In the version of this article initially published, the *SCD1* lane in Figure 4e was inverted and has now been reoriented, while in the Source Data for Figure 2a, the *PDI* lane labeled image now replaces the Source Data online. Original and corrected figures (Figs. 1 and 2) are shown below. Additionally, the “Gene expression and immunoblot analysis” section in Methods has been amended to clarify that “Proteins of interest and loading controls were run on separate membranes.” The changes have been made in the HTML and PDF versions of the article.
