COLLIDE-OSCOPE V (2019)

for flute, clarinet in B-flat, violin, viola, cello

duration: 10.5 minutes

music by: Anthony R. Green

Preface

The fifth in the *Collide-oscope* series, *Collide-oscope V* explores concentrated colors, concentrated pitch collections, and restrained employment incorporating the same process as the other works in the series, all to create textures that spin and collide much like the colors and shards of material found in a kaleidoscope. This fifth iteration is the first in the series to expand beyond the trio. It is also the first to be (very) loosely inspired by an external work of art: a poem by Frances Ellen Watkins Harper (1825 – 1911) titled *Let the Light Enter*. In this poem, Harper reflects on Goethe's last words, a prayer for lights. Bittersweet, as Goethe (or anyone for that matter) dies, his ability to perceive light also dies. In reflecting upon those moments, however, Watkins evokes various phenomena and entities that are associated with light: shadows, sunshine, streams, ebbing and flowing, and more. Combined with the idea of dying and death (which, in my opinion, is only a type of transition), *Collide-oscope V* hints at the various behavior of light, imagery that light may evoke, and emotions associated with the leaving or the absence of light, all within the context of death and dying. However, the music is only a hint, and not a literal depiction of this poem's narrative, as all of the works in the *Collide-oscope* series are purposefully examples of absolute music. It is inevitable for me to reflect upon the poetics of the works in the *Collide-oscope* series. Therefore, using this particular beautiful Watkins poem was a wonderful study; the poem for me was to be marveled, but not to be too strong of an influence. This work was premiered in a concert with the theme *Poetry/Poetics*, along with works by Shawn E. Okpebholo and Evan Williams, by the ensemble Sound of Late, who is also the dedicatee.

Text

Let the Light Enter, by Frances Ellen Watkins Harper (1825 – 1911)

The dying words of Goethe.

"Light! more light! the shadows deepen,
And my life is ebbing low,
Throw the windows widely open:
Light! more light! before I go."

"Softly let the balmy sunshine
Play around my dying bed,
E'er the dimly lighted valley
I with lonely feet must tread."

"Light! more light! for Death is weaving
Shadows 'round my waning sight,
And I fain would gaze upon him
Through the stream of earthly light."

Not for greater gift of genius;
Not for thoughts more grandly bright,
All the dying poet whispers
Is a prayer for light, more light.

Heeds he not the gathered laurels,
Fading slowly from his sight;
All the poet's aspirations
Centre in that prayer for light.

Gracious Saviour, when life's day-dreams
Melt and vanish from the sight,
May our dim and longing vision
Then be blessed with light, more light.

Performance Notes

As this piece, for the most part, is straight forward, a key explaining the notation is not necessary. The symbols and the notation are explained within the score (and parts), and remain consistent throughout the score. For further explanation, see below:

Flute:

no vib. = no vibrato; produce the pitch with a straight, thin tone

wt = whistle tone

air = pitchless, audible air sound through the instrument; the vowel suggestions are for embouchure shape, acting like a filter to the air sound (affecting the color). Note: be mindful of the air sounds with flutter tongue and those without

key click = produce an audible, percussive clicking sound along with the pitch

Clarinet in B-flat:

ram = stop pitch with tongue: percussive, soft sound

key click = produce an audible, percussive clicking sound along with the pitch

timbral trill (trill line without the *tr*) = trill between two different fingerings of the same pitch; microtonally different 2nd pitches are acceptable

harmonic = produced the indicated pitch as a harmonic; what is notated is the sounding pitch

air = pitchless, audible air sound through the instrument; Note: be mindful of the air sounds with flutter tongue and those without

slap = very loud, percussive POP sound with as much pitch as possible

M = multiphonic; use the indicated pitch as a fundamental upon which to build a multiphonic.

Use the indicated dynamics to shape the *gritiness* of the multiphonic. Singing/growling into the instrument can be employed to create the multiphonic

no vib. = no vibrato; produce the pitch with a straight, thin tone

Strings:

con sord. = con sordino; *suggestion: use a dollar bill mute*

msp = molto sul ponticello

circular arrows = circular bow; organically vary/manipulate the velocities (purposely inconsistent)

high bow pressure = create a *scratch* sound, but also maintain the indicated pitch

bow bridge, pitchless = bow as much as possible on the bridge, creating a buzzy, airy sound.

Suggestion: simultaneously bow the body of the instrument for support

* a note on harmonics: artificial harmonics are notated using standard notation. Some harmonics are notated with a standard note and a small circle above that note. This indicates a natural harmonic that the player must find (any fingering/position is acceptable so long as the written pitch is produced). The remaining harmonics are notated with a standard note and a diamond above or below the notehead. **This indicates that the standard note must be played with a harmonic finger pressure.** For most of these notes, the desired resultant pitch is indicated.

As always, have big fun!!

commissioned by and dedicated to Sound of Late
