String Qua(ntum)rtet

per Quartetto d'Archi

for String Quartet

(Liberamente ispirato al mondo della Fisica Quantistica)

Freely inspired to the world of Quantum Physics

NOTA DI PROGRAMMA

La composizione è liberamente ispirata al mondo e ai concetti della fisica quantistica in generale e della meccanica quantistica in particolare. Questi principi oltre a ridisegnare la scienza del nostro tempo hanno modellato il pensiero filosofico della società moderna. Il brano è diviso in 9 momenti liberamente correlati alle leggi fondamentali (equazioni matematiche) e al loro contenuto filosofico:

I. Chi Lancia i Dadi?: riferito alla natura probabilistica del mondo quantistico in cui non sempre vale la legge di causa-effetto.

II. Sovrapposizione I: se un sistema può trovarsi in due stati distinti, può trovarsi anche in una qualsiasi loro combinazione lineare (sovraposizione).

III. Il Paradosso del Gatto: ispirato al paradosso del "Gatto di Schrödinger", un esperimento mentale ideato da Erwin Schrödinger che mette in luce come la natura probabilistica della realtà quantistica e il principio di sovrapposizione portino a manifestazioni bizzarre nella realtà in cui il gatto può essere morto e vivo allo stesso tempo.

IV. L'entanglement e le sue Inquietanti Azioni a Distanza: riferito alla famosa frase di Einstein sullo strano fenomeno della correlazione quantistica in cui due sistemi possono essere "intrecciati" e interagire anche a grande distanza in modo istantaneo violando apparentemente il principio per cui la velocità della luce non può essere superata.

V. Sovrapposizione II: come Sovrapposizione I.

VI. Onde Probabilistiche: ispirato all'equazione di Schrödinger che governa la dinamica (l'evoluzione nel tempo) dei sistemi quantistici definendone le caratteristiche (funzione d'onda) mediante leggi probabilistiche.

VII. Una Strana Dualità: basato sullo strano comportamento ondulatorio-corpuscolare delle particelle elementari espresso dalla legge di De Broglie.

VIII. Figure di Interferenza: rappresentazione musicale del famoso "esperimento della doppia fenditura" che all'inizio del '900 diede il via alla meccanica quantistica facendo scoprire la doppia natura delle particelle subatomiche che al tempo stesso si comportano come onde e come corpuscoli.

IX. Relazioni di Indeterminazione: una mia personale trasposizione musicale del famoso "Principio di Indeterminazione di Heisenberg" che incrinò il sistema scientifico e le sue basi filosofiche mettendo in luce i limiti della fisica dimostrando che è impossibile conoscere contemporaneamente per una particella sia la sua posizione che la sua velocità oppure la sua energia e la sua durata.

PROGRAM NOTE

The piece is freely inspired by the world and concepts of quantum physics in general and quantum mechanic in particular. These concepts, besides redesigning the science of our time, have shaped the philosophical thought of modern society. The piece is divided into 9 moments freely inspired by the fundamental laws (mathematical equations) and their philosophical content:

I. Who Rolls the Dice?: referred to the probabilistic nature of the quantum world in which the law of cause and effect is not always valid.

II. Superimposition I: if a system can be in two distinct states, it can also be in any linear combination of the two states.

III. The Cat's Paradox: inspired by the conceptual experiment of "Schrodinger Cat" which highlights how the probabilistic nature of quantum reality and the principle of superimposition lead to bizarre manifestations in macroscopical world in which the cat can be dead and alive at the same time.

IV. Entanglement and its Spooky Actions at a Distance: referring to Einstein's famous phrase about the strange phenomenon of quantum correlation in which two systems can be "intertwined" and interact even at great distance in an instantaneous way apparently violating the principle that the speed of light can not be overcome.

V. Superimposition II: same as Superimposition I

VI. Probabilistic Waves: inspired by the Schrodinger equation that governs the dynamics (the time evolution) of quantum systems by defining their characteristics (wave function) through probabilistic laws.

VII. A strange Duality: based on the strange wave-corpuscular behavior of the elementary particles expressed by De Broglie's law.

VIII. Interference Figures: my musical representation of the famous "double-slit experiment" which, at the beginning of '900, has started the quantum mechanics making discover the double nature of subatomic particles that at the same time behave like waves and like corpuscles.

IX. Uncertainty Relations: my personal musical transposition of the famous "Heisenberg's Uncertainty Principle" which cracked the scientific system and its philosophical bases highlighting the limits of physics showing that it is impossible to know, at the same time for a particle, both its position and its speed or its energy and its duration.

Musical score for strings (Vln. I, Vln. II, Vla., Vc.) at measure 100. The tempo is quarter note = 90. The instrumentation includes pizzicato (pizz.) and glissando (gliss.). Dynamics include piano (p), mezzo-forte (mp), forte (f), and very forte (ff). Measure 100 shows a sequence of eighth-note patterns followed by sixteenth-note patterns with grace notes.

IV. L'Entanglement e le sue Inquietanti azioni a distanza

IV. Entanglement and its Spooky Actions at a Distance

$$|\Phi^+\rangle = \frac{1}{\sqrt{2}}(|0\rangle_A \otimes |0\rangle_B + |1\rangle_A \otimes |1\rangle_B)$$

$$|\Phi^-\rangle = \frac{1}{\sqrt{2}}(|0\rangle_A \otimes |0\rangle_B - |1\rangle_A \otimes |1\rangle_B)$$

$$|\Psi^+\rangle = \frac{1}{\sqrt{2}}(|0\rangle_A \otimes |1\rangle_B + |1\rangle_A \otimes |0\rangle_B)$$

$$|\Psi^-\rangle = \frac{1}{\sqrt{2}}(|0\rangle_A \otimes |1\rangle_B - |1\rangle_A \otimes |0\rangle_B).$$

Vivace e Deciso ♩.=150 c.ca

Musical score for strings (Vln. I, Vln. II, Vla., Vc.) at measure 103. The tempo is quarter note = 150. The instrumentation includes arco and ff dynamics. Measure 103 shows eighth-note patterns with grace notes and dynamic changes between ff and mp subito.

VI. Onde Probabilistiche

VI. Probabilistic Waves

$$i\hbar \frac{\partial}{\partial t} \psi(r, t) = \widehat{H} \psi(r, t)$$

Le linee verticali tratteggiate sono state inserite volutamente per agevolare la lettura e l'esecuzione dei musicisti fornendo un riferimento di durata approssimativo. Tuttavia l'intera sezione è da intendersi in notazione spaziale, quindi libera e senza tempo.

The vertical dotted lines have been inserted intentionally to facilitate the reading and performance of the musicians providing a reference of approximate duration. However, the whole section is to be interpreted as spatial notation, therefore free and timeless.

Calmo ma pian piano sempre più intenso come un'onda che cresce
Libero, Senza Tempo (Freely, Without Time)
