Mixtures of aromatic compounds induce ligninolytic gene expression in the wood-rotting fungus *Dichomitus squalens*

Journal of Biotechnology, Volume 308, 20 January 2020, Pages 35-39

In Section 3.1 of the Results and Discussion, it should have stated 100 μM and not 50 μM for the concentration of the aromatic compounds. The correct concentration was stated in the Materials and Methods and the error only occurred in the Results and Discussion section. The authors would like to apologize for any inconvenience caused.
