1. Equation 4 in the text and in Table I has two wrong minus signs in the publication. It should read,

\[
\sigma_s = \frac{E \nu}{(1 - \nu)(1 - 2\nu)} \text{tr}(\varepsilon) + \frac{E}{1 + \nu} \varepsilon_e
\]

This term is eventually neglected as described in the publication and thus does not affect the subsequent analysis and results.

2. Equation 9 in the text and in Table I, is missing a factor of 2 and should involve the strain rate tensor \( \dot{\varepsilon}_p \). It is correctly stated as

\[
-\nabla P + 2\nabla \cdot \eta \dot{\varepsilon}_p = 0
\]

This mistype does not affect our results since the factor of 2 is correctly accounted for in our simplification of the above equation (Eq. 17). We reproduce Eq. 17 for reference,

\[
-\nabla P + \eta \nabla^2 \dot{u} = 0
\]
