## IBS Doctoral Dissertation Award

Since 2013, the IBS makes a periodic award for the best doctoral dissertation, as judged from thesis abstracts submitted to *Frontiers of Biogeography* by an Early Career Researcher (up to 2 years after graduation from a PhD program).

The Early Career Committee and *Frontiers of Biogeography* editors evaluate all thesis abstracts submitted for publication in *Frontiers of Biogeography* following the journal's usual peer-review process; authors should state their interest to be considered for the award in their cover letter. The recipient of the award will be invited to present their thesis research at the biennial Early Career Conference and will receive a commemorative plate and monetary award to subsidize travel expenses to the Early Career Conference.

We are pleased to announce that the recipient of the 2013 Doctoral Dissertation Award has

been Matthew Iacchei, from the Department of Oceanography, School of Ocean and Earth Science and Technology, University of Hawai'i at Mānoa (Honolulu, USA), for his PhD entitled "Population genetic and phylogenetic insights into the phyllosomal odyssey." An honourable mention was granted to Dr. Jesse Morris from the Department of Geography, Kansas State University (USA), for his PhD synopsis "Using lake sediment records to reconstruct bark beetle disturbances in western North America."

More information about the IBS awards can be found at: <http://www.biogeography.org/html/About%20IBS/awards.html>.
