LETTER REPORT

AN ENERGY-DISPERSIVE X-RAY FLUORESCENCE ANALYSIS OF OBSIDIAN ARTIFACTS FROM AZ AA:12:85 (ASM), CENTRAL, ARZIZONA

29 September 2017

Barbara Montgomery Chris Merriman Tierra Right-of-Way 1575 East River Road, Suite 201 Tucson, AZ 85718

The one piece of obsidian debitage was produced from the Sand Tanks source located in western Maricopa County, Arizona (Shackley 2005, Shackley and Tucker 2001). This source is relatively uncommon in archaeological contexts, but has occurred in central Arizona sites (Shackley and Tucker 2001).

Specific instrumental methods can be found at http://www.swxrflab.net/anlysis.htm, and Shackley (2005). Source assignment was made by comparison to source standard data in the laboratory. Analysis of the USGS RGM-1 standard indicates high machine precision for the elements of interest (Table 1 here).

Sincerely,

M. Steven Shackley, Ph.D. Director
