**Early June 2019**

## Introduction

The statistical tabulations in this volume are based on a *Berkeley IGS Poll* completed by the Institute of Governmental Studies (IGS) at the University of California, Berkeley. The poll was completed online among 4,435 California registered voters in English and Spanish, of whom 2,131 are considered likely to vote in the state's March 3 Democratic primary for president.

The survey was administered by distributing email invitations to stratified random samples of the state's registered voters. Once the questionnaire and email invitations had been finalized, they were translated into the Spanish and reviewed for cultural appropriateness. They were then programmed onto Qualtrics, a survey platform frequently used by the University of California, Berkeley when distributing emails as part of an opinion research study. Each email invited voters to participate in a non-partisan survey conducted by IGS. Voters were provided a link to the IGS website where the survey was housed. Reminder emails were distributed to non-responding voters over a seven-day period. An opt out link was provided at the bottom of each invitation for voters not wishing to participate or not wanting to receive future emails from IGS about the survey.

Samples of registered voters with email addresses were provided to IGS by Political Data, Inc., a leading supplier of registered voter lists in California. The email listings were derived from information included on the state's official voter registration rolls. The statewide sample of registered voters was stratified in an attempt to obtain a proper balance of survey respondents across major segments of the registered voter population by age, gender and race/ethnicity.

To protect the anonymity of survey respondents, voters' email addresses and all other personally identifiable information were purged from the data file and replaced with a unique and anonymous identification number in data processing. At the conclusion of data processing, post-stratification weights were applied to align the sample to the population characteristics of the state's overall registered voter population. Likely voters were then identified based on each voter's stated intention to vote in next year's elections and factoring in their history of voting in past elections.

The sampling error associated with the results from the survey are difficult to calculate precisely due to the effects of sample stratification and the post-stratification weighting. Nevertheless, it is likely that the results from the overall likely Democratic presidential primary electorate are subject to a sampling error of approximately +/- 3 percentage points at the 95% confidence level. Results based on subgroups of this population would be subject to larger margins of sampling error.

## Survey Questions

Below are the names of the Democrats who have qualified so far to participate in the first presidential debate. For each please tell me whether your opinion of that person is favorable, unfavorable or whether you don't know enough about them to say? *(SEE RELEASE FOR CANDIDATES LISTED. DISPLAY ORDER RANDOMIZED)*

Below are the names of the Democrats who have qualified so far to participate in the first presidential debate. For each please tell me whether your opinion of that person is favorable, unfavorable or whether you don't know enough about them to say? *(SEE RELEASE FOR CANDIDATES LISTED. DISPLAY ORDER RANDOMIZED)*

If the California Democratic primary for president were being held today and the ballot listed these candidates, who would be your first choice? Who would be your second choice? *(SEE RELEASE FOR CANDIDATES LISTED. DISPLAY ORDER RANDOMIZED)*

For each of the following characteristics that a candidate might have, please tell me if you would consider this quality to be a major advantage, a minor advantage, a minor disadvantage or a major disadvantage? *(SEE RELEASE FOR CHARACTERISTICS LISTED. DISPLAY ORDER RANDOMIZED)*

The Democratic presidential candidates have been making a number of proposals that call for making changes to federal government laws and policies. For each of the proposals listed below, please indicate whether you feel the next president should move immediately to adopt this policy, take steps in this direction, or not adopt this policy? *(SEE RELEASE FOR POLICIES LISTED. DISPLAY ORDER RANDOMIZED)*

### About the Institute of Governmental Studies

The Institute of Governmental Studies (IGS) is an interdisciplinary organized research unit that pursues a vigorous program of research, education, publication and public service. A component of the University of California (UC) system's flagship Berkeley campus, it is the oldest organized research unit in the UC system and the oldest public policy research center in the state. The director of the Institute of Governmental Studies is Lisa Garcia Bedolla.

IGS conducts periodic surveys of public opinion in California on matters of politics and public policy through its *Berkeley IGS Poll*. The poll, which is disseminated widely, seeks to provide a broad measure of contemporary public opinion, and to generate data for subsequent scholarly analysis. The director of the *Berkeley IGS Poll* is Mark DiCamillo. For a complete listing of stories issued by the *Berkeley IGS Poll* go to <https://igs.berkeley.edu/igs-poll/berkeley-igs-poll>.
