**Tabulations from a Late October 2020 Survey
of California Likely Voters about
the Presidential Election**

by the
Berkeley IGS Poll
Institute of Governmental Studies
University of California, Berkeley

October 16-21, 2020

Introduction

The statistical tabulations in this volume are based on a *Berkeley IGS Poll* completed by the Institute of Governmental Studies (IGS) at the University of California, Berkeley. The poll was administered online in English and Spanish October 16-21, 2020 among 6,686 California registered voters, of whom 5,352 were considered likely to vote or had already voted in this year's election.

The survey was administered by distributing email invitations to stratified random samples of the state's registered voters. Each email invited voters to participate in a non-partisan survey conducted by the University and provided a link to the IGS website where the survey was housed. Reminder emails were distributed to non-responding voters and an opt out link was provided for voters not wanting to receive further email invitations.

Samples of registered voters with email addresses were provided to IGS by Political Data, Inc., a leading supplier of registered voter lists in California and were derived from information contained on the state's official voter registration rolls. Prior to the distribution of the emails, the overall sample was stratified by age and gender in an attempt to obtain a proper balance of survey respondents across major segments of the registered voter population.

To protect the anonymity of survey respondents, voters' email addresses and all other personally identifiable information derived from the original voter listing were purged from the data file and replaced with a unique and anonymous identification number during data processing. Post-stratification weights were applied to align the overall sample of the registered voters responding to the survey to population characteristics of the state's registered voters. Likely voters were identified based on a voter's stated interest in and intention to vote in the election and factoring in their history of voting in past elections.

The sampling error associated with the results from the survey are difficult to calculate precisely due to the effects of sample stratification and the post-stratification weighting. Nevertheless, it is likely that findings based on the sample of likely voters in the election are subject to a sampling error of approximately +/- 2 percentage points at the 95% confidence level.

About the Institute of Governmental Studies

The Institute of Governmental Studies (IGS) is an interdisciplinary organized research unit that pursues a vigorous program of research, education, publication and public service. A component of the University of California system's flagship Berkeley campus, IGS is the oldest organized research unit in the UC system and the oldest public policy research center in the state. IGS's co-directors are Professor Eric Schickler and Associate Professor Cristina Mora.

IGS conducts periodic surveys of public opinion in California on matters of politics and public policy through its *Berkeley IGS Poll*. The poll, which is disseminated widely, seeks to provide a broad measure of contemporary public opinion, and to generate data for subsequent scholarly analysis. The director of the *Berkeley IGS Poll* is Mark DiCamillo. For a complete listing of stories issued by the *Berkeley IGS Poll* go to <https://www.igs.berkeley.edu/research/berkeley-igs-poll>.
