Daniel Bellieny-Rabelo, Yong K. Zhu & Jennifer A. Doudna

In the version of the article initially published, in the “Similarity to non-viral proteins” section, the sentence originally reading “...the AlphaFold database, which contains more than 300,000 proteins from 21 organisms” has now been corrected to “the AlphaFold database, which contains more than 500,000 proteins from 48 organisms”. Additionally, in the Methods, in the “Structural alignments against the AlphaFold databases” section, the text “(downloadable via the Foldseek command ‘foldseek databases Alphafold/Proteome afdp tmp’)” has now been added. These corrections have been made to the HTML and PDF versions of the article.
