to create a tape that is to be read on another computer.
- (5) * **CODE9 -- Reading EBCDIC/ASCII Tapes**
Describes CODE9 -- a utility program that converts EBCDIC and ASCII tapes to display code (the CDC character set).
- (6) * **Strange Tape Identification Procedure**
Describes the various jobs that can be run on the 6000's to aid in identifying the tapes structure and contents.
- (7) * **CUE-CHART -- Hardcopy via TIDIN**
Introduction giving summary of CUE-CHART commands, example of a CUE-CHART session, and hardcopy output via Technical Information Division.
- (8) * **DI3000**
Newsletter article (Nov. '82) talking about DI3000, GRAFMAKER, Contouring & Metafile Translator. (Written by Shirley Dawson).
- (9) * **IDDS Figures**
These are the figures (pictures) that are to be inserted in the on-line IDDS writeup.
- (10) * **SPIRES**
Describes SPIRES -- a generalized information retrieval and data base management system. Gives an overview and a description of the SPIRES system.
- (11) * **Computer Center Rate Schedule**
Describes all computing charges and the various equipment associated with these charges.
- (12) * **UNIX TSET**
Describes the various types of terminals in use on the BKY UNIX system. It also describes UNIX's ability to tailor the output being sent to a terminal to correctly and fully utilize the features available in that terminal and to provide timing delays as required.
- (13) * **Mail At LBL**
Describes a mechanism that now exists to send electronic mail between many of the major time-sharing computers at LBL, the Berkeley campus and beyond.
- (14) * **VAX Help**
Lists the names of the on-line HELP documentation available to the users through the VAX system and the format to use to access the help articles.

- (15) * **UNIX Help**
Lists the names of the on-line HELP documentation available to the users through the UNIX system and the format to use to access the help articles.
- (16) * **DATATRIEVE Help**
Lists the names of the on-line help documentation available to the users through the Datatrieve system and the format to use to access the HELP articles.
- (17) * **TID UNIX Command Summary**
Provides an easy reference for commonly-used UNIX commands.
- (18) * **UNIX Editor Command -- Quick Reference**
Provides a quick reference for VI and EX editor commands.
- (19) * **VAX Software Overview**
VAX product set overview and VAX Documentation price list.
- (20) * **VAX On Line Graphics Help**
All VAX help articles for DI3000, DICOMED, GRAFPAC, GRINNELL, Hbook, Hplot, IDDS, Tell-A-Graph, Cue-Chart, IMLAC, AED, Tektronics, and ZETA.
- (21) * **Terminal Rental Permission**
Terminal rental permission forms.
- (22) * **Terminal Rental Terms and Conditions**
Terms and conditions computer terminal rental form agreement.
- (23) * **Plot Sending on VAX and CDC**
Describes how to queue a "plot" file for processing on a graphics device for the CDC and the VAX by use of the graphics control card on the CDC, and the plotsend command on the VAX.
- (24) * **Disposing on the CDC**
Exhaustive summary of DISPOSE options.

... Maggie Morley, x5529

DATATRIEVE/RMS PROBLEM

Several users have been disconnected from the computer while modifying a domain in Datatrieve. They receive the error message "record too large for user's buffer". This is an RMS error which corrupts the file's indexing information.

Datatrieve and RMS are DEC products. A system crash dump has been taken and a Special Product Report has been filed with them. Hopefully, DEC will promptly fix the bug.

In the meantime there are several ways to correct the corrupted domain.

One way is to copy the corrupted domain into a temporary domain. Then erase the corrupted domain and recopy the temporary domain back to it.

Another way is to locate the corrupted record and delete it. Log in and use the following commands:

```
DTR> READY DOMAIN WRITE
```

```
DTR> PRINT ALL RUNNING COUNT, FIELDNAME
```

Get the number of the bad record. It's the large record.

```
DTR> SELECT #
```

```
DTR> ERASE
```

```
DTR> EXIT
```

At this point you will be disconnected from the computer but log back on and you will have a clean domain.

... Noel Brown, x4387
