Introduction

Quick Start

For those who are already oriented to the language and its dialects here is a quick way to get started using this dictionary. The dictionary begins with the Halq’eméylem-to-English section where you can look up words in alphabetical order by Halq’eméylem, the same order as English except that some sounds are written with two or three characters and are treated and alphabetized as single characters. So, q will be found before q’, q’ will be found before qw, and qw will be found before qw’. The plain character (for ex. q) is always alphabetized before the glottalized version (q’), and those sounds made with lips rounded (labialized) are found after the versions not labialized (so qw follows q’, and qw’ follows qw). (Most entries use ’ to show glottalization and glottal stop, but ’ is also quite acceptable in the Stó:lō writing system and is usually preferable for clarity in handwritten Halq’eméylem.) So to look things up by Halq’eméylem, follow this order: (a, ch, ch’, e, h, i, k, k’, kw, kw’, l, Ih, m, n, o, ō, p, p’, q, q’, qw, qw’, R (reduplication or doubling), s, sh, t, t’, th, th’, tl’, ts, ts’, u, w, xw, x, xw, y, ’).

To look up words by their English translations, look in the English-to-Halq’eméylem section which is the second main section of the book. If you find the Halq’eméylem word you’re looking for, to get more information about it (what are its meaningful parts, root, suffixes, prefixes, infixes, example sentences, details of all sorts) then look the word up in the Halq’eméylem-to-English section. If you don’t know its root, look it up where you’d normally expect it and you’ll find where to find the whole family of words with the same root. Every word is cross-referenced in that way. If you know the word has a prefix (for ex. s- or shxw- which make nouns from verbs, since 95% of all roots are verbs) you can look it up either under the s or sh or under the next letter in the word which is usually where the root starts.

In the Halq’eméylem-to-English section the entry with no indent from the margin is root or other headword. Under each root is an entry indented once, a word derived from the root and called a stem. If there is an entry under that which is indented twice, it is derived from the word above it with one fewer indent (i.e. takes that previous word as its stem or starting point and adds something to it–an affix stuck on at the beginning (prefix), inserted inside the root (infix) or stuck on at the end (suffix). Looking down at the words derived from the same root, they are generally arranged going down from simpler to more complex forms (using more affixes) in sets using the same stems. When a word is derived from a stem (always a root plus at least one affix), the meaning of the affix is shown in the entry for the stem, but is not usually repeated in the entries for words derived from that stem. The stems are not otherwise arranged in any fixed order among themselves, except that often they are in alphabetical order or by the suffixes added. So if one stem is derived from a root by adding <=es>, the next stem may be one derived from a root by added <=st>. This is not always the case, so look through the whole family derived from a particular root if you know from the English index that the word you seek is found under that root. This teaches a lot about how words are formed and about the related meanings behind each word. You will find many interesting and often surprising things; I did myself. (As a reader learns more about forming words, one can soon make up new words for things that are modern technology, etc., which are not known or listed yet in this dictionary! This is a skill all elders and fluent speakers have.)

Rarely a word begins in s- or shxw- and is followed by a consonant which seems the first letter of the root and yet is not. This is sometimes the case when the root is one beginning in s- or xw-. For example, <sqá:la> red huckleberry is derived from <seq> hang under and <=á:la> container, since they are harvested by hanging the berry basket container under the clusters of berries and hitting the branch with the cluster on the container so they fall into the basket–a very efficient means of harvesting them. In these kinds of words, the root vowel is dropped and a vowel later in the word normally has or here gets a higher stress or tone (high tone or mid tone). The elders did not tell me this in all cases but showed many other words that work like this, and when one tries to account for every affix and root and their meanings, to make sense of the literal meanings behind the words, one finds examples like this which
don’t make sense any other way. The root of red huckleberry is not <qé:l> bad, or <qá:l> steal, or <qí:l ~ qéy> put away, save, or <qó:l> water, as they contribute meanings that make no sense for <sqá:la> with either <=á:la> container or <=á> living thing added to finish the word.

It’s important that this dictionary have lots of cross-references (entries that are alphabetized by the whole word, for ex. and show which root it has and thus where to find all the detailed information on the word). Cross-references usually just have the word, its meaning, and the root (see <tó:l> for ex.). However, in some interesting cases I have included fuller information (the International Phonetic Alphabet spelling and analysis) and sometimes the literal meaning of the word. It takes too much space and time to do this for all cross-references but shows the type of information that can be found under the full entry filed under the word’s root.

There are sometimes differences of tones in a given word’s pronunciation (and spelling) between one dialect or another or one speaker and another. I have tried to be as accurate and faithful to the elders’ pronunciations as possible with these and to show all variants. I have relative pitch myself (and compose classical music) so that plus 37 years of experience should help make the tones accurately reflected by the spelling. The three phonemic tones are sometimes called high-stress, mid-stress, and unstressed, but actually are high tone, mid tone, and low tone (each about a major third apart on a musical scale). These tones can make a difference in meaning between words otherwise spelled exactly the same (for example, <qwá:l> mosquito and <qwà:l> talk, speak) (with high tone and mid tone respectively). Many examples can be found contrasting between low tone and high or mid tone. Each vowel has its own tone in the word. <pípehò:m> frog, has high tone, then low tone, then mid tone (like the U.S. Marine song, “Over Hill, Over Dale” or 5-1-3 in relative musical pitches). (Downriver Halkomelem and Island Halkomelem do not have such phonemic tones so far as is known, they have instead phonemic stress plus some intonation.)

A few words about the English-to-Halq’eméylem section:

1) it is organized by showing the English meaning you want to find. If the word only has that meaning, the entry will show the English, then two colons (::), a few spaces, then the Halq’eméylem word, then if that word is not a root by itself it will be followed by a comes from sign (<) a space and the root the word will be found under in the Halq’eméylem-to-English section. If there is no root shown like this, just look up the word by its own spelling. You can usually do this anyway since all words are cross-referenced. 2) they are in alphabetical order by English, of course, but personal names or place names all begin with capital letters, and if they are spelled the same way as a regular word (like Raven, the name of the character in stories, and raven, the bird), the capitalized name precedes the regular word which is not capitalized. 3) Though this section is an English-to-Halq’eméylem section, you will find a number of terms in another language. These are scientific names which identify the scientific species, genus, and sometimes family or order of a plant or creature. They are mostly Latin terms (a few are Greek terms mixed in), and they are so that one can look up the plant or creature in books or the Internet and get pictures, full details of when plants are ripe, what habits or descriptions are given there, for each plant and animal known to the elders I worked with. Sometimes from the English name alone (for example blueberry or whale) one cannot be sure of the precise plant or creature and all the details. However, with the scientific name identified one can be sure that the exact species or variety of that plant or creature exists in the Stó:ló area and get information exactly about that type or the variety of types the word means. 4) The computer program which I used to create the English-to-Halq’eméylem section is a very good one but created entries only where I inserted a star (*) before the word in my original computer entry of the dictionary. I’ve added any words I found that were missed (for ex. by my forgetting to add a star before it before I ran the program), but there might be a few I still missed. In such cases the word and meaning will be in the Halq’eméylem-to-English section but that meaning may not be in the English-to-
Halq’éméylem section. If you have a rough idea of the form’s Halq’éméylem spelling or root, try looking there to see if a word with that meaning is found there.

Sample entries

This dictionary has a large number of different types of information about each word in the Halq’éméylem-to-English section. The English-to-Halq’éméylem section is mainly an index or finder-list. Later in this introduction is a complete list of all types of information given and all the abbreviations for them, in various tables and charts. For now, I will show you how to read the first three entries under q’.

The first entry is:
<q’>, da //=q’//, DIR /‘on something else, within something else’/, TIB; found in <q’elq’elq’>, //C,jC=q’=l=’l, /‘tangled on s-th else, snagged (as a net on a log or branch)’/, <q’elq’elq’t>, //C,jC=q’=t=l, /‘coil it’/, <xéyq’et>, //xéy=q’=a=l/l, /‘scratch it (to itch it)’/ (compare with <xéy=m=et> grab it).

Angle brackets show forms in the Stó:lō writing system. To make it easier to find, forms in the Stó:lō writing system are shown in bold-face type. These are first in every entry, since the speakers and learners of the language will located them easier. Linguists can use the key (pp.xxxv-xxxvii) to quickly learn the writing system’s equivalents to IPA characters and can find the IPA characters given for each word, closely following the word spelled in the writing system. If a hyphen or equals sign precedes a Halq’éméylem form, the form is a suffix, an affix added after the root or after another suffix on the root. The equals sign shows it is derivational, that is, changes the meaning of the word or the word class of the word (for ex. from a verb to a noun; some roots cannot occur as words by themselves and these are sometimes indicated by ending them with an equals sign as well. A hyphen shows the affix is inflectional, so that it allows the word to be used in a sentence (for ex. adds a subject to the verb, makes it plural, etc.). The first entry, given above, is <q’>, a derivational suffix, written in the International Phonetic Alphabet (IPA) also a //=q’//. Its main semantic area (domain or subdomain) is in DIRECTION and it means /‘on something else, within something else’/. (Translations are given in italics.) This meaning also belongs in the semantic area or domain of TRANSITIVIZERS, INTRANSITIVIZERS, BENEFACTIVES (TIB), suffixes that show what the verb is acting on or affecting; it isn’t actually such a suffix but is closely related semantically, since getting tangled on something else shows an action on something else or affecting something else. When an entry is an affix, typically some examples are given of some words in which it is found; these are shown after the words “as in” in this entry.

The examples are given first in the Stó:lō writing system used for Upriver Halq’éméylem, then in the IPA used by linguists. The IPA form here shows all the prefixes, infixes and suffixes added to the root, separated by hyphens or equals signs and within double slashes, which linguists use to show morphophonemic transcriptions (versions of the word with the affixes shown divided from the root and from each other). The first example under <q’> begins with doubling or reduplication, where the first consonant (C₁) and the second consonant (C₂) are copied, separated by a vowel (/ə/), called schwa by linguists and written as <e> in the Stó:lō writing system) and prefixed to the root. In this case, the root is followed directly by the suffix we have looked up, <q’>. This example means /‘tangled on something else, snagged (as a net on a log or branch)’; in linguistics, translations are usually shown within single quotes, as here, but to highlight them, they are also put in italics throughout the dictionary; in certain systematic places the single quotes are omitted. Other examples follow, in the same order. The last one has a form to compare which shows the root without the suffix; by contrasting this we can show clearly what part of the word’s meaning belongs to the root and what part to the affixes.

The second entry or root after q’ is:
<q’a ~ qa ~ qe>, free root //q’ ~ q ~ qθ//, CJ [‘or’], syntactic analysis: conjunction, attested by AC, example: <lí chòkw te lálems q’a lí stetís? ~ lí chòkw te lálems qa lí stetís?>, //lí cák” te léləm-s
This word has several variant pronunciations (~ means "varies with"); it is a free root (can occur as a word by itself without affixes). The IPA spelling follows next with the variants given in the same order. The word belongs to the semantic domain of CONJUNCTIONS (abbreviated CJ) and means or. If there are comments about the pronunciation (phonological comments), the word structure (morphological comments), the word order (syntactic analysis), or the meaning (semantic comments SMC or ASM), they follow next, as here. The word is given or attested by Amy Cooper (abbreviations of speaker's names, and other abbreviations, are listed later in this introduction); then examples in sentences may be given, as here, if available. In the IPA version, full morphological analysis is given, breaking all the words down into their morphemes, whether prefixes, infixes, suffixes, or roots; infixes are shown in square brackets here, if available. In the IPA version, full morphological analysis is given, breaking all the words down into their morphemes, whether prefixes, infixes, suffixes, or roots; infixes are shown in square brackets and both preceded and followed by equals signs or hyphens, stuck in the correct place within the root (usually after the first vowel of the root). The speaker or speakers who gave the sentences are identified after the meaning is given.

The third entry or root after q'á:l is:

<q'á:l>, free root //q'á:l//, EFAM ['believe'], syntactic analysis: intransitive verb, attested by Elders Group, AC, EB, example: \:<skw'áy kw'els q'á:l kwes lúwes.>, //s=k"é-y k"e-l-s q'á:l k"e-s lúw-e-s//, /'I couldn't believe it was you.'/, literally /'it can't be that -I -subordinate nominalizer believe that - subordinate nominalizer is you -it (third person subord. subject)/, attested by AC, <qwéllhtsellh q'á:l.>, //Rów=4-c-é1 q'á:l//, /'I don't/didn't believe'./ Elder's comment: "there's no word for doubt", attested by EB.

This headword is <q'á:l>, a free root whose meaning belongs in the semantic area or semantic domain of EMOTIONS, FEELINGS, ATTITUDES, MOODS (abbreviated EFAM), and it means believe. If a root is a bound root (cannot occur as a separate word without added affixes), then it is sometimes hard or impossible to identify its meaning—one must subtract the meanings of the affixes to see what meaning is left, but this must be done for all the words it appears in and a common or shared meaning or set of related meanings found for the root. Here, however, there is no problem. The word is an intransitive verb (that is, doesn't have to have a stated object which it acts upon). It was attested by the Elders Group, Amy Cooper, and Edna Bobb (no dates recorded, or attested on multiple dates). A sentence example follows next, and after its meaning is given, a literal meaning is given which shows the meaning of each morpheme in the order it occurs in each word, separated by a hyphen. This helps to show how native speakers organize the words and their meanings and think about the phrase subconsciously. The first example was given by Amy Cooper, the second example sentence by Edna Bobb, who commented, when asked for the Halq'eméylem word for doubt, said there is no single word, so this phrase would be a way to express it.

This root has a number of words derived from it which are shown as indented sub-entries under it. Whenever a word is indented further from the left margin than the word above it, it is derived or inflected from the word above it indented less. Thus:

<q'á:l>, free root //q'á:l//, EFAM ['believe'], syntactic analysis: intransitive verb, attested by Elders Group, AC, EB, example: \:<skw'áy kw'els q'á:l kwes lúwes.>, //s=k"é-y k"e-l-s q'á:l k"e-s lúw-e-s//, /'I couldn't believe it was you.'/, literally /'it can't be that -I -subordinate nominalizer believe that - subordinate nominalizer is you -it (third person subord. subject)/, attested by AC, <qwéllhtsellh q'á:l.>, //Rów=4-c-é1 q'á:l//, /'I don't/didn't believe'./ Elder's comment: "there's no word for doubt", attested by EB.

<q'áq'el>, cts //q'[C₁]-é//, EFAM ['believing'], <-R₁> continuative, phonology: reduplication, syntactic analysis: intransitive verb, attested by Elders Group.
The document contains linguistic analysis and descriptions of the languages Cheh, Tait, and their dialects. It includes concepts such as the use of words like 'lheq'él:exw' and 'lheq'él:exw' in different contexts and their implications in syntax and morphology. The text also discusses the role of 'met' as a transitivizer and indirect effect control transitivizer, and how these concepts are used in the languages. The text further explores the use of 'él:exw' and 'él:exw' in various grammatical constructions and their implications in vowel simulation and consonant merger. The text concludes with an analysis of the use of 'él:exw' in a story of the Flood and its derivation, illustrating the dynamic nature of these languages.
<q'elstá:txw>, caus /l=q'él=sT-Ø=[Aē]=x"~/l, durs, EFAM /fool s-o, deceive s-o, (lie to s-o [SJ])/.
(<st> causative control transitivizer), probably <á:-ablaut on suffix> durative or possibly to
dissimilate from <q'élstexw> return it, bring it back, give it back which has root <q'ó:/> together or
possibly <q'ál> go over/around, go back on oneself, coil, (<exw> third person object), phonology:
ablaut, syntactic analysis: transitive verb, attested by EB, Deming, also /lie to s-o/, attested by SJ
(Deming 4/27/78), example: <tsel q'elstá:txw.>, //c-Ø q'él=sT-Ø=[Aē]=x"~/l, /'I fooled him.",
attested by EB; found in <q'élstá:txwes.>., //q'él=sT-Ø=[Aē]=x"~-Øs~/l, /'He fooled someone.',
attested by EB, example: <q'élstá:txwes q'á:l.>., //q'él=sT-Ø=[Aē]=x"-Ø qØ=s=x q'él:~/l, /'He
fooled him and he believed.'/ attested by EB, <q'élstá:txwes á:bltel te Lawéchten.>. //q'él=sT-
Ø=[Aē]=x"-Ø ?é-Øel te lëw=(=)c=teen~/l, /'They fooled Lawéchten., They lied to Lawéchten.'/,
comment: Lawéchten is a Nooksack language proper name; Charlie Lewiston, an Indian doctor
from the area of Nooksack, Wash., had that name till his death ca. 1920 (pronounced by non-Indians
as Lewiston); the name was formally passed to Brent Galloway by Alice Hunt (AH) and Louisa
George (LG) at a naming ceremony 10/9/77 at Chehalis, B.C.), attested by Deming (4/27/78 and
1974-1977 as well); found in <q'élstá:txwesthòx>. //cí=q'él=sT-Ø=[Aē]=x"~T-áx~/l, (irregular),
comment: in this form =stá:txw is used as part of the root and a second causative =st is added, then
the object pronoun suffix -Øx me; it is not clear whether this is an error or is required and allowed to
maintain the root vowel shifted into =stá:txw; normally the -exw is present only when a third person
object is intended (even if it is reanalyzed and considered part of the causative and non-control
suffixes, as =stexw and =lexw, as do Suttles and Hukari in other dialects of Halkomelem); but here
both the e (though moved) and the xw are retained with the third person object superceded by the
-Øx second person singular object suffix, phonology: the last vowel has stress downstepped to `,
attested by Deming (4/27/78).

<q'íq'elstá:txw>, cts and dmv //c₁=q'él=sT-Ø=[Aē]=x"~/l, EFAM /fooling s-o, (fool s-o as a joke,
April-fool s-o [Deming])/, attested by Deming (2/7/80), (<R₄>= diminutive continuative),
phonology: reduplication, metathesis or ablaut plus vowel-reduction, morphological note:
causative durative continuative, transitive verb, attested by Elders Group (3/29/78), also <q'íq'elstaxw>., //c₁=q'él=sT-Ø=[Aē]=x"~/l, [q'eq'elšux"], also /fool s-o as a
joke, April-fool s-o, (Deming 2/7/80), (<R₄>= diminutive), morphological note: causative durative diminutive,
attested by Deming (2/7/80); found in <q'éyq'elsthòm.>, //c₁=q'él=sT-ámØ~/l, /'to April-fool
you!/, attested by Deming, <q'íq'elsthóm.>, //c₁=q'él=sT-ámØ~/l, /'You're being fooled.'/, attested
by Elders Group (3/29/78).

So this root has four sub-entries (words derived or inflected from it directly), and the last three of
these each have a sub-entry of its own. The four are <q'áq'el> 'believing', <lheq'él:exw ~ lhq'él:exw ~
lhq'élexw> 'know s-th, know s-o' (which has a form derived from it: <lheq'élomét> 'know oneself, be
certain'), <q'élmet> 'believe s-o, trust s-o' (which has a form inflected from it: <q'áq'élmet> 'believing
s-o'), and <q'elstá:txw> 'fool s-o, deceive s-o, (lie to s-o [SJ])' (which has a form derived from it:
<q'íq'elstá:txw> 'fooling s-o, (fool s-o as a joke, April-fool s-o [Deming]).'

<q'áq'el> is a continuative stem (cts); later in the introduction there is a list of all such abbreviations
and what they stand for. It has infixed doubling or reduplication to make it continuative (i.e. adds the
-ing, thus believing). The infix consists of a copy of the first consonant of the root (C₁) followed by /Ø/
(called schwa by linguists, spelled <e> in the Stó:lô orthography); it is inserted or infixed inside the root,
after the first vowel.

<lheq'él:exw ~ lhq'él:exw ~ lhq'élexw> 'know something, know someone' is the next word derived
from the root. It has a prefix, <lhe> ~ lh> 'use, extract, extract a portion', added before the root. And it
has two suffixes, =l> non-control transitivizer, accidentally, happen to, manage to and <exw> third
The entry for this word is a complicated one with lots more information about the word. There is consonant merger when the last <l> of the root is combined with the <s> of the suffix; the result is an <s> which is held for twice as long as a single <l> in the first two variants (shown by <ll> in the writing system); in the last variant, the second <l> is just dropped. These three variants are found in the Chehalis and Tait dialects, attested by the elders in the Intermediate Halkomelem Teachers Training Class (IHTTC) and by Edna Bobb, Amy Cooper, and Joe Lorenzetto (EB, AC, JL). Another place where one of these variants is attested is in the Elmendorf and Suttles article from 1960; that form is given next in the IPA. There is another variant set of pronunciations in the Chilliwack dialect, <slhéq'élexw ~ lhéq'él:exw ~ slhéq'el:exw>, attested by IHTTC, AC, JL, and another variant set <slhéq'awelh ~ slhéq'welh>, /s=ṭə= 'q̤̃l=weθ/, subdiaslects: Pilalt (Chilliwack town) and Chill. (Sardis), attested by EB, AC. This last set means know but lacks the <l-exw> suffixes and has instead the suffix =welh> which is probably =welh ~ =ulh ~ welh> meaning already. One version leaves the root vowel unchanged, the other changes it to <e>, but both shift the high tone to the first syllable, and both sets of variants add a prefix <s-> stative (which means be in a state of); the literal meaning of this last variant set is “to be in a state of already extracted or used believing”, thus yielding to know someone or something.

The entry continues with a large number of example sentences, each with the Stó:lō orthography first, then the IPA, the meaning, then the person who attested it, and where specified, the dialect or subdiaslects the speakers reported it to be in.

The next entry, <lhéq'élémet> 'know oneself, be confident', is derived from the word just discussed, <lhéq'el:exw ~ lhéq'él:exw ~ lhq'él:exw>, and is a non-control reflexive stem; the suffix <émet> is reflexive, do to oneself. The meaning be confident is developed from “know oneself” and is an alloseme. There are also dialect variants in the entry for the Chilliwack dialect with stative <s-> prefixed. There is also the same consonant merger as in the previous word that <lhéq'élémet> is derived from, and since the reflexive has a vowel with a high tone (also called high stress in lessons), the root vowel <á> or <é> is changed to low tone <e> (called by linguists here zero grade or schwa). The Chilliwack form is also used to mean ‘understand’. The verb is used as an intransitive verb that can’t have a further object. (You can’t “be confident the dogs,” for example. If you want to say know/understand the dogs, you would use the transitive verb <slhéq'el:exw ~ lhéq'él:exw ~ slhéq'elelexw> in the Chilliwack dialect.) There is one example sentence to conclude the entry.

The next entry or stem is <q'élmet>, an indirect effect control stem (iecs), meaning ‘believe s-o, trust s-o’. It is derived directly from the root <q̤̃l ál> with a vowel change (<é-ablaut> non-continuative) and a suffix (<met> indirect control transitive). The reason we know this vowel change has a different meaning than the same vowel change seen in <slhéq'élexw ~ lhéq'él:exw ~ lhq'él:exw>, is because the next word is <q̤̃l'éq'élmet> which is continuative and keeps the root vowel by contrast. The suffix meaning indirect effect control transitive shows that believing or trusting someone has only an indirect effect on that someone (unlike chopping carrots which has a direct effect on the carrots). This word is a transitive verb and was attested by the Elders Group (2/16/77, 2/8/78 [U.S.-style dates]) and by Amy Cooper. A sentence example follows, showing the typical change of <=met> to <=meth> before...
certain pronoun suffixes.

The next form <q’aq’elmet> ‘believing s-o’, derives from the last stem. It is a continuative stem with infixed doubling or reduplication (copies the first consonant of the root, adds <e> and infixed this after the first vowel of the root and before the next root consonant (<l>). It’s also a transitive verb, attested by Elders Group (2/8/78).

The next entry or stem is <q’elstá:lxw> fool s-o, deceive s-o, a causative stem (caus) and also durative (durs), and according to Susan Jimmy, [SJ], it also can mean lie to s-o. It has a suffix, <=st> causative control transitivizer, which applied to the root believe gives it a literal meaning of “cause someone to believe”, thus fool s-o, deceive s-o. It probably has <á:-ablaut> durative on the suffix <-exw> (third person object), thus changing the <e> to <á:>; this vowel change morpheme is the only one that is applied to change vowels in suffixes—the others only change the vowel in the root. There is a possibility that the change is also to dissimilate (make the word different) from <q’élstexw> return it, bring it back, give it back which either has root <q’ó:to> together or possibly <q’ål> go over/around, go back on oneself, coil. There are then a number of example sentences (labelled “example”) and words (labelled “found in”) of this word in use. There is a comment and history in passing of the name <Lawéchten> which is used in one of the sentences (the author was given this name in a formal naming ceremony in Chehalis, B.C. in 1977). This is followed by an odd example that seems to have another causative added onto this word, and some discussion about the form and alternate analyses of the causative suffix as <=stexw> instead of <=st> and my arguments against that. There is also a comment about a tone change in the last vowel of the odd form, that the tone or pitch stress is lowered (downstepped) from high to mid.

The last form in this excerpt from the dictionary is <q’iq’elstá:lxw>, a diminutive continuative stem (all diminutive verbs are also continuative, i.e. doing s-th a little)(cts and dmv) and means fooling s-o, and according to the Deming elders also fool s-o as a joke, April-fool s-o. It was attested by the Deming elders on Feb.7, 1980 (2/7/80). It has prefixed reduplication (<R4=> diminutive continuative), which is made by copying the first consonant of the root, adding <í> and prefixing this right before the root. The word is derived from <q’elstá:lxw>, the stem or entry before it in the dictionary. It keeps the durative vowel change on the suffix <á:-ablaut>, so there is a morphological note: causative durative and diminutive continuative. The literal meaning is “fooling someone a little for a while”.

These sample entries do not show examples of every abbreviation or type of information or type of entry, but give an idea how entries are constructed and what to get out of them. To interpret the rest of the entries check out the abbreviations given later in this introduction. They show best the types of other information that can be found in various entries, and the lists can be used to look up all abbreviations. Sometimes there are entries which have words from related languages. These are given because they are cognates or words that are related to the word in Halq’eméylem and in most cases to cognate words in other sister Salish languages; linguists can follow the sound correspondences within such cognate sets and reconstruct what the word looked like in the parent language, either Proto-Central Salish or Proto-Salish for example—both are ancestors of Halq’eméylem. These cognate words are similar in shape and in meaning and follow regular sound shifts or correspondences between sister languages. They also often help us to see what the meaning of the root is or was in Halq’eméylem and confirm the spelling of the word in Halq’eméylem. For example if Squamish, Lushootseed and Nooksack have q’ in the word and the Halq’eméylem speakers have some variation between <q’> and <qw’>, the cognates help to show that the <q’> is probably the correct sound in spelling the word and <qw’> is a recent or older variant.

The English-to-Halq’eméylem portion of this dictionary is much simpler to use. Here is a brief example. This whole portion of the dictionary is in 10-point type instead of 11-point to maintain the original headers provided by the sorting program. The English is on the left, but all the variant meanings of the Halq’eméylem word are also given to show all the allophones and the range of meaning of each
word, affix or idiom. After these allosemes, the word itself in Stó:lō orthography appears after two colons (::). Where the main entry of the word is under a root, that is shown after a < (comes from) sign.

About the language
Halkomelem is an endangered Central Salish language of the Pacific Northwest (B.C. and Washington) with dialects of Upriver, Downriver, and Island Halkomelem (Elmendorf and Suttles 1960 discusses the differences between dialects as do Hill-Tout 1902 and 1904, Duff 1952, and Kava 1972). Each dialect had subdialects, and for Upriver and Island some of these remain. Gerdts (1977, 1996, 1997, and 1999 for ex.) describes some of the subdialect differences. Island Halkomelem was and is spoken on Vancouver Island from Malahat to Nanoose. Downriver Halkomelem was spoken in the downriver end of the Fraser Valley, from Vancouver to Matsqui; there are still several first language speakers of the Musqueam subdialect in Vancouver, but the last first language speaker of the Matsqui subdialect (a member of the Nooksack tribe, Alice Hunt) passed away June 2004 in Washington. Upriver Halkomelem was and is spoken between Abbotsford and Yale, B.C. and by a few speakers in Whatcom Co., Washington, members of the Nooksack Tribe there.

There are probably less than six fluent elders left who spoke Upriver Halkomelem as their first language; the same is true of Downriver Halkomelem, but the situation is somewhat better for Island
Halkomelem with probably about 50 such speakers left. Fortunately, for all three dialects, English speaking tribal members have been actively trying to learn and revive the language with the help of five or six linguists and the remaining fluent elders, and there are now some moderately fluent speakers of each. A group of about eight students, three or four years ago, finished a three-year language immersion course in Upriver Halkomelem, and there is a similar number of graduates from an earlier three-year sequence of courses given through Simon Fraser University extensions. The Stó:lō Shxwélí language department, at the Stó:lō Nation, have given classes from pre-school to adult for 15 to 20 years and for at least 10 years have also used increasingly sophisticated computer lessons which have also been developed (by Dr. Strang Burton); from about 2002 similar work has been done for Upriver Halkomelem by the Nooksack Tribe (coordinated by Catalina Renteria (a graduate of the Simon Fraser University extension program) and now for the Nooksack language by George Adams). Similar efforts have shown good success for Musqueam and Cowichan. The dialects are sufficiently different that separate full grammars have been written for them (Leslie 1979, and Hukari, In preparation for Island or Cowichan; Suttles 2004 for Musqueam (Downriver Halkomelem), and for Upriver Halkomelem (including Chilliwack, Chehalis, Pilaltxw, Sumas, and Tait subdialects) Galloway 1977a and 1993a (for people with linguistic training) and Galloway 1980a (for those without linguistic training). There are also separate dictionaries either done or being completed for each, also based on original fieldwork (Hukari and Peters 1996, and Gerdt, Compton, Edwards, Thorne, & Ulrich 1997), Suttles posthumous, in preparation by Gerdt, and the present work by Galloway).

The Upriver Halkomelem subdialects share certain phonological, morphological, syntactic, and lexical features which allow them to be considered as a unit in contrast to Downriver and Island dialects of Halkomelem. Within the Upriver area are the Chilliwack, Chehalis, Pilaltxw, Sumas, and Tait subdialects. I believe Tait includes speakers native to the following areas: Yale, Hope-Katz, Seabird Island, and Laidlaw-Cheam; Chehalis includes Chehalis and Scowlitz; Chilliwack River includes Chilliwack Landing-Rosedale (Pilaltxw), Sardis-Tzeachten, and Soowahlie-Cultus Lake (Pilaltxw includes Chilliwack Landing-Rosedale and is often considered part of the Chilliwack subdialect). In the Nooksack-Everson-Deming area of Washington, some members of the Nooksack Tribe speak the Chilliwack River dialect (Sardis-Tzeachten), and some speak a dialect more downriver (Kilgard-Sumas and Matsqui microdialects); these last two microdialects probably form a single subdialect and seem to have some distinctive linguistic features of both Upriver and Downriver dialects. With the establishment of an ethnic curriculum and a writing system, the upriver people now refer to themselves and the downriver people in writing as the Stó:lō and politically all those except the Musqueam as the Stó:lō Nation, though in fact some reserves opt in and out of the Stó:lō Nation politically, and the more downriver groups are not politically part of the Stó:lō Nation. Linguistically, Upriver Halkomelem, Downriver Halkomelem, and Island Halkomelem will refer to the groupings of dialects.

I began work on the language in August 1970 with Mrs. Amy (Lorenzetto) (Commodore) Cooper on the Soowahlie Reserve near Vedder Crossing. I worked with her each summer (or fall) in 1970, 1971, 1972, and 1973, funded by the Survey of California and Other Indian Languages at the University of California, Berkeley. My thesis supervisor was Mary Haas. In 1972 I had only a week in the area but met the Stalo Heritage Project's Elders Group (a group of most of the fluent speakers of Upriver Halkomelem who spoke it as a first language) and worked with the group and with some individual elders twice. In 1973, Amy and I worked together from August to December; during that period, on several occasions, I also visited Mrs. Mary Charles of Seabird Island and with Mrs. Cecilia Thomas of Seabird Island (near Agassiz), who was able to tell me a number of stories in Halkomelem. I also met with Mrs. Nancy Phillips of Chehalis (on Harrison River), who was teaching the language in the Chehalis Reserve federally-funded elementary school.

Amy, her husband Albert, and I also made a trip to Yale and visited with Mrs. Margaret Emory of...
Yale, who spoke only Halkomelem and Thompson. At the end of the year (Dec. 1973), I gave a speech in Halkomelem at a large spirit dance at Tzeachten; the speech was in honor of chief Richie Malloway, who put on the dance, and it also encouraged the preservation and revival of the language. I constructed the speech in Halq’eméylem, then Amy corrected my grammar in the speech and gave me stylistic pointers. Amy was good to work with—patient, diligent, always willing to work, and always willing to travel with me to visit others. She would even call people up (for ex. Elizabeth Herrling and Joe Lorenzetto) to track down particular words she could not remember. In 1974 I self-funded a short trip and was also hired by the Nooksack Tribe in Deming, Wash. to work with their Halkomelem Workshop, which had about 15 fluent speakers of Upriver Halkomelem and the last fluent speaker of Nooksack.

In 1974 I applied to the newly started Coqualeetza Education Training Centre in Sardis, B.C. to set up a Halkomelem program for them, develop a writing system, classes, train teachers, and train an elder to replace me to head the program. I was hired and moved to Chilliwack in Jan. 1975. Working with both the Elders Group and the Nooksack Tribe’s Halkomelem Workshop, as well as a full-time research assistant elder, through daily and weekly field work plus card files from my work with Amy Cooper (which I began in 1970), we amassed a dictionary card file of 15,000 cards of Halkomelem words with example sentences. Through several grants at different times Coqualeetza was able to employ Wilfred Charlie, Mrs. Tillie Gutierrez, Mrs. Edna Bobb, and Mrs. Amelia Douglas to help with language research and file-slipping. Tillie is and Amelia was fluent in the Tait dialect; Edna was fluent in the Chehalis dialect; and Wilfred knew a little of the Chilliwack (Sardis) dialect. Edna and I, especially, worked together from November 1975 to October 1976. As a result, I elicited, transcribed, and analyzed and she file-slipped several thousand Chehalis forms from her, as well as all the forms from the weekly elders’ meetings since 1975; we also transcribed a number of songs and stories. Wilfred, Edna, and Amelia also helped me transcribe some tapes of elders’ meetings going back to 1972, though many remain to be transcribed (I understand Elizabeth Phillips has since done those). Amelia and I worked together from May to September 1978 and from November 1979 to July 1980, obtaining several thousand Tait forms and transcribing more songs, conversations, and stories. We made a copy of this whole set of file cards before I left the program in the hands of Mrs. Amelia Douglas, one of the graduates of the three Halkomelem Teacher Training courses for elders (Beginning, Intermediate and Advanced, abbreviated as BHTTC, IHTTC, and AHTTC). These courses taught literacy, curriculum development, phonics, grammatical structure, and also were occasions for transcribing a great many new words for the dictionary in the process. Galloway (1979a, 1988b, 2001b, 2002a and 2007a have accounts of this program and the Nooksack program in some detail.

From 1978 to 1982 I worked with Ralph Maud and Marie Weeden to transcribe and annotate all of the 50 tapes Marie’s father Oliver Wells had recorded with speakers of Upriver Halkomelem (Maud, Galloway & Weeden 1978-1982), and good portions of the transcripts are published in Maud, Galloway and Weeden 1987. Mrs. Edna Bobb, my elder research assistant during this period, helped me transcribe and translate difficult recorded passages of Halkomelem. Thus, a number of speakers who were already dead when I began my work (Dan Milo, Bob Joe, Albert Louie, Harry Edwards, Mrs. Margaret Jim, and others) have contributed their knowledge to this dictionary; all their recorded words are in this dictionary, as well.

In 1984 I received a grant from the National Endowment for the Humanities to compile an Upriver Halkomelem dictionary and enter data towards a Nooksack language dictionary, learning how to enter and sort the data on computers with Dr. Bob Hsu of the University of Hawaii. Dr. Laurence Thompson and his wife, Terry, as well as Dr. Thom Hess and Vi Hilbert (táq’šíblu) had been working on similar projects for the Thompson and Lushootseed languages, respectively. I learned the basics and a little programming in Hawaii, with their help, and thanks also to linguists at the University of Washington I was able to get started on the mainframe there. Thanks to Dr. Tim Montler and Pam Cahn, who assisted in the computer programming on the mainland and helped me progress from entering data on a Terak
computer (before p.c.’s) and sorting it on the mainframe, to converting everything to a p.c. and updated programs. Thanks also to Bob Hsu who, having retired to Seattle with his wife Pam Cahn, continued working with me through the final sorts, and formatting programs to convert the results from DOS to WordPerfect 4, then WordPerfect 8, the dictionary reached a stage where it was ready for final proofing and editing. Having gotten a professorship in 1988 at Saskatchewan Indian Federated College (now First Nations University of Canada in Regina, Saskatchewan), complicated matters a bit, leaving less time for editing. In 1991 the English-to-Halkomelem sort was done. As I got to stages where the whole thing was printed out, I made copies available to the Stó:lô Shxwéleí for use in classes from 1999 on. In summer 2002, the Nooksack Tribe funded recording of the English-to-Halq’eméylem portion with Mrs. Elizabeth Phillips, on digital camera. Much editing is required to get those files into shape for a CD. The 2004 edition was the first copy completely printed in WordPerfect. I gave copies of that print-out to the both the Stó:lô Shxwéleí and the Nooksack language department. Bob Hsu’s Lexware program, his cross-referencing program, and formatting program, which he taught me to use and helped me program, debug, and fine-tune for Halq’eméylem, have produced a dictionary I am satisfied with and have allowed me to search for and correct inconsistencies, formatting errors caused by inconsistent data entry, etc. Galloway 1984c, 1985a, 1985b, 1986d, 1987a , 1989c, 1991d, and 1992a describe the use and progress of these programs and my dictionary projects. Thanks also to the Social Sciences and Research Council of Canada for several grants to allow the conversion of all my reel-to-reel and cassette tapes of Halkomelem, Nooksack, Samish, and some of Nakoda to CDs and presentation of these to the Stó:lô Nation Archives, the Nooksack tribe, the Samish tribe, and the First Nations University Indian Languages department, respectively. Thanks also to my research assistants, Mary Wilde, Darren Okemaysim, and Sonja van Eijk, who computerized all the Nooksack data and Sonja who converted all the tapes to CD’s, allowing the start of the revival of the Nooksack language and the Samish language.

About the elders

A dictionary of this scope would not have been possible without the wonderful knowledge, help, and good humor of the elders I was able to work with on both sides of the border and the elders who contributed information to earlier linguists before I began my studies (for ex. “Captain John” Sualis of Soowahlie who worked with Charles Hill-Tout ca 1900-1902; Amy Cooper lived with Captain John when she married his son Commodore). Galloway 1980 and 1993 both have photos of most (if not all) of the elders whose knowledge contributed to this dictionary; Maud, Galloway and Weeden 1987 has photos of those elders whom Oliver Wells recorded, whose knowledge also contributed to this dictionary.

What follows are several lists of elders I worked with or transcribed tapes of: 1) alphabetically by last name with their affiliations and Indian names, 2) a compilation, organized by subdialect, of which elders spoke which subdialects of Halq’eméylem, 3) a list alphabetized by abbreviations used for them, abbreviations used (basically their first initial and last initial), and 4) a list of all the sister languages of Halkomelem, classified into branches and showing their dialects and the abbreviations used for their names in this dictionary and in the field of Salishan linguistics in general.

Then follows a brief technical section for those trained in linguistics on how to use the dictionary. After that, follows a list of abbreviations for each different type of information, then a list of syntactic abbreviations used in the syntactic analysis sections of each entry. After that is a section giving a key to convert from the Stó:lô writing system or orthography to the IPA. Finally is a bibliography of the references used (plus a few referred to but not actually seen by me on Downriver and Island Halkomelem).

(AL), Ben James (some Chill.) (BJ2), Bill Roberts (BR), Esther Fidele (also some Nooksack)(EF), Elizabeth Herrling* (EH), Flossie Joe (FJ), Joe Louie, John Wallace, Soowahlie (JW), Louisa George, (also Skagit & Nooksack)(LG), Martha Cline (MC), Mabel Hicks (MH), Mabel Peters some Chilliwack and Downriver, Olive ("Ollie") Williams (dau. of AC)(OW), Shirley (Julian) Norris, (also Cowichan & some Chehalis) (SN), Wilfred Charlie, some Chilliwack, late of Scowkale, Martha Castillo* (Nooksack Tribe), Francis Kelly of Soowahlie, Tillie Bordon late of Chilliwack (TB).

Chehalis dialect:  Ed Leon, Sr., Chehalis (EL); Mrs. Dolly Felix, Scowlitz, late of Chehalis (DF); Hank Pennier, Scowlitz (HP) and wife Mrs. Maggie Pennier, formerly from Chehalis (MP1); Mrs. Lizzie Johnson, late of Seabird Island (LJ2); Mrs. Edna Bobb, Chehalis, late of Seabird Island (EB); Mrs. Teresa Michell, Chehalis, late of Cheam Reserve (TM); Mrs. Philomena Kelly, Deroche (PK), Adeline Lorenzetto, Ohamil (AL), Albert Phillips, Chehalis (AP), Alice Point, Chehalis, Rosaleen George (RG), Seraphine Dick, Scowlitz (SD).

Tait dialect:  Mrs. Cecilia Thomas, Cheam, late of Seabird Island (CT); her husband Henry Thomas, Cheam, late of Seabird Island (HT); Mrs. Susan (Josh) Peters, Union Bar, late of Chehalis Island (SP); Mrs. Amelia Douglas, American Bar, late of Cheam Reserve #2 (AD); Mrs. Tillie Gutierrez* and husband Al Gutierrez, both of Katz (TG, AG); Mrs. Agnes Kelly, Laidlaw (AK); Joe Lorenzetto, Laidlaw, late of Boston Bar (JL); Mrs. Mary Peters, American Bar, late of Chilliwack (MP2); Mrs. Philomena Seymour, late of Seabird Island (PS2); Mrs. Maggie Emery, Yale (ME); Stanley Jones, Laidlaw, some Tait (SJ2); tapes of Mrs. Margaret Jim, Laidlaw (MJ), Adeline Lorenzetto, Ohamil (AL), Edmund Joe Peters (husband of Mary Peters), Skw’álets (EJP), Elizabeth Phillips* (also some Chehalis) (EP), Harry Edwards, Cheam (HE), Mrs. Lena Hope, Spuzzum (also Thompson, some Tait
Sumas/Kilgard dialect: Mrs. Jeanne Silver, Kilgard (JS); Peter "Speedy" Bolan (PB); Mrs. Ella (Cline) Reid, Kilgard, late of Everson (ER); Mrs. Alice (Cline) Hunt, Matsqui, of Everson, late of Bellingham (AH), Ed Kelly Sr. (EK), Delphine Kelly (DK).

Downriver Halkomelem dialects: GC George Cline, Matqui (GC), Norma Cline, Matsqui, Alice Hunt some Chilliwack (AH), perhaps Matilda Sampson, also some Lummi, Mandy Charnley, Katzie, Evangeline Pete, some Katzie, some Tait.

All those in the dialect list above but RM, DM, and BJ are or were members of the Coqualeetza Elders Group (more recently the Stó:lô Elders Group) or the Halkomelem Workshop at Deming. All of those listed were or are fluent speakers (except where “some” appears before the dialect), but this is not a complete list of the members of the two groups, nor of all the fluent speakers. It is a list of those from whom I have had specific forms or with whom I have had interviews. MP2 and her sister ME spoke Halkomelem and Thompson but little or no English. MJ spoke only Halkomelem and no English. Only those with asterisks by the names in the list above were still alive in 2008.

Elders’ names by abbreviations in dictionary
AC Amy Cooper
AD Amelia Douglas

Abbreviations of related Salish languages and dialects cited in the dictionary
(where no abbreviation was used in dictionary none is given here)
I Bella Coola Division
1) Bella Coola (BC)
II Central [Coast] Division (Central Salish)
2) Comox (Cx) (Island Comox [ICx], Mainland Comox [MCx])
3) Pentlatch (Pt)
4) Sechelt (Se)
5) Squamish (Sq)
6) Halkomelem (Hk) (3 dialect groups listed below)
a) Upriver Halkomelem (UHk) (Chilliwack [Chill., Chehalis [Cheh.], Tait)
b) Downriver Halkomelem (DHk) (Musqueam [Ms], Kwantlen, Katzie)
c) Island Halkomelem (IHk) (Nanaimo, Chemainus, Cowichan [Cw])
7) Nooksack (Nk)
8) Northern Straits (Saanich [Sn or Saan], Sooke [So], Songish [Sg], Lummi [Lm], Samish [Sm or Sam] [with subdialects Sma Samish-a [Suttles], Smb Samish-b) (Galloway), Semiahmoo)
9) Southern Straits (SSt) = Clallam or Klallam (Cl)
10) Lushootseed [Puget (Sound) Salish] (Ld) (Northern incl. Skagit, etc., Southern)
11) Twana (Tw)
III Tsamosan [Olympic] Division
12) Quinault (Quets, Quinault)
13) Lower Chehalis
14) Upper Chehalis
15) Cowlitz
IV Oregon Division
16) Tillamook (Tillamook, Siletz)
V Interior Division
A) Northern
17) Lilooet [St’át’imcets] (Lill.) (Upper [Lilooet-Fountain], Lower [Mount Currie-Douglas])
18) Shuswap (Sh) (Western, Eastern)
19) Thompson
B) Southern
20) Colville-Okanagan (Ok) (Northern, Southern)
21) Columbian (Cb)
22) Spokane-Kalispel-Flathead (Spokane, Kalispel, Flathead [“Selish”])
23) Coeur d’Alene (Cd)
How to Use the Dictionary (an introduction for those with linguistic training)

The Quick-Start section in the beginning of this introduction shows how to use the dictionary, how it is set up, and gives some simple and complex examples of entries and how to read and use them. It is written for those wishing to use the dictionary who aren’t linguists. A few more details are given here in technical language for linguists.

The Halq'eméylem-to-English section is a root dictionary, with cross-references to show each word and which root it has (where more information is given about that word). All affixes are also given with examples of words in which they occur. I have tried to discover the root of every word, but some resist further analysis (unanalyzed stems). Cognates have assisted with this derivation.

Each headword (or entry) begins with a transcription of the word in the Stó:lô orthography, which I developed in 1975 from slight modifications of the Bouchard orthography. Then the morphological category (abbreviation in table below) come next. IPA transcriptions, morphophonemic (with all affixes segmented), then sometimes phonemic and/or phonetic transcriptions, where notable, follow next. All variant meanings are given (allophones) and semantic domains and subdomains are given for each in all-caps; these domains and subdomains also provide the semantic environment of allophones of surrounding words in the sentence or nearby text or conversation, which help speakers and learners to predict which allophone is most likely for each word. Full information is given about any dialect limitations of forms or variants. The source of each word (the speaker or speakers) is given for each word and example sentence. Most entries have example sentences obtained in linguistic field-work. I have not included any forms I have made up, except for a handful (less than 15) which have been verified by named speakers. Other sources are given for words obtained by earlier linguists from Gibbs (1858-1863) to as late as data from Su Urbanczyk in 2002. Cognates have been found for a huge number of words and are given; many were obtained from the work of Aert Kuipers and others before his published Salish Etymological Dictionary. I have not rechecked all those, but obtained many from other published sources or the linguists themselves by personal correspondence in the 1970's.

There is a wide range of phonological processes, morphological comments, syntactic comments, and semantic comments, the latter including cultural information. The morphological and syntactic categories of each word are given as well. Since the Proto-Central Salish stative prefix /as-/ has become /s-/ in Upriver Halkomelem, and since the nominalizer /s=| has the same shape, there are a huge number of words beginning with <s> (angle brackets enclose graphemes). I have put them all under their roots but have also cross-referenced them all under the letter <s>. The nominalizer <shxw=|> also has many words cross-referenced to the roots where the words are found in more detail. A similar process was followed with all other words with prefixes. Scientific names are given for all flora and fauna (based on earlier work I did and aided by work on other languages by Nancy Turner, Randy Bouchard, Dorothy Kennedy, and others, see References).

There is an extensive English-to-Halkomelem section after the Halkomelem-to-English section just discussed; it is a finder-list or index (some 667 pages or so) for looking up each meaning of each morpheme, affix, word, and idiom. Thus it doesn’t have detail on the analysis of the Halkomelem forms except to list what root or stem they may be found under; since they are cross-referenced one can just look up the word directly in the first section of the dictionary to find the root where more information is given.

The Halq'eméylem-to-English section is arranged in alphabetical order by the Stó:lô or Halq'eméylem orthography (a, ch, ch', e, h, i, k, k', kw, kw', l, lh, m, n, o, ò, p, p', q, q', qw, qw', R (reduplication), s, sh, t, t', th, th', tl', ts, ts', u, w, x, xw, x, xw, y, '). I have found the articulatory order used in dictionaries by some Dutch linguists to be more difficult to use myself, and it would require additional linguistic training for beginning students of the language who have not yet studied linguistics. Angle brackets (for graphemes) show that an entry or example is in the Halq'eméylem orthography. Square brackets enclose phonetic transcriptions, single slashes enclose phonemic transcriptions, double
slashes enclose segmented morphophonemic transcriptions and allomorphs—all of these are in the
International Phonetic Alphabet or IPA. Violin brackets sometimes enclose morphemes. Square brackets
with single quotes enclose allophones, the semantically similar, variant meanings of a morpheme, word, or
idiom which are predictable in degree of likelihood from the semantic environment (especially from
matching subdomains of the allophones) of the surrounding words, sentences, or speech event and shared
culture and other shared information between speaker and hearer. Slashes with single quotes enclose
sememes (shortened summaries or lists of all or the most common meanings of a morpheme, word, or
idiom). Each sememe (as in the work of Bloomfield and Nida separately) is the sum total of all the
allophones or variant meanings of a morpheme, word, or idiom. Double slashes plus single quotes enclose
morphosemantic transcriptions (which show alternations of sememes, much as double slashes alone show
alternations of phonemes). These levels and notations are discussed in my work on Three-Dimensional
Semantics (for ex. Galloway 1971, 1977a, 1987b, 1989b, c, d, 1992a, 1993a, b, c), more recently called

The types of information included in the Halq'eméylem-to-English portion are included in the
following order:
1) roots, affixes, or words in the orthography;
2) after some affixes come the International Phonetic Alphabet (Americanist) phonemic transcription,
3) second in the other entries is the morphemic class (abbreviated) of the head entry (free root, da =
derivational affix, ia = inflectional affix, iecs = indirect effect control stem, etc., see below for list with all
these);
4) the semantic domain or subdomain of the first allophone (in all caps, abbreviated in most cases, PRON
= PRONOUNS, ABDF = ANIMAL BODY DYSFUNCTIONS, SPRD = SPIRIT DANCING, etc., see
below for a complete list);
5) the allophone or sememe transcription of the first meaning of the entry;
6) sometimes another domain or subdomain name where the allophone has membership in more than one
domain (domain names show the semantic context which makes the allophone most likely in that context);
7) where there are allophones in different domains the new domain name is next followed by the allophone;
8) a phonetic or phonological comment, if any;
9) morphological comment, if any;
10) syntactic comment, if any;
11) other sources of this word or affix in any dialect of Halkomelem;
12) cognates in related languages (with abbreviated language name, IPA transcription, abbreviation of
source for this word)
13) dialect variants, if any, with initials of the elders or elders groups which attested the entry (for ex.,
AC = Mrs. Amy Cooper; IHTTC = Intermediate Halq'eméylem Teacher Training Course with ten elders,
etc., see lists above);
14) examples of the morpheme (in words or sentences) or examples of the word (in phrases or sentences,
whenever available, first in the Halq'eméylem orthography, then in the IPA (Americanist) transcription;
15) the translation of the word, phrase or sentence;
16) the initials of the elder or elder's group that attested the word, phrase, or sentence;
17) after the root entries are complete, next come derivations of the root, with the 16 types of information
just listed for roots listed for each derivation, each derivation is indented once from the entry it derives
from;
18) next come derivations of the previous derivation with information in the same order—if there are no
such subderivations then the next derivation from the root or word follows.

The following is a list of abbreviations used for all semantic domains and subdomains and other
abbreviations (in all cases these were labels for particular types of information). All abbreviations in all-
capital letters are for information in English; most are domain or subdomain names. All abbreviations in
all-small letters have information in Halq'eméylem. A number of these abbreviations have been replaced by the full terms throughout the dictionary. Although this may add a few pages, it makes the dictionary much easier to use; a dictionary where every other term has to be looked up in charts of abbreviations is difficult to use. Since the language is so endangered, I hope it will be used extensively by learners and teachers, so ease of use is crucial if the language is to survive. Even if the dictionary can’t be used all the time by learners, it will hopefully serve to document and preserve the large amount of knowledge the elders have passed on here.

**Labels used for each different type of information (fields or bands, Band labels)**

Spelling and orthography

The Key below gives the International Phonetic Alphabet (Americanist) equivalents for each symbol in the Stó:lō orthography. Orthographic symbols which are made up of two or three characters (digraphs and trigraphs resp.) are always pronounced as a single sound, a unit and almost never occur as clusters to two or more sounds. When they do (as in éts-’ets stutter), a hyphen separates them. Notice that the writing system is phonemic in almost every case. Only /c/ and /s/ have allophones which are written differently from each other in the Stó:lō orthography.
Key to the Official Orthography of Upriver Halkomelem

Galloway: Upriver Halkomelem Dictionary

Halkomelem to English

A

<á>, free root //?á ~ ʔá\], TIME ['recent past tense'], phonology: free variation, free variant: <é>, //ʔá\], syntactic comment: subject pronouns are suffixed to this verb to form ambiguous past, example: <ást álhtel>, //ʔá-ct ʔéliel\], 'I/we ate!', attested by AC, <échp mókw' álhtel cheláqelh(eln)>, //ʔá-c ép mók⁻ ʔéliel c¿éq¿(e³)\], 'you all ate yesterday!', <étél lhíts>], //ʔá-cél hi\c\], 'I got cut!', <ét'wóth lám>, //ʔé-t'we\-wèl liém\], 'he must have gone' (grammatical analysis: t'we must, I guess, evidential; -welh already), <átsel tofi\l>\], //ʔá-cél tá-[C,ʔè]-l=í-[l,ʔ]ll, 'I used to think!', syntactic analysis: auxiliary verb, attested by AC.

<á\-, (-á\]), MOOD ['interrogative'], phonology: combination of -e interrogative with e at end of preceding morpheme (by regular morphophonemic rule, e-e → á or //ʔè\-// → é), vowel merger, syntactic analysis: interrogative affix; found in <ówá:ta>, //ʔéwé-ʔé-tèll, 'is it none?, is it nobody?, didn't anybody?!', <léwá\-, Lópet>, //ʔéwè-ʔé, lápèll, 'Is it you, Robert?'.

<á\-, //\é\-, TIME ['later'], usage: found in the speech of a few older monolinguals as well as that of SP, prob. archaic, phonology: appears as a suffix though not a tense suffix, syntactic comment: semantically similar to the class of adverbial particles and used like them but suffixed unlike them, syntactic analysis: suffixed adverbial particle, dialects: Tait only so far, attested by SP, MP, MJ (Mrs. August Jim); found in <maythomésta\>, //mèy=ʔamé-çát-èll, 'we'll help you later!' (grammatical analysis: root -purposeful control transitivizer-2so-1ps-adverbial particle), attested by SP.

<á\-, da //\é\-, QUAL ['overly ?'], MOOD, syntactic analysis: lexical suffix, derivational suffix; found in <kw'esá\>, //k"ès=è-\], 'overheated!', (contrast <kw'ó:kw'es> hot, contrast <kw'éz> get burned), perhaps <selá\-, //sèl=è: (but more likely that is s=h=ıl=\], 'tight!' (contrast possibly <sí:l= ~ sel> spin).

<á ~ -á\>, ia & fr //~e(ʔ) ~ ʔè\], PRON /your (sg.), second person sg. possessive pronoun, second person sg. subordinate subject pronoun\], syntactic analysis: affixed to the word (usu. demonstrative article) which precedes the nominal possessed or verb subordinated, syntactic analysis: possessive pronoun affix, dialects: Sumas, Tait, and Cheh. speakers seem to prefer -a', Chill. speakers seem to prefer -a, see dialect form <-a (Chill.)>, also <a>, //\é\- occurs sentence initial or following li interrogative or li or i verbal auxiliaries or tió that's, and in some other constructions, -a() occurs elsewhere, also <á\-, //\é\-, dialects: Chill., example: <li a stl'kw'é tè\>, //li òè s=è'i k"è tù\], 'do you want some tea?' (grammatical analysis: yes-no question your want some tea), <t(a) mál>\], //l=ɛ(ʔ) mè\]-\], 'your father!', <tha\-) tá\l\], //ɛ(ʔ) tè\]-\], 'your mother!', <tl'ó a swá\>, //è'á òè swè\]-\], 'that's yours!', <skw'áy kw'a\')s kw'étslexw>, //ls=k"è y k"-ɛ(ʔ)-s k"èc=l-ɛ\]-\], 'you can't see it!', literally 'it's impossible that you see it' (syntactic analysis: nominal.-impossible demonstrative article-possessive pronoun affix-nominal/subord. see-non-control transitivizer-3o), <li a sqvá:lewél kws xwe'ístís wáy:ele\>, //li òè s=qèl=ɛwèl k"è-s x"è=òli-s wèy:èl=ò=ıll, 'Do you think they'll come tomorrow?!', literally 'is it your thought that they arrive tomorrow?', attested by AC.
<a-elep ~ a'-elep>, (/=e-əl-əp ~ =e?-əl-əp/), PRON /'your (pl.), you folks's, second person plural possessive pronoun, second person plural subordinate subject/!, (the <e-el> portion is probably the same as the infix =e<el> plural), syntactic analysis: is, syntactic comment: also used as subordinate subject by possessing a nominalized clause, the -a is suffixed to the first element of the nominal phrase or clause (usually the demonstrative article) and the -elep is suffixed to the next word in the clause or phrase, example: <ta má-lelep>, /'a-əl-mə-lə-gəl/, /'you folks's father'/, <a' st'l' yelep kw'a's lámelep./, //=e?-i-y-əl-əp kʷʷ-ə?-l-ə-l=ə-m-əl-əp//, /'You folks want to go.'!, literally /'(it) is you folks' want that you folks go.'/.

<ahíw>, free root //?=híw/ll, DIR /'(be) upstream, east (in some contexts)/!, semantic environment ['going east for a speaker anywhere on the Fraser River from Vancouver, B.C. to about Laidlaw, B.C., since the river flows east to west on this stretch'], syntactic analysis: adverb/adverbial verb, also <ehí():w>, //?=hí(·)w// in faster speech, example: <lámi kw'e ahíw>, //=ləm kʷʷ-ə?=híw//, /'he's going upstream'/, attested by EB, <lámsel kw'e ehíw>!, //=ləm=c-eə kʷʷ?=hí-w//, /'I'm going east.'/, attested by EB.

<xwehíwel>, incs //xʷə?=híw=əl//, DIR ['go upstream'], literally /'get=upstream=go'/, (<xwe>= get, become), (<e-el> go, come), syntactic analysis: intransitive verb, adverb/adverbial verb.

<ák'>, free root //?=k//ll, probably /'cute.'/, EFAM, usage: expression when playing with a baby and the baby is cute, phonology: diminutive fronting (yielding k'), syntactic analysis: interjection, dialects: Tait; unknown whether in other dialects, attested by AD.

<ákwelx>, HUNT [''shooting'], see kwél.

<á-l>, is, /-əl/ll, PRON ['first person singular subjunctive subject'], syntactic comment: can be suffixed to forms prefixed with <we-> when, if or to the first subordinate verb after a negative verb, can also add the when/if meaning even without the we- prefix being present, also <í->, /-í/ll after auxiliary verbs ending in i (i.e., mi, lihí); as in <welamál>, //=wə-əl=əm-əl//ll, /'if/when I go!/, phonology: downstepping, example: <yóswe welamál>, //=yə-swe we-əl=əm-əl//ll, /'I might go., I don't know if I could go.'/, <éwetsel lámál>, //=wə-c-eə l=ə=əm-əl//ll, /'I don't go., I won't go.'/, <cheww maythox kw'els ewe líyemál>, //c-eəx- mey=í=ək-xʷ-əl-s əwə-əli=əm-əl//ll, /'You helped me not to laugh.'/, <éwetsel lí: lám/ll.//?=wə-c-eə lí-1 l=ə=əm//=l, /'I didn't/don't go.'/.

<ál>, bound root, /?=q'=w/ll, root could mean pole/shaft/length
<ś'álem>, dnom //=ś?álem/ll, [ś?álem], FSH ['spear, shaft (of spear/harpoon/gaff-hook), gaff-hook pole'], HUNT /'spear, shaft of spear'/, (s= nominalizer), probably root <ś'al> pole/shaft/length?, possibly <em> place to have/get, syntactic analysis: nominal, attested by BHTTC, (compare with <ś'alšat> bottom of a tree, trunk of a tree with same possible root (=lets 'on the bottom')), also <ś'além>, //=ś?álem//ll, [:ś?álem], dialects: Cheh., attested by EL.

<ś'áleqs ~ s'élqs>, dnom //=ś?e=q=es/=q=es//ll, MC ['point'], (s= nominalizer), probably root <ś'al> pole/shaft/length?, lx <=e=qs> on the nose, on the point, probably <= => derivational, phonology: vowel-reduction, stress-shift, geminate consonant (unusual word finally), syntactic analysis: nominal, attested by DM (Chill.), example: <ś'élqs: te lháts'tel>, //=ś?=e=q=es-s te ə=təl//ll, [ś?e=q=es- te ə=təl], /'point of a knife'/, attested by DM.
"s'alqsel", dnom //=ʔél=qəl/., [ʔ'éłqəl], ANA ['tip or point of one's nose'], LAND ['point of land'], semantic environment ['semantic environments determine which alloseme is selected (those with components of [land] select the second, those with [animate] select the first listed'), (<se> nominalizer), probably root <'ál> pole, shaft, length?, lx =qsel> on the nose, on the point, syntactic analysis: nominal.

"s'álets" dnom //=ʔél=ʔɛc=əl/., EB ['bottom of a tree, trunk of a tree'], (<se> nominalizer, <lets> on the bottom), syntactic analysis: nominal, attested by BHTTC.

"s'alétsmel", dnom //=ʔél=ɛc=məl/., BLDG ['foundation of a house, bottom of a tree'], EB ['bottom of a tree'], (<se> nominalizer), (<mel> part, portion; prob. also =lets on the bottom), syntactic analysis: nominal, attested by BHTTC, also <alétsmel>, //=ʔél=ɛc=məl/, phonology: free variant.

"shxw'álhelh", dnom //sx'=ʔél=ʔɛl/., [sx'=ʔél=ʔɛl], ANA ['front of the neck'], (<sxw=> nominalizer), probably root <'ál> pole/ shaft/ length?, lx =lhelh> (or poss. -lhelh) on the throat, on the front of the neck, syntactic analysis: nominal.

<á:lá ~ ~á:lá ~ ~á:lá ~ ~ela>, da //=ɛ=ɬ ~ =əl/, SH /'container for, receptacle for/', MC, numc, syntactic analysis: lexical suffix, derivational suffix; found in <shxwéyqwala>., /lx=xʷʔə=q=ɛl/., /'firepit'/, literally /'container for burning/', <shxwéʔqelá:lá>, /lx=xʷʔə=q=ɛl/., /'pillow case, container for pillow, pillow'/, literally /'container for rolled thing under head'/., <squelxlá:lá>, //sqel=xʷ=ɛl/., /'throat, gullet'/, literally /'greedy + container'/,

"shxwiymálá<l>, //lx=xʷʔi=ɛm=ɬ/, /'store'/, literally /'nominal + sell + container for/',

CH

<ch>, comment: The Stó:lō orthography uses both <ch> ([ê]) and <ts> ([c]), for two allophones of a single Halkomelem phoneme, /c/. This has the advantage of showing phonetic preferences of the speakers which are difficult to predict purely from environments; in linguistic terms [ê] and [c] are evolving from a state of free variation to conditioned variation (or vice versa)(see Galloway 1993:18-20 for a statement of the environments, dialects, and idiolects conditioning these two sounds). As it happens, few cases of initial <ts> [c] occur except when it is a prefix. Therefore if a reader is looking up a word spelled or sounded with an initial <ts>, he should be sure to check under ch as well, as more speakers may pronounce it with <ch>.

<ch> = da //c=l/, SENS, LT /'stative (with color terms), have/get (elsewhere)/', phonology: since most roots begin with a consonant and there is a phonemic rule that /c/ → [c] <ts> between word boundary and a consonant, this suffix is only rarely found as [ê] <ch>, see main dialect form <ts>.

<cha>, //c=//, [-êæ ~ -êè ~ -êç], TIME ['future tense'], ASM ['not immediate future but after a while; immediate future is expressed by the present non-continuative'], syntactic analysis: is, syntactic comment: this suffix follows all others in a verb; it is word-final; found in <p'ékwha>, //p'ék"-c=//, /'it will float'/, syntactic analysis: intransitive verb, <tl'ócha>, //lê'á-c=//, /'that will be, it will be (him/her/them/that)/', syntactic analysis: demonstrative verb, conjunction, <selchí:mcha>, //sélci-m-c=//, /'how shall it be?, how should it be?'/, syntactic analysis: interrogative verb, example: <lwélecpcha lám>, //lwélecpcha lám, /'lt will be you folks that go./', syntactic analysis: pronominal verb/verbal pronoun, attested by AC, <skw'áytsa kw'els máqles>, //skw'áytsa kw'els máqles, /'skw'áytsa kw'el's máqles'/, grammatical analysis: vneg-future tense auxiliary verb r=non-control tense auxiliary verb=itz, <s=kt=sèy-cè k"=èl-s mél=q=òs/, /'I'll never forget him/her/it/them./', syntactic analysis: nominal phrase minus article, literally /'it's impossible that I forget him/her/it/them'/, phonology: perhaps an old characteristic reduplication, syntactic analysis: adjective/adjectival verb, dialects: Tait only, attested by TG, some
Galloway: Upriver Halkomelem Dictionary, Halkomelem-to-English

others; found in <cháchachexw>, /cɛcɛ-ɛ-ɔ-x"//, "Be tender (mildly urging imperative).,'
, dialects: Tait, example: <cháchá te swíyeq>, /cɛcɛ ɔ=swijɛqəl/, "The man is tender.", also <tståtsa te swíyeq>, dialects: Tait, <cháchá te sqwálewels>, /cɛcɛ ɔ=s=qɛl=əwəl-ɛl/, "He's/She's emotional
(cries easy when happy or sad, etc.),'
, literally I'are tender the his/her thoughts/feelings'/,
(semological comment: one of a series of idioms which combine vaj + dema + sqwálewel).

<čhémq ~ tsémq>, us //cémq/l/, [čémq ~ čm]q]. WETH ['stop blowing (of the wind)'], syntactic analysis: intransitive verb, dialects: Cheh. (Chill. uses liqwe:l get calm), example: //lǐ le čhémq ~ lǐ le tsémq/`, //lǐ lə qmql/, '/Is the wind stopped?'/, <čhémq te spehá:l> `, //cémq tə s=pewnętr/zls/l/, '/The wind has stopped'/, dialects: Cheh. (Chill. uses Liqwe:l te spehá:l The wind has stopped/ , syntactic analysis: historical past tense, <čhémq te spehá:l> `, //lə qmql tə s=pextr/zls/l/, '/The wind stopped'/, (semological comment: note the contrast in past tenses in the last two examples: the ambiguous past with <le> seems here to indicate a more sudden action that the historical past without <le> in the next-to-last example), syntactic analysis: ambiguous past.

<čhew ~ cháw>, bound root //cəw ~ cəwl/, LAND /'beach, shore'/.

<čháchew ~ cháchu>, dnom //cɛ[C=]ɛm=l]w or Cɛ=Cəwll/, LAND /'beach, shore'/, (<=R1> = (may be an old) stative) or more likely <R7>=augmentative, phonology: reduplication, syntactic analysis: nominal, also <tsástə:lo>`, //cɛwll/, dialects: Chill.: AC, other sources: ES //cɛcwll/, JH /cɛ:cu/.

<čhúchu ~ chúchuw ~ chéwche:w>, ds //cɛw=Cɛcɛll/, LAND /'away from the shore, toward the river'/, WATR, (<=R2> = characteristic), phonology: reduplication, syntactic analysis: adverb/advverial verb, example: <lám:ntset kwe cháchu> `, //lɛ=m-c-a(t kə cɛw=Cɛcɛll/, '/We'll go down to the river (near but out of sight)'/, <lám kwe cháchu [qesusa] lhós:>, //lɛ=m kə cɛw=Cɛcɛ [qa=s-ɛs-ɛw] tás:ll/, '/He's going to the river to drift-net.'/.

<Chuchuwá:lets>, dnom //cɛw=Cɛɛ=ɛlɛc (or possibly? Cɛɛ=cɛwɛ=ɛls)/l, PLN /'Fraser River (way out at the end)/, WATR ['mouth of the Fraser River'], phonology: reduplication, attested by Cheh., other source: place name file reference #107, also <Chó:cho:álets>, //cɛcwɛɛ=ɛlɛc/l, [ɛo:ʔɛlɛc], dialects: Sumas.

<chuchuwá:xe:l>, dnom //cɛw=Cɛɛ=ɔɛxɛl/, BLDG ['front end of a house (inside or outside)'], literally /side of a house/building toward the river', lx <áxel> side (of a building, a square, or a river), phonology: reduplication, syntactic analysis: nominal.

<chuchuwó:ythe:l>, ds //cɛw=Cɛɛ=á-yɛxɛl/, WATR ['out in the middle of the river'], literally /toward the river from the lip/edge', lx <á:ythel> on the lip, on the jaw, phonology: reduplication, attested by BHTTC.

<čhewél:hem ~ tséwél:hem ~ tsówél:hem>, mdls //cɛw=ɛ[~]-ɛm=l/, cts, ABFC ['to spawn'], literally /to beach one's offspring/, lx <ɛlɛh> offspring, child, (<=ɛm> = middle voice), syntactic analysis: intransitive verb, dialects: Deming (report meaning as be spawning), example: <čhewél:hem te stθˈo:wi> `, //cɛw=ɛ[~]-ɛm=l/, '/The fish are spawning'/, attested by Deming, also <čhewél:hem>, //cɛw=ɛl-ɛm=l/, ABFC ['to spawn'], dialects: AD, also <čhówél:hem>, //cɛw=ɛl-ɛm=l/, ABFC ['a fish that's going to spawn'], dialects: IHTTC, phonology: the form given here can be analyzed in two ways: AD and the IHTTC speakers here have a weak-grade root with the derivational suffix required to take the stress or there is inflection for the non-continuative form here by stress-shift (less likely). The stress-shift patterns for aspect are reversed from those of the Deming speakers for this word. Another difference between dialects/speakers is that AD and IHTTC speakers reporting
this form have a th /è/ where Deming speakers have ch /c/. The Squamish cognate is /ʔa-è-áltam/ to spawn. Halkomelem ch /c/ corresponds to Squamish /è/ and Halkomelem th /è/ corresponds to Squamish /c/. Unless the Squamish root /áltam/ had an initial /c/ which assimilated to the preceding /è/ prefix, it seems like the Halkomelem form with ch corresponds to the Squamish form.

syntactic analysis: intransitive verb. chichewós, chichewóthel

WATR, (<diminutive

source: place name file reference #22; Wells 1965. beached at the mouth of a river

the Pilalt people

=óthel landed here and that a cat of one ferry once jumped off here), (<semological comment: the English name Katz (Landing) is said to be from the fact that riverboats there a sand bar extends way out (perhaps half a mile) into the Fraser R. in low water'], ASM [‘soon the fishes will spawn.’], grammatical analysis: future tense-already really beach=offspring-one’s own(middle voice) the (remote) nominal-fish[-pl.-][-pl.dim.-?], attested by AD.

<théwelhem>, cts //è[~]-w=óthel//, ABFC [‘spawning (in action when you see them’)], grammatical comment: AD was specific that this was a continuative form; she was correcting a word list entry where it was listed as non-continuative; at the same time she also said that théwelhem should be listed as spawn (non-continuative), attested by AD, syntactic analysis: intransitive verb, also <thówelhem>, //è[~]-w=óthel//, ABFC [‘spawning’], attested by IHTTC.

<chewó:ihlp>, dnom //c[=èC]=w=óthel//, EB [‘black cottonwood tree’], [‘Populus balsamifera trichocarpa’], ASM [‘the sweet cambium, sxâ: meth or ts’its’emâ: welh, was scraped or licked off of the peeled bark and eaten fresh; the cotton from the catkins was gathered and mixed with dog and goat wool to whiten it and make it go further’], literally /many shores tree or little shore tree (so named since it grows mainly on the shores of rivers or lakes)/, (<R6= (here =ew=>) either plural or diminutive), phonology: reduplication, syntactic analysis: nominal, other sources: ES /cèw=óthel//, H/T <tcÈwółp> all cottonwood.

<Chewó:ihlp>, dnom //cèw=óthel//, PLN [‘Cottonwood Beach (in the southern quarter of Harrison Lake)’], ASM [‘located north of Eagle Falls (Walian Creek) and south of Lhó:leqwet’], literally /cottonwood tree, so called because there are lots of cottonwoods here/, syntactic analysis: nominal, attested by EL, other source: place name file reference #117.

<Lex:chewó:ihlp>, dnom //lè=cew=óthel//, PLN [‘village between Yale Creek and Mary Ann Creek on the CP side (west bank of the Fraser R.) where lots of cottonwoods grow/grew (near Yale, B.C.)’], syntactic analysis: nominal, attested by SP, AK, other sources: ES ëwiÈp.

<Chó:thel>, dnom //cèw=ašl//, PLN [‘village at what’s now Katz Reserve, Katz Landing’], literally /beach at the mouth (of a creek)/, ASM [‘so called because at the mouth of a little creek there a sand bar extends way out (perhaps half a mile) into the Fraser R. in low water’], (semological comment: the English name Katz (Landing) is said to be from the fact that riverboats landed here and that a cat of one ferry once jumped off here), (<=óthel> in the mouth), (<metathesis> place name (used to separate it from chewóthel which would be a word meaning beach at the mouth of a river), syntactic analysis: nominal, attested by PDP, SP, others, other source: place name file reference #22; Wells 1965.

<chichewós>, dms //C,=èw=óthel//, LAND [‘sit facing a river and watch it, sit on a riverbank and sunbathe’], WATR, ASM [‘sunbathing is not required according to AD’], (R4= (here chi=) diminutive), Lx <=óṣ> on the face, attested by IHTTC, AD, also <ch’ich’ewós>, df //C,=èw=óthel, cts, ABFC [‘sunning oneself’], phonology: reduplication, attested by IHTTC (8/4/77).

(chichewóthel), dms //C,=èw=óthel//, LAND [‘a little below the mouth of a creek or slough’], WATR, (<R4=> diminutive), (<=óthel> at the mouth), phonology: reduplication, syntactic analysis: nominal (?) or intransitive verb (?)

**CH’**

<ch’>, comment: The Stó:lō orthography uses both ch’ ([ê’]) and ts’ ([c’]), for two allophones of a single
Upriver Halkomelem phoneme, /c’/. ts’ occurs more frequently in initial position than ch’, so for most forms look under ts’ first. Those forms which have a frequent variant in ch’ will also be found here. In Musqueam and Cowichan dialects of Halkomelem Wayne Suttles informs me that both /c/ and /ê/ must be set up as phonemes (Suttles 1982 p.e.), contrary to Elmendorf and Suttles 1960; he did not mention both /c’/ and /ê’/ being required. Kava 1969 and Jones 1976 both give /c/ and /ê/, but Kava has only /c’/ while Jones sets up both /c’/ and /ê’/ (the latter in only one root)., comment: Leslie 1979 has a very brief section on Cowichan phonology with four phonemes here, /c, è, c’, è’/ but derives this analysis from Jones 1976 and Hukari 1977. None of these sources, however, contains a tabulation of the environments in which the four sounds [c, è, c’, è’] occur. Galloway 1977 & 1993 do have such a tabulation and show that for Upriver Halkomelem [c] and [è] are allophones of /c/ and [c’] and [è’] are allophones of /c’/ all predictable in part from the environments in which they occur and in part in free variation.

<ch’á: ~ ts’á:], bound root //c’· on top of/, several derivations from this root are only attested with ts’ pronunciations, all are listed under ts’; those given here show frequent ch’ attestations.

The text contains entries from a dictionary, likely a Halkomelem to English dictionary. It includes entries with phonetic notations, morphological analysis, and syntactic comments. Some entries are marked with abbreviations and symbols, indicating the type of entry and comments about its usage. The text also contains examples from different sources, such as Deming's work. The entries cover various aspects of the language, including imperative forms, negative constructions, and passive verbs, among others. The dictionary provides insights into the grammatical structure and usage of the Halkomelem language.

literally /all-we don't -past learn =happen/manage to -oneself when/if- (there) -you subjunctive what is someone saying?/, attested by AC.

<ewá:lh ~ wá:lh>, //ʔéwə-ə-4/, CJ ['wasn't?, weren't?, didn't?/], ASM, TIME /'weren't ever?, wasn't ever?/, didn't ever?, does s-o ever?, never used to, not going to (but did anyway) [perhaps in the sense of never usually do X but did this time], syntactic analysis: vneg-interrogative affix-past affixed (vneg-interrog.-past), example: <ewá:lhchexw lhí:m>, //ʔéw-é-4-c-ə-xʷ 4í-ml/, /'Weren't you going to pick (fruit/leaves)?/, attested by EB, ASM ['weren't ever?, wasn't ever?, didn't ever?'], <ewá:lhchexw kwáxw stl'ítl'qelh>, //ʔéw-é-4-c-xʷ kʷé-xʷ s=C,i=é əq=ə4l/, /'Weren't you ever a child?/.

ewéta kw'étslexwes te swíyeqe> //ʔéw-é-4 mə kʷé-c=əT-ə4l/, /'Does he ever come to see you?/, syntactic analysis: vneg-interrogative affix-past affixed auxiliary verb see-purposeful control transitivizer-passive2s, attested by EB, (irregular)ewá:lh xà:m, //ʔéw-é-4-4í-ê-ml/, /'Does he ever cry?/', attested by AD, also <ewá:lh xà:m>, //ʔéw-é-4-4í-ê-ml/, attested by EB, <walh me xélh kw'a' sqávelev lhíxw me p'êlh>, //ð(ʔ)éw-é-4-4í-ê-ml/, /He never used to drink./, attested by EB, <éwálhtsel xwálà:m>, //ʔéw-é-4-c-ə-1 əlê-ê-ml/, /I never used to listen., I never listened./, attested by EB, <éwálhtsel xà:m>, //ʔéw-é-4-4í-ê-ml/, /He never cried (cry)./, ASM ['not going to (but did anyway), [perhaps in the sense of: never usually do X but did this time]], <éwálhtsel lámìl>, //ʔéw-é-4-c-ə-1 lë=m-êl/, /I wasn't going to go (but went anyway). [perhaps: I never go (but went anyway).]//, attested by EB, <éwálhtsel mìl alqá:ls kws sálhótl>, //ʔéw-é-4-c-ə-1 mì-l ʔéq=ê-ê-kʷ-s=s=7=4í-êl/, /I wasn't going to buy groceries (but I did).', attested by EB, <éwálhtsel il lámìl>, //ʔéw-é-4-c-ə-1 lì-lêm/ml/, /I wasn't going to go (but I did).', attested by EB, also <éwálhtsel il lámìl>, //c-ə-1 wél ʔéw=ê-4-c-ə-xʷ Il=m/ml/, /I really say no./, ASM ['tell s-o to say no to s-o'].

<ôtwestxw ~ éwestxw>, caus //ʔówə=st-əxʷ ~ ʔówə=st-əxʷ//, LANG /deny it; say no; tell s-o to say no/!

caus: transitive verb, ASM ['deny it'], attested by Elders Meetings 6/16/76, 3/29/78; found in <ôtwestxw̱la>, //ʔówə=st-əxʷ-4í//, /'Deny it.'/, example: <lúw xwel őwestxw>, //c-ə-1 wəl ʔówə=st-əxʷ//, /'He's still denying someone.'/. ASM ['say no'], <tsel well őwestxw>, //c-ə-1 wəl ʔówə=st-əxʷ//, /'I really say no.'/. Elter's comment: "this is correcting the translations deny it and say no given earlier", attested by AD 10/9/79.

<ewá:ta>, cpds //ʔówə=M2=tx//, CJ /'there's none, there's nothing, there's nobody, there's no, be none, be nothing, be nobody/!

Phonology: metathesis or stress-shift, syntactic analysis: vneg, syntactic comment: occupies first position in sentence nearly all the time, even when functioning as a subject or object (in the English translation); it also precedes main verbs directly in sentences though often serving as a subject or object of that verb in English translation; it may be that it originated as te ēwe that which is no (which doesn't seem to occur itself now), but shifted the article and stress when it compounded--thus when it precedes a nominal no article is required and it can serve as a subject or object but occurs in sentence-initial position (since the verbal part is now in front), ASM ['there's none, be none'], <la őwáte tloqá:yəs>, //lə ʔówətə tə=la=qé-yə/ll, /'Now (there's) no more.'/, attested by ME, ASM ['there's nothing, is nothing'], example: <ewá:ta kw'e kw'êtslexwes te swíyeqe>, //ʔéwá:ta kʷə kʷé-c=1-əxʷ-as tə =Swlíyəqə//, /'The man saw (see) nothing., The man didn't see anything.'/, attested by EB, also <ewá:ta kw'êtslexwes te swíyeqe>, //ʔéwá:ta kʷé-c=1-
The man saw nobody.

There's nothing in(side) it.

He/She didn't have anything to eat.'l, attested by Deming, ASM ['there's nobody, be nobody']; found in <ówéta>, /íówéta/, /'There's nobody.'l, semantic environment ['example in reply to a question meaning Is your grandfather in?'], attested by AC, example: <ówéta mác xwe'i'c>, /íówéta má x'=tíll, /'Nobody came.'l, attested by EB.

<lexswxh,wí'tet>, dnom //lx=x=xé=í[t[---]têtwak/, ABFC ['sleepy-head'], EFAM, (<lx=> always, s= nominalizer, xw=x= one who), syntactic analysis: nominal, attested by IHTTC.

<ítetest>, stvi //ítêtwak=x=xel/, ABFC ['sleepy'], <tem> stative, phonology: consonant deletion of same consonant (/lt=x=xl/ → /lt/), syntactic analysis: intransitive verb, attested by AC, AD, others, also <í:tetest>, //ít[---]têtwak=x=xel/, attested by EB, DK (the Kellys); example: <tsel xwel ítetest>, //c-él x=xel têtwak=x=xel/, 'I'm still sleepy.', attested by AD.

<ítetómet>, ncrs //ítêt=êmat=/, ABFC ['fall asleep'], syntactic analysis: intransitive verb; example: <lich(e)xw ítetómet>, //lí c(ê)x x ét=êmat=/, 'Did you fall asleep?'.

<ítetáwtxw>, dnom //ítêt=êwtxw=í, BLDG /'bedroom, hotel', lx <=àwtxw> building, syntactic analysis: nominal, attested by CT, HT, EB, Deming.

<íty>, possible bound root //ít/í/, meaning unknown

<sí'teyylíles>, stvi /í=sí'tey=í=ìlís/=, BSK ['carry a packstrap around the shoulders and across the chest at the collarbone'], CLO, FSH, HARV, HUNT, SOC, TVMO, (<s=> stative), lx <=íles> on the chest, syntactic analysis: intransitive verb, attested by IHTTC.
<íth’a>, bound root //ʔíθ’e/ clothing//.

<íth’a>, //ʃíθ’e//, lx <, CLO /clothing, material//, WV, HHG, syntactic analysis: derivational suffix, also <íth’e>, //ʃíθ’/; found in <papíth’a>, //ʃ/C, =/ɛʃ=ʃíθ’/; //ʃlanetlet, velvet, woolly material, soft material//, root <pápa> woolly, phonology: reduplication, attested by IHTTC, <lhéwíth’a>, //ʃ=ɛ=ʃíθ’/; //ʃawíθ’e/, //’/be naked//, phonology: the vowel change /ɛ/ → /ə/ is a result of the morphophonemic rule that changes vowels in weak-grade or medium-grade roots or affixes to /ə/ in the presence of a stronger-grade root or affix within the word; less likely is the possibility that the vowel change is derivational ablaut, [=A=], root <láw’ab> abandon, escape from, run away from, attested by AC, EB, <lhuwuθ’ám>, //ʃu=ɛ=ʃíθ’/; //ʃoml, //’/take off clothes, (undress)/, phonology: stress shift, also /u/ from /əwl/, attested by EB (compare root <láhaw> abandon, escape from, run away from); found also in <Kw’eq walíth’a – Kw’óq walíth’a>, //ʃ=ɛq=ɛ=ʃíθ’/; //ʃ=θ/; l’Coqualeetza (a place in present day Sardis, B.C.)/, literally /club + ? + clothes; at least two different stories account for the origin of this placename from club//, <lhuwíth’a = lhéwíth’a>, //(AC) ðow=ðíθ’/ – (DM) ðow=ðíθ’/, //’/naked/, <lhuwuθ’ám>, //ðow=ðíθ’/; //’/to undress//, <íth’em>, //ʃíθ’/; //’/get dressed/, <s’íth’em>, //ʃ=ʃíθ’/; //’/clothes, clothing/, <spoleqwalíth’a>, //ʃpalèq=ɛ=ʃíθ’/; //’/corpse, ghost//, literally /probably clothing of the spirit//, <squélolíth’a>, //ʃqθ=ɛ=ʃíθ’/; //’/west wind//, literally possibly /something that dries clothes/.

<íth’em>, mdls //ʔíθ’/ =əm/, //ʔíθ’/; CLO /to dress, get dressed//, (<em> middle voice), syntactic analysis: intransitive verb, also <íth’em>, //ʃíθ’/; attested by AC; found in <íth’emchexw>, //ʃíθ’/; //’/get dressed/, //’/get dressed/, attested by AD.

<íth’emáwtxw>, dnom //ʔíθ’/ =əm=ɛ=ʃwxt’/, BLDG /clothes store, clothing store/, CLO, lx<br> =áwtxw/ house, building, syntactic analysis: nominal.

<s’íth’em>, dnom //ʃ=ʃíθ’/ =əm/, //ʃíθ’/; CLO /clothes, clothing (esp. Indian clothing, men’s or women’s), something to wear, dress, gown//, literally /something to clothe oneself//, (<> nominalizer, something to), syntactic analysis: nominal, attested by AD, Elders Group, also <íth’em ~ s’íth’em>, //ʃ=ʃíθ’/ =əm ~ s=ʔíθ’/ =əm/, attested by AC, ES, other sources: ES /s=ʔíθ’/ =əm; example: <éwá:ta s’íth’em>, //ʃθwà=ɛ=ʃíθ’/; //’/Have you got anything to wear?/, literally /Is there none, your something to wear/clothes//?, attested by AC.

<s’oth’óm’s>, dnom //ʃ=síθ=ɛ=ʃíθ’/ =əm=ɛ=ʃíθ’/; s=ʔíθ’/ =əm=ɛ=ʃíθ’/; CLO /big shawl/, ASM ['made of woven wool before the White man came'], literally /something to wear/clothing on the face//, possibly <o-ablaut> derivational, possibly <metathesis> derivational, lx <ses ~ =tš’s> on the face, phonology: possible double ablaut (the second perhaps automatically triggered by =tš’s ~ =tš’s on the face as is attested in many other places), or ablaut on V1 plus possible metathesis between V2 and V3, syntactic analysis: nominal, also <s’ath’óm’s>, //ʃ=síθ=ɛ=ʃíθ’/ =əm=ɛ=ʃíθ’/; s=ʔíθ’/ =əm=ɛ=ʃíθ’/; CLO /big shawl/, phonology: phonologically very complex with double ablaut, double metathesis or double assimilation; it is possible that a principle of vowel-preservation is behind metathesis and examples like this, that is, "preserve" the root and/or affix vowels by trading them to show derivation rather than by changing them with no trace of the original vowels which help show the semantic connection; thus here one could imagine that the second vowel <a> /ɛ/ was moved to first position, and the suffix vowel was moved to second position, attested by Elders Meeting 11/26/75, also <s’oth’óm’s> attested by RG & EH (4/10/99 Ling332), contrast <sswehóthes> veil (TG 4/23/75).

<s’oth’óm’mósem>, mdls //ʃ=síθ=ɛ=ʃíθ’/ =əm=ɛ=ʃíθ’/; s=ʔíθ’/ =əm=ɛ=ʃíθ’/, CLO /put on a shawl/, possibly <o-ablaut> derivational! (unlikely), probably <o-ablaut and 61-ablaut> derivational, lx <ews ~ =òws> on
the body, phonology: one unlikely derivation of this word has the suffix =es on the face retained here with a third ablaut added; the other possibility is that the suffix for face is replaced by the one for body for the implication of a body-shawl! Here rather than a head-shawl, double ablaut retained from s’oth’ô:mes, syntactic comment: note that there are two layers of middle voice here; the earliest was applied to make the words get dressed and clothing from which the word for shawl was created; then shawl was inflected with another middle voice to yield put on a shawl, attested by Elders Meeting 1/21/76.

<eth’iwsem>, mds //îté’=e=[-M2]=ws=ól/, CLO ['put on a dress'], lx <=ews> on the body, phonology: metathesis, syntactic analysis: intransitive verb, attested by AD.

<(=)l=ín’em>, //êté ’=£/, WV ['processed fiber'], ASM ['from dog or goat wool; fluff from fireweed and cottonwood might be added'], (semological comment: this word or suffix seems to apply to processed fiber since =álqel refers to raw wool), CLO, HHG, ANAA, (semological comment: =el is sometimes proven to be a pluralizer in Upriver Halkomelem lexical suffixes and it may serve that function here too), syntactic analysis: derivational suffix or nominal?; found in <qweqwemaylín’em>, WC=í/’am=í=÷=ól/, ‘dog wool fiber', ASM ['sometimes mixed with cedar fiber or perhaps nettle fiber to make it soft and warm for clothes'], (<R4=> diminutive), (<e-ablaut on R4> plural of diminutive), phonology: reduplication, ablaut, attested by AD.

<ín’em>, CLO /'to dress, get dressed/!, see ín’em.

<ín’emátxw>, BLDG /'clothes store, clothing store/!, see ín’em.

<i'oyóm or i'eyóm>, TVMO ['to walk slow']. see óyém.
**K**

<k>, phonology: The sound k is found mainly in borrowings from English, French, Chinook Jargon, and other Indian languages; it is also found in some words which normally have q in the same position in the word but have undergone a process of sound symbolism to produce diminutives or pet names. Where borrowings are found, the source word and source language will be listed, where known; where sound symbolism is identified that will be shown. The sound k often is palatalized ([k']) and the most consistently palatalized are sometimes spelled with ky in the orthography.

<ká:k ~ kyá:ky>, KIN ['younger sibling (pet name)'], see sqá:q.

<kalipōli>, free root /kɛlipōli/, PLN ['California'], borrowed from English /kælɪpɔrniə/ California, syntactic analysis: nominal, attested by IHTTC, source: place names file reference #191a.

<kálti>, free root /kɛlti/, FOOD ['candy'], borrowed from English <candy>/kándi/ or Chinook Jargon <kánti> /kɒnti/ candy (Johnson 1978:285), syntactic analysis: nominal, attested by EK,DK.

<kápech>, free root /kɛpɛch/, [kæptɛ], EB ['cabbage'], [Brassica oleracea'], borrowed from Chinook Jargon /kápac/ cabbage (Johnson 1978:284), syntactic analysis: nominal.

<mémeles kápech>, EB, FOOD brussel sprouts (lit. many little children of + cabbage), (attested by RG,EH 6/16/98 to SN, edited by BG with RG,EH 6/26/00)

<keke'á:t>, ds /C₁=əkəʔɛṭl/, TIME ['a little later (??)'], (<reduplication> diminutive), phonology: reduplication, syntactic analysis: adverb/adverbial verb, attested by AH (Deming 2/8/79).

<katkasyéthém>, us /kætkæsĭˈe̞m/ [kætkæsɨˈem], CH ['catechism'], borrowed from French catéchisme /kateˈʃiːsm/ catechism, syntactic analysis: intransitive verb?, nominal?, attested by IHTTC, also <katesíth'em>, //kɛtɛsiˈem/], attested by EB.

<Káthlek>, free root /kæθlɛk/, CH ['Catholic'], borrowed from English /kæθlɪk/ Catholic, syntactic analysis: nominal, adjective/adjectival verb.

<Kateslé:y>, df /kɛteˈsɛlə:-y or kɛt=cəs=əl=ɛ=Åá=, y or q|=[K]=ɛt=cəs=əl=ɛ=Åá=]y\], PLN /Kateslie, a spring-water stream east of Coqualeetza, part of the Kw'eqwá:líth'ua [property or stream? that went through Sardis and came out to the Cottonwood Corner'], possibly root <kát> wait, be later or possibly root <qát> cook or heat with steam, put on a poultice, possibly <fronting> diminutive, possibly <=ṭes> on the hand, possibly <=el> get, become, come, go, possibly <=á:y> bark, covering, possibly <=ó(-)ablaut> on <á> in suffix resultative, phonology: possible fronting, possible ó(-)ablaut on á in suffix, possible vowel-loss in suffix before stressed suffix, syntactic analysis: nominal, attested by DM (1/8/62)(new p.5 of transcripts), other sources: Wells 1965 (lst ed.):13.
<káwpóy>, free root //kéwpoy//, SOC ['cowboy'], borrowed from English /kéwpoy/ cowby, syntactic analysis: nominal, adjective/adjectival verb.

<káwpóyóweq>, dnom /kéwpoy=áweg(=)//, CLO ['cowboy hat'], lx =<áweg hat> (incl. =<eq> on the top of the head, on the hair), contrast =<yóseq> hat, syntactic analysis: nominal phrase with modifier(s), Salish cognate: Musqueam /=áweg hat Suttles ca1984:14.5.86.

<kéchel>, free root //kácél//, [kétél], BLDG ['kitchen'], borrowed from English /kéchel/ kitchen, syntactic analysis: nominal, attested by Elders Group, EB, example: =<aléta te kéchel>, //?éláce te kácél//, Where's the kitchen?!, attested by AD.

<keke'áti>, TIME ['a little later (?)'], see ká(t) ~ ke'é.

<telí kw'e Kyelchóch>, //telí k'w=él=kac=, //from Canada/, attested by Deming 3/15/79 (SJ, MC, MV, LG), ASM ['Anglican'], semantic environment ['religion'], <Kyelchóch ts'ahéyelh>, //k'él=các c'chéy=él/, //Anglican church (institution)//, also compare <Kíl Chóch>, ds //kíl caccl/, N ['King George'], borrowed from Chinook Jargon /kin cóc/ King George.

<kél=cac=țiáq=, ANAH /part the hair on the right side (left side as people look at you), have the hair parted on the right side!, lx =<tíeq> hair, top of the head, syntactic analysis: adjective/adjectival verb, attested by IHTTC.

<kemí()>, possible root //kemí(=)//, meaning unknown

<skemí'lya>, dnom /s=kemí=iy=él/, EZ 'a white-headed duck, [could be bufflehead, snow goose, emperor goose, poss. oldsquaw, or hooded merganser, other duck-like birds with white heads do not occur in the Stó:lō area and the emperor goose would be only an occasional visitor//, (s=) nominalizer), (=<iya> diminutive), (possibly <fronthing>, i.e., q → k diminutive), phonology: possibly fronting, syntactic analysis: nominal, source: JH:DM.

<keá'áti ~ ká(t)>, dl //kél(t) ~ k(=)é=él=t/, TIME /wait, be later/, possibly =<eq> comparative, possibly <fronthing> diminutive, phonology: possible fronting, syntactic analysis: adverb/adverbial verb, attested by EB, Deming, AH; found in <káchxwò>, //ké-c-x=él=//, Wait a while, possibly root =<qa> /qél and, syntactic analysis: imperative, attested by EB, example: =<keá'ets el>, //k(=)é=el=ts=é=él=//, Wait a bit., attested by Deming 1/18/79.

<kíks>, free root //kíks//=, FOOD ['cake'], borrowed from English /kéiks/ cakes, syntactic analysis: nominal, attested by Elders Group, also /cakes//, attested by EB, =<t'á'ets'em qwíqwóy'éls kíks seplo>, FOOD lemon cake (lit. lemon (itself from sour little yellowish fruit) + cake + bread), (attested by RG, EH 6/16/98 to SN, edited by BG with RG, EH 6/26/00), =<xáweq kíks seplo>, FOOD carrot cake (lit. carrot + cake + bread), (attested by RG, EH 6/16/98 to SN, edited by BG with RG, EH 6/26/00)

<Kíl Chóch>, ds //kíl cácl/, N ['King George'], borrowed from Chinook Jargon /kin cóc/ King George, syntactic analysis: nominal, attested by EB.

<Kíl Ítewet>, ds //kíl títewét=//=, N ['King Edward'], borrowed from back-formation from Chinook Jargon /kin cóc/ King George with Ítewet Edward, the common name, from British English /?édwəd/
Galloway: Upriver Halkomelem Dictionary, Halkomelem-to-English

Edward, syntactic analysis: nominal, attested by EB.

<klekleklék> perhaps, df //klæk=klæk=klæk// [klæk=klæk=klæk], SD ['glug glug glug'], syntactic analysis: intransitive verb, prob. borrowed from English, attested by Elders Group.

<kópi>, free root //kápi ~ k'ápi//, FOOD ['coffee'], borrowed from Chinook Jargon <kau'py>/kópi/ coffee or English /kófi/, syntactic analysis: nominal, attested by Deming, Elders Group, AD, example: <vé te kópi'tset>, //vé te kápi-c=él/, /'We have good coffee., Our coffee is good.'/, attested by Deming.

<kópi'álá>, dnom //kápi=élél/, HHG ['coffee-pot'], FOOD, lx <=álá> container of, syntactic analysis: nominal, attested by AD, example: <álétsa te kópi'álá>, //vé te kápi=élél/, /'Where is the coffee-pot?'/, attested by AD.

<kopú>, free root //kapú/, CLO ['coat'], borrowed from Chinook Jargon <kapo>/kapól/ coat itself from French <capot> hooded cloak, syntactic analysis: nominal, attested by EB, AC.

<kúkumels>, EB /'cucumber/., see kwúkwemels.

<Kúshen>, free root //kúshen//, PLN ['Goshen'], ASM ['name of a small town near Deming, Wash. in Nooksack territory'], borrowed from English /gós'en/ Goshen, syntactic analysis: nominal, attested by Deming, example: <li te Kúshen Xálh>, //vé te kúshen xéxél/, /'on Goshen Road'/, attested by Deming.

<kyá:ky ~ ká:k>, KIN ['younger sibling (pet name)'], see sqá:q.

<kyal:ám>, free root //kél-ėm//, [kél-əm], CH /'fasting for Lent/, prob. also Lent!, borrowed from French carèrne Lent, Elder's comment: "all Catholic people over 21 used to have to abstain from meals for Lent; now they just fast one hour before", syntactic analysis: intransitive verb?, attested by Elders Group 1/30/80.

<kyépe>, bound root /k'ēp=//=, borrowed from possibly Thompson or Lillooet, Salish cognate: Shuswap /k?ep/ sick (Kuipers 1974:205).

<kyépetes>, df //k'ēp=ce=ll//, [k'ēpčets], ABDF ['in-grown finger-nail'], lx <=xes> on the hand, syntactic analysis: intransitive verb, attested by BHTTC.

<kyépexel>, df //k'ēp=xel//, [k'ēpxél], ABDF ['in-grown toe-nail'], lx <=xel> on the foot, borrowed from possibly Thompson or Lillooet, Salish cognate: Shuswap /k?ex=xén'/ to have a sore leg (Kuipers 1974:205), syntactic analysis: intransitive verb, attested by BHTTC.

<kyépetes>, ABDF ['in-grown finger-nail'], see kyépe=.

<kyépexel>, ABDF ['in-grown toe-nail'], see kyépe=.

<kyó>, free root //k'á ~ k'áll/, CAN /car, automobile/, borrowed from English /kát/ car, syntactic analysis: nominal, attested by EB, Elders Group, example: <xwá:lx 3 tós te kyó>, //x'élq yí-tás te káll/, /'He almost got hit by a car.'/, literally /'he almost got hit by something moving the car'/, attested by EB, <slé'ólwelh te kyó>, //s=lé=álwé= l te káll/, /'It's on the other side of the car.'/, attested by EB, <tsel sulwélh te kyó>, //c-él s=lé=álwé= l te káll/, /'I'm on the other side of the car.'/.
<kyóxálh> or better <kyó xálh>, cpds //kyá=xʰəf// or better //kyá xʰəf//, CAN ['railroad'], literally '/car road/', syntactic analysis: nominal phrase with modifier(s), attested by Elders Group 3/2/77, also see xálh ~ xá:lh.
K’

<k’>, phonology: The sound k’ /k’/ is found in borrowings from Interior Salish Indian languages (Thompson, perhaps Lillooet and Okanagan) and perhaps in words with diminutive fronting of q’ /q’/ → k’ /k’/. As with the sound k, these origins will be indicated in each entry, where known. Unlike k, k’ is not palatalized often with a glide, i.e. [k’]; it is more often velar or palatal and less often palatalized.

<káxwe>, possible bound root or stem /k’áxw=/ from Thompson language, the borrowed word may have been borrowed with or without the s= nominalizer, research into older records of UHk is needed (Boas, Hill-Tout, etc. have not been checked yet)

<sk’ákáxwe>, df //s=C,ε=k’éx̆=θ//, EB ['dried saskatoon berries'], [‘Amelanchier alnifolia’], ASM [‘ripe in July, the best ones are found north of Hope, B.C.; fresh berries are eaten and have a separate name; the dried berries are obtained in cakes or sheets from the Thompson and other Interior Salish Indians; saskatoons can be mixed with bulbs of the sxameléxwthelh tiger lily and kwépan [k’=ópən] (a Thompson word, a white root, like a sweet potato in taste) and then either with sugar or with fish eggs’], borrowed from Thompson /s=k’éx̆=θm/ dried berries (Thompson /s/ is velar and corresponds to Upriver Halkomelem velar /x/ in this word), (<R8=> diminutive or resultative or derivational), possibly <=e ~ =a>, da //θ = =θ//, EZ ['living thing'], phonology: reduplication, syntactic analysis: nominal, attested by Elders Group, Deming (M.H.), AC, DM 12/4/64; unclear whether borrowed with the reduplication and s= nominalizer from Thompson or borrowed as the root <k’axwe> or stem <k’axw> and then these were added from UHk.

<k’élha>, df //k’=C,ə=|=θ//, EZ ['pill-bug'], [‘class Crustacea, order Isopoda, Armadillidium vulgare’], semantic environment [‘sowbug that rolls up [therefore a pill-bug, since they and not true sowbugs, roll up], found in damp areas and on bacon and dried fish, black and grey striped bug with lots of legs, real tiny bug found with decayed meat, oval-shaped bug smaller than a lady-bug’], possibly <=R1=> diminutive or continuative or resultative, possibly <=a> living thing, phonology: reduplication, syntactic analysis: nominal.

<k’ámet ~ k’ámeth>, possible bound root //k’émæc ~ k’émæc//, the borrowed word may have been borrowed with or without the s= nominalizer, research into older records of UHk is needed (Boas, Hill-Tout, etc. have not been checked yet)

<sk’ámets ~ sk’ámeth>, dnom //s=k’émæc ~ s=k’émæc//, EB /blue camas, yellow dog-tooth violet = yellow avalanche lily/, [‘resp. Camassia leichtlinii and Camassia quamash, Erythronium grandiflorum’], semantic environment [‘wild sweet potatoes, obtained in trade, don’t grow here; camas, like sweet potatoes with little sausage-shaped potatoes on root; dried bulbs of both camas and avalanche lily were obtained in trade probably both from the Interior and the Coast Indian peoples’], borrowed from Thompson /sk’émæc/ dog-tooth violet, blue camas, white easter lily, Indian potato, syntactic analysis: nominal, attested by Elders Group, also <sk’ámeth>, /sk’émæc//, attested by Deming, may have been borrowed with or without the s= nominalizer of Thompson.
KW

<kw>, free root /kʷ/ll, DEM /the (remote, not visible, abstract), some (indefinite)/l, phonology: may be a rapid speech alternant of kwe, syntactic analysis: demonstrative article, dialects: EB uses both kw and kw'e, while AC prefers kw'e and only very rarely (if ever) uses kw, attested by EB, also /some (indefinite)/l, example: <la háːwe kw (s'álhtel, stámés).>, /lɛ hɛ-wə kʷ (s=tɛt=təl, s=tɛm=ów)/ll, /'He went hunting for (some food, something).'/, attested by EB, contrast <la háːwe kw'ę spá:th>, /lɛ hɛ-wə kʷ'ę s=pɛ-ów/l, /'He went hunting for bear.'/, attested by AC, contrast <stl's kw'ę qóː>, /l s=ɛ́í kʷ'ę qá-ll, /'I want some water.'/, attested by AC, others, also /the (remote, abstract, not visible, distant)/l, <kw (spelwáłh, chéláqelh(elh))>, /lk* (s=pəl(=w=ɛt, cələ=k(=ɛ=)))/l, /'last year, yesterday'/, attested by EB, contrast <kw'ę (spelwáłh, chéláqelh(elh))>, /lk* ɛ (s=pəl(=w=ɛt, cələ=k(=ɛ=)))/l, /'last year, yesterday'/.

<kws ...s ~ kwses ~ kw'es ...s>, if /kʷ-s ...s ~ kʷ-s-əs ~ kʷ*-əs ...-sll, CJ /that he, that she, that it, that they/', (the first <-s (es after kw')> normalizes following phrase, the second -s ~ -es third person subordinate subject), phonology: kws ...s, kwses, and kw'es ...s are in free variation for most speakers, syntactic analysis: demonstrative conjunction, sbsp (possessive pronoun affix), syntactic comment: used to attach (conjoin) subordinate phrases or subordinate sentences with third person subjects to main verbs; the -s closest to kw (or kw') is the nominalizer, since ...-s is attached to the first word in the subordinate phrase or sentence in the same position as a third person possessive pronoun and since possessive pronouns are used in the same way to show first and second person subordinate subjects.; syntactic comment: with first or second person subjects only kw'e (not kw) can be used to attach subordinate phrases or sentences with first or second person subjects to main verbs (example, kw'-el-s that I, kw'-a(')-s that you (sg.), kw'-s ...-tset that we, and kw'-a(')-s ...-elep that you folks.), syntactic comment: often an adverb or adjective is focussed upon by being made the main verb and the rest of the phrase or sentence is subordinated; -u contrastive can also be attached at the end of any of these combinations, as in kwsu ...s, kwsusu, kw'esu ...s, kw'elsu, kw'a(')su, etc.; (-u is often not translated in English directly, more by tone of voice and implication; see under -u), attested by Elders Group, AC, EB, others, example: <tsel shléq'elxw kwesə sätax spá:th>, /lɛ-c=ɬ s=tɛq' =ələx kʷ-s-əs s=pɛ-ów/l, /'I know (that) it was a bear.'/, attested by AC, also <tsel shléq' elxw kwesə spá:ths>, /lɛ-c=ɬ s=tɛq' =ələx kʷ-s s=pɛ-ów/, attested by AC, <lachxw tsesátq kw las kwel:em kw s'álhtel>, /lɛ-c=x* ɛs=ɛ=T kʷ-s ɬc=kʷ-ə lm kʷ s=tɛt=ów/l, /'Send him to get food.'/, literally /go you send-him that go-he get some food'/, attested by EB, <xwém (kwses, kw'els, kw'as) me áylexw>, /lx* ɛm (kʷ-s-əs, kʷ*-əl-s, kʷ*-ə-s) mə ʔɛyɬəɛx=l/, /'(He, She, It, They: I; you (sg.),) got well fast.'/, attested by AC, <skwétáxw kw'els qá:l kw'es léwes>, /l=kʷ'ɛ-y kʷ-əl-s q' ɛ l kʷ*-əs ləwə-ów/l, /'I couldn't believe it was you.'/, literally /it can't be that I believe that is you-it', (semological comment: note the semantic focus), syntactic comment: note the second person pronounal verb/verbal pronoun with third person subject, attested by AC, <iwiyóth kwsu qéls te sqwálewels te lólets'ęe>, //iwiyá ɬkʷ-s-u qəl-s ɬ=s=q' ɛ l=əwəl-s ɬ c, ɬ=c=ɬəll, /'a pessimist, a person whose thoughts are always bad'/, literally /it's always the thoughts of the one person are bad'/, attested by Elders Group, <iwiyóth kwsu éys te sqwálewels te lólets'ęe>, //iwiyá ɬkʷ-s-u ʔɛy-s ɬ=s=q" ɛ l=əwəl-s ɬ C, c=ɬ=ɬ'=ell, /'an optimist, a person whose thoughts are always good'/, attested by Elders Group.

<kwe>, ds /kʷ=ə or kʷəll, DEM /the (present, not visible, gender unspecified), the (remote, abstract)/l, poss. lx <-ę living thing, syntactic analysis: demonstrative article, example: <li kwe i skwétáxw tha sísele>, //li kʷ ɛ̃l s=kʷətəx* (kʷ)ɛə-ɛ sí;=C, ə=]əll, /'Is your grandmother in?, Is
your granny in?], (=<R1=> affectionate diminutive), phonology: length-loss happens automatically before doubling of infix #1 with e= reduplication, attested by AC.

<kwsé>, ds //k*=sə/, DEM /'the (female, near but not visible), (female, near but not in sight) (translated by gender specific words in English, like aunt, etc.)/, phonology: in fast speech kw is sometimes dropped (consonant-loss), leaving se /sə/, syntactic analysis: demonstrative article, attested by AC, CT, others, example: <tsel kw'étslexw kwsa (sí:sele, stó:les, shxwemlí:kw, stíwél), /lɛ-tə kʷ*ət̕ax=k*əla=kə (màl, sí·le) demonstrative article, attested by AC, EB, Elders Group, others, example: <li i: sel tà:l>, /lī ʔī: sə-l tə·l/, /'Is my mother here?/, attested by AC.

<kwsú:tʰólə>, cpdfs //k*=sú=ʔə·l/, PRON /'[that's her (absent')]], DEM, (=<s> (female near but not visible), =uë: contrastive, (=)̃f̃ó' that's), syntactic analysis: inp, attested by AC, others.

<kwsú:tʰólə:lh>, ds //k*=sú=ʔə·l/, PRON /'[that was her (deceased')]], DEM, (=<elh> past tense, deceased), phonology: vowel merger, attested by AC: inp, nominal past, attested by AC, others.

<kwetáxw>, ds //k*=ə/, DEM /'the (male or gender unspecified, near but not in sight)/, phonology: in fast speech kw is lost after xw and perhaps other labialized consonants, syntactic analysis: demonstrative article, attested by AC, EB, Elders Group, others, example: <li í skwétaxw kwthá (màl, sí:lə), /lī ʔí s=k*ət̕ax=x kʷ*ə-ə (màl, sí·lə), /'Is your (father, grandfather) in?/, literally /is he? here inside the (male or gender unspecified near but not visible) (father, grandfather)/, phonology: vowel merger, attested by AC, <li í skwétaxw (tha sel:ší:k, kwthá í:méth, ta amér:méth), /lī ʔí s-k*ət̕ax=x (kʷ*ə-ə C,əC, sí·lə, kʷ*ə-ə ʔí-méč, ʔə-ə C,əC, ʔí-méč)/, /'Are your (grandparents, grandchild, grandchildren) in?/, ASM [the grandparents and grandchild are near but not visible; the grandparents and child are present or visible or unspecified as to presence and visibility].. phonology: the first article, tha, shows consonant-loss in fast speech, the stress on the second article, kwthá, shows iterative aspect is hyper-slow speech since articles are not so stressed at normal speeds; all the articles show vmger of e with a (possessive pronoun suffix) → a, attested by AC, <me stetís kwte yewál⟩, /lə=ə=s C,ətıs kʷ*ə-ə yewél/, /'He came close to the first., (He was next to the first.), attested by AC, <li i t'eláxw kwthá màl⟩, /lī ʔī ẽt̕ax=x kʷ*ə-ə məl/, /'Is your father in (home)/, usage: less formal than li skwétaxw kwthá màl, attested by AC, <etset t'eléxw li te shxwlis kwthá màl⟩, /lī tə-c=ə ʔə·l̕ax=x li (s=x)=ə=s kʷ*ə-ə məl/, /'We stopped at the place your father is at./, literally /We stopped at the where he is your father/?, attested by AC, <kwthel màl = kwthel màl = kwthel màl⟩, /kʷ*ə-ə məl (məl - məl - məl)/, [kʷ*ət̕əl məl, l], /'my father'/, phonology: articles often get higher pitch than normal high stress, this is a fact of phrase- or sentence intonation and so is not written in the writing system or phonemically, attested by AC, <lií skwétaxw kwthá álex⟩, /lī̃ s-k*ət̕ax=x kʷ*ə-ə ʔeláx=x/, /'Is your brother/sister in?/, is your sibling in?/, phonology: length here may reflect vowel merger of li-e, attested by AC, contrast <skwétáxw te lálem⟩, /l*k*=ət̕ax=x te ləlem/, /'in the house'/, attested by AC, also <skwétáxw li te lálem⟩, /l*k*=ət̕ax=x li te ləlem/, /'inside the house'/, attested by EB, contrast <liíy skwétaxw se Mary⟩, /līí=ə̃ s-k*ət̕ax=x kʷ*=ə̃ Mary/, /'Is Mary home?/?, literally /Is she there? inside the (female near but not visible) Mary?/, semantic environment ['the speaker is near to Mary's residence'], (<=e interrogative (yes/no question) (optional after sentence-initial li, as in examples below)), phonology: consonant-loss; se is short for kwse the (female near but not visible); iterative aspect loses the kw here after xw (and perhaps after other labialized consonants) in rapid speech, attested by AC, <liíxw we'ěy el qwóqwel kw'ës me kwetzxwleím kwthá síyáya⟩, /lī̃c-xʷ wə=ʔey ʔəl q̕*ə[-AÁC,ə-] kʷ*=ə̃ me kʷ*ət̕ax=x=ə̃l=ə̃m kʷ*=ə̃ si=ỹỹe/, /'Were you still talking when
your friend came in?'/, attested by AC, contrast <li skwetáxw tha (mâl, sîlc)> //li s-k"ətəxʷ k"=ə-thəl//, /ls your (father, grandfather) in?'/, semantic environment ['the speaker is outside the building'], phonology: consonant-loss; <tha>/əθ/ is short for <kwθa>/k"=əθ/ the (male or gender unspecified near but not visible); iterative aspect loses the kw here after xw (+ other labialized consonants?) in rapid speech; the article <tha>/əθ/ here cannot be from <the>/əθ/ the (female present and visible or presence and visibility unspecified) because the nominals are male (for ex. father) and not visible; vowel merger also present here (<ea> ← <a>, /əθ/ ← /θ/), attested by AC, contrast <liye skwetáxw kw'e John>, //li s-k"ətəxʷ k"=ə ján//, /ls John home?/, literally /is there - interrogative (yes/no) inside the (distant, remote) John/, semantic environment ['speaker is distant from John's home'], phonology: vowel merger, attested by AC.

<kwθú:tl'ó> , cdps //k"=ə=á=ə ali, PRON /'that's him (absent), that's her (absent), it's him (absent), it's her (absent)/, DEM, (<th> (male, near not visible or gender and visibility unspecified), <u> contrastive, (=tl'ó) that's), phonology: down-drift or down-stepping, syntactic analysis: inp, demonstrative pronoun, attested by AC, others.

<kwθú:tl'óləm> , pls //k"=ə=á=ə ml, PRON /'that's them (absent, not present)/, DEM, (<le> plural, um meaning unclear), syntactic analysis: inp, demonstrative pronoun, attested by AC.

<kwθú:tl'óləməl> , ds //k"=ə=á=ə l=ə=θ//, PRON ['that was them (deceased)'], DEM, (<el> past tense, deceased), syntactic analysis: inp, demonstrative pronoun, attested by AC.

<kwəθə ~ kwə tha> , ds //k"=ə=θ - k"ə ml, DEM /him (there, near but not visible), that one/, syntactic analysis: nominal demonstrative, attested by AC, others: <tlə: kwəθə> , //ə=á=k"ə ml//, /IT IS him., IT's him (right out there, barely visible)./, semantic environment ['said for ex. after someone says "Oh, it's not him."'], attested by AC.

<kwə> , free root //k"=ml, MOOD /'anyway, ever, (new information as in NStraits)/, syntactic analysis: mpcl, attested by EB, others, Salish cognate: probably Musqueam /k"ə/ consequential (then) Sutles ca1984: 15.1.17, Saanich dial. of NSst /k"ə/ postclitic informative, [perhaps] new information Montler 1986, Samish dial. of NSst /k"ə/ (same meaning as in Saanich) Galloway 1990:59-60, example: <səwəlchəx kwəxkw stlt'itl'qəl> //səwə=ət-c"x k"=əx=s C=ə=ə qə=əθ//, /Weren't you ever a child?/, attested by EB, <tsəl kwə welh lám>, //c-əl k"=ə ml, /I began to go./, literally /I anyway already go/, attested by EB.

<Kwókwá:ltem ?>, us /kʷ*ok'ε̱k̓eel̓tem ?/l/, PLN ['a tributary of Atchelitz Creek'], source: Wells 1965:13 <koh-kwah-AHL-tuhm>; said to mean there where a brave found his bride, comment: if Wells' gloss has any validity the root could be kwá:l 'to hide' and thus Kwekwá:ltem /R5=kʷ*el̓=T=əm/ or /R5=kʷ*el̓=əm/ could be place where she was hidden with R5= resultative or continuative, <=t=purposeful control transitive and <=em place of or <=tem> stative participle, phonology: reduplication,

<Kwókwelem ?>, us /kʷ*ok̓el̓em ?/l/, PLN ['Post Creek'], source: Wells 1966 <KOHK-oh-lum>, comment: if kw is right in both positions the root could be kwól gold if gold was found in historic
times, or kwà:l to hide if something was hidden here or if some Indian people hid here, or kwél= grasp, hold as in kwélát grasp it, hold it or kwél(:)em get, fetch, or the root in skwél waterfall, etc., etc.; =em could be place of or middle or intransitive; the reduplication could be of several types (infixed or prefixed with ablaut or stress shift) and could mean continuative, plural, diminutive, etc., or just derivational, Carlson, McHalsie & Perrier 2001:142 has "you think somebody is talking back there, but it's your own voice (echo)" but I have only found <wélwelàm ~ wélwelà:m> to echo, echoing and <Xwixwé'áqel ~ Xwixwé'áqel ~ Xwókwelem> Echo Point on Echo Island, Echo Bay on Echo Island, literally 'imitating a voice' from <wéxwe'á> copy, imitate. However, in light of the 2001 work above, most likely the root is kwà:l to hide as I speculated and the place name <Kwókwelem> (as the Stó:lô atlas (the 2001 work above) has it, meaning place to get hidden with <=em> place to have/get.

<kwóxweth>, us /k’óx’əθl/, EZ /’coho salmon, silver salmon’, ['Oncorhynchus kisutch’], syntactic analysis: nominal, attested by NP, AC, Elders Group 3/1/72, other sources: ES, JH /’k’óx’əθl/, H-T02 <kókwats>, also <kwóxweth>, /k’óx’əθl/, attested by AC, BJ, also <kwéxweth>, /k’óx’əθl/, attested by AD.

<kw’elqwal>, plv /kw”-ê-[l-e]-q”=êl\_s/-, TCH /clubbing many times, hitting many times\/, (=/le- plural\_), (irregular) =ál for =áls structured activity, syntactic analysis: intransitive verb, Elder’s comment: /unsure/, attested by TM.

<Kw’eqwálith’a>, df /kw”-ôq”=êl=ôc’ê\_l/-, PLN /Coqualeetza stream esp. where it joins Luckakuck Creek, later Coqualeetza (residential school, then hospital, then Indian cultural centre and Education Training Centre)/, there are several versions of why the stream was so-named; the most plausible is that it was used for washing clothes and blankets, which were beaten with sticks in the process; another version is told in Hill-Tout 1902 as a wonderful long story, involving a famine, men discovering fish in Coqualeetza stream and deciding to eat them on the spot and not bring home any for their wives and families, a little boy sneaking home to tell his mother and the wives approaching en masse beating their husbands’ blankets in anger, as the wives approach one man throws paint on several men one-by-one and they change into different birds and fly away, finally he throws the remaining paint on the rest and they change and fly away; they then proceed to another adventure, the third version says the stream was called Kw’eqwálith’a because the fish were so numerous in it.
that they could be clubbed and tossed into the boat; EL and Wilfred Tommy went with their
grandfather and pitch-forked fish here, all kinds: coho, sockeye, even steelhead; they spawned on
Hulbert’s place and there were a few small Indian houses or sheds there; Lawrence James said many
people from all over the Fraser Valley went there in the Fall to catch fish; this version is supported
by the root kw’eqw to club but not by the suffix =íth’a clothes not fish, possibly =ál plural affix?,
lx =íth’a clothes, blankets used for clothing, syntactic analysis: nominal, attested by Elders
Group, EL (in Chill. dialect), source: place names reference file #89, also <Skwék’wqwös>,
=ál-C, -lq”=asl/, phonology: downstepping, reduplication, literally /place for clubbing
(salmon) in the face/, (semological comment: this name supports the clubbing fish etymology but is
only reported by EL and no-one else), dialects: Cheh., attested by EL.

<halmemel>, dnom //hə=le=[M2]=m or həlɛ=m=ələm//=, EFAM ['feel like going'], TVMO, lx <=élmel> in the mind, feel like, thinking about, phonology: metathesis, suffix has strong stress-valence, syntactic analysis: intransitive verb, attested by IHTTC, example: <lìchap halmemel>, //lī-c-ep héləm=ələm//=, /'Do you folks feel like going?/, attested by IHTTC.

<heləməstəm>, caus //həl=ɛm=ə= =sT-əml/, EFAM ['he's gone (mentally)'], literally /'he's been caused to be on his way, he's been caused to be going/, (<(e)st) causative), (<em> passive), phonology: presumably the penultimate stress is derivational, syntactic analysis: intransitive verb or participle?, attested by Elders Group.

<šxwlelm ~ šxwlelm>, dnom //sxʷ=həl=ɛm ~ sxʷ=hol=ɛl=[Aθ]=m//=, TVMO /'wandering, where someone goes/, (<shxw=) nominalizer), phonology: possible ablaut, optional updrifting, syntactic analysis: nominal, attested by EB, others, example: <qex ta' šxwlelm>, //qex t-ɛ sxʷ'=hol=ɛml/, /'You're wandering a lot!/, literally /'your wandering is a lot!/, attested by EB, <léchá kw'a' šxwlelm>, //?eləc kʷ-ɛ sxʷ'=hə=łəm//=, /'Where are you wandering to?/, attested by EB, <ówe məkw'es a šxwlelm>, //?owə mékö'=sEs ʔə sxʷ'=hə=łəml/, /'Don't go all over., Don't be all over in your wandering.!, literally /'is not every(where) your wandering/!, attested by EB, <mekw'o šxwlelems>, //mékʷ'-ə sxʷ'=hə=łəm-s//=, /'a wanderer, goes all over!/, attested by EB.

<ləmtʃe>, ds //lē=m-c-ə(s)=əf//=, LANG ['signal with the hand to go (or that you can go)], TVMO, lx <=ėl> in the hand, lx <=tʃes> according to, in the ways/fashion/style/manner of, phonology: consonant-loss of s in =tʃes is irregular but happens in a few other cases, syntactic analysis: intransitive verb, attested by Elders Group (5/26/76).
<xwelá ~ xwelám ~ xwlá ~ xwlám>, incs //xʷə=ɬə ~ xʷə=ɬə=ml//, DIR /toward, towards, for/,
(<xwel=/> go, come, get, become), syntactic analysis: preposition/prepositional verb, attested by EB,
BHTTC, Elders Group, AD, example: <xwelám te máqá>, //xʷ=ɬ=mi tə məqɬ//, /through (towards)
the (fallen) snow', attested by EB. <éy xwelám tl'eléve te slétélmexw.>, //éy xʷ=ɬ=ml
čə=ɬə=tə ɬə=ɬə=ɬə=ɬə=ml//, /The medicine is good for you./, syntactic comment: independent object
of prepositional verb, attested by EB. <éy xwelám tl'eléve te tsəlqómé>, //éy xʷ=ɬ=ml čə=ɬə
tə ɬə=ɬə=ɬə=ml//, /Blackcaps (blackcap berries) are good for you./, syntactic comment: independent
object of prepositional verb, attested by EB. <qél xwelá ml tl'eléwe>, //qél xʷ=ɬ=ml čə=ɬə=ɬə=ml//,
/It's bad for you./, syntactic comment: independent object of prepositional verb, attested by EB. <lé
thékʷ xwelá te səm'oméla>, //lé čə=ɬə=ɬə=ml tə s=ɬə=ɬə=ɬə=ɬə=ml//, /She was pulled towards
the Thompsons (Thompson Indians)./, attested by BHTTC. <éy kwómkw'emcha telí s'ohl sqwáwelet
xwelám kw'e it toti:lt tlówayél.>, //éy kʷám=ɬə=ɬə=ɬə=ɬə=ɬə=ml tə s=ɬə=ɬə=ɬə=ml//, /Let our thoughts
be strong toward what we are studying today./, attested by AD. <lé xwelá te Agassiz.>, //lé čə=ɬə
tə Agassizl, /He got to Agassiz., (He went toward Agassiz.)/, semantic environment ['like two people
travelling together, and one maybe changes his mind and goes as far as Agassiz while his partner
keeps on going to his (maybe original) destination'], attested by Elders Group (incl. NP).
<oxwestchexw xwelá ml tlélhúmelh>, //oxʷ=ɬ=ml tə Agassizl, /We thank you for everything./, attested by AD.

<lá ~ lá: ~ lah>, bound root //lé or ɬeɬ//, DESC //tight, put away//
<slá ~ selá ~ slá:>, strs //s=ɬə ~ slə=ɬə ~ slə=ml//, DESC /be tight, be secured tightly; be tucked away,
put away so well you can't find it, be solid!/, root <lá:/> tight, put away, (:<s=/> static), possibly
<he/> resultative, comment: possible since resultatives are often continous forms in conplex
form expression, if prepositional phrases are often have the static s- as well); other forms with such static resultatives in s-(he)- are found only
on roots beginning in l or m so far, and he- 'continuative' occurs only before l, m, y, and w,
phonology: h-loss would be expected after s-, syntactic analysis: participle, adjective/adjectival
verb, attested by Elders Group, EB, AD, AC, Salish cognate: Squamish /yá/ tight, shut, tied tightly
and /yáʔ-ml put on tightly, hold tightly, tie tightly W73:268, K67:381, 382, Musqueam /səlɬčə/ 'put
away' (resultative) beside /ɬeɬ-χə/ 'put it away' Suttles ca1984:7-164, example: <q'éesét kw'es selá
~ selá kw'es q'éesét>, //q'ís=ɬə T kʷám-s selə ~ selə kʷám-s q'ís=ɬə T//, /tie it tightly!,
syntactic comment: the sentence-initial position probably indicates semantic focus, attested by AC, <éwe is
selá>, //éwə ɬə-s selə=ml//, /It's not tight./, attested by EB.
<slálets>, ds //s=ɬə=ml//, DESC ['firmly planted in ground (can't be pulled out')], LAND, EB, lx
<lets> on the bottom, syntactic analysis: adjective/adjectival verb, attested by IHTTC.

<Lohíts ~ Láhițs ~ Lahích ~ Slahích>, df //lə=ɬí ~ lə=ɬíc ~ s=ɬí=ɬí//, PLN ['Five-Mile Creek'],
ASM ['five miles above (upriver from, here north of) Yale, the creek is easy to locate; the Indian
name can also be found on a sign, "Slaheech Yale Native Ancient Cemetery No. 3"], by a little white
picket fence around the cemetery, down a bank in the bush on the west side of the main highway
from Yale north; the cemetery is located below the first bay above Íyém and above Aseláw (Esíləo)
and Aseláw Stótel; we visited it 4/30/79 on a place names field trip to Five Mile Creek, which is
said to be about the furthest north Stó:lō territory goes'), probably root <lé/> tight or probably even
stem <s=ɬí/> be tight, lx <íč~ (after vowel) =híč or =íč> on the back, phonology: given with
o (/ə/) by Duff but pronounced after prompting with an <ə/> /ə/ as the first vowel, <ts ~ ch> here
vary freely, syntactic analysis: nominal, attested by AK, AD, source: place names reference file
<låxel>, dnom /lê=xʔel or lêx=xʔıll/, FSH ['fishing platform'], ASM ['plank and pole platform built extended out over eddy water from bank to stand on in dip-netting or other fishing from land for salmon'], Duff 1952:cover of 1973 printing, root <låx= tight, put away, secure tightly, lx <xel> on the foot or =el> get, become, go, come, syntactic analysis: nominal, attested by Elders Group (3/15/72, 3/26/75, 2/11/76).

<lakwi:l>, free root //lêkʷʷi-l/, REL /a cross, grave cross, gravestone, cross one hangs up', syntactic analysis: nominal, attested by CT, Salish cognate: Squamish /na/ reduplication, syntactic analysis: interjection, attested by AD, EB, Salish cognate: possibly Squamish /la clo-a/ from French <la croix>/lakywál the cross); probably as Kuipers suggests from French <le coin> corner, nook, quoin (exterior angle of a building), cornerstone, wedge, also <lak-wil>, //lêkwîl/, attested by AD 10/9/79, also <lakwi:l>, //lêkʷʷi-l/, attested by EB.

<lîlakw'wì:l>, dmn //C,i=lêkʷʷi-l/, REL ['small cross']. (<R4=> diminutive), phonology: downstepping, reduplication, syntactic analysis: nominal, attested by EB.

<lå:la>, df //lê:Î/, EFAM /for goodness sakes., well. (in surprise)/, phonology: probable reduplication, syntactic analysis: interjection, attested by AD, EB, Salish cognate: possibly Squamish /nâ/ there you are. (interjection used when handing something over)(prob. related to /nâ? be there), K67:312, possibly Lushootseed /dàʔdaʔ/ that which gives emotional support, satisfaction; that which is important to someone H76:127, also <låla>, //lêlÎ/, attested by Deming.

<lâlålêm>, BLDG ['houses'], see lâlålêm.

<lâlåt>, TIME ['getting dark'], see lâlt.

<lâlaw (or) lâ:lawa>, LANG /say, Honey; hello, Honey; hello, Husband; hello, Wife/, see lâlaw.

<le or =ele>, da //l=|l or =e=|l, SOC l′ack, need(l), syntactic analysis: lexical suffix, derivational suffix; found in <tsqó:ôle ~ lhqó:ôle>, //l=c=q=|=l=|=|=|=w, "thirsty(l)" (compare <ts> have and <lh> use a portion of, root <qó: > water), comment: this seems to be the only example of =le, but it is a clear one.

<lehâ:tw>, free root //lehâ:tw//, PLAY l′play slalal, play the bone-game(l), the game is a gambling game in which two teams compete at guessing the distribution of four hidden hand-held bones, two marked and two plain; initial guesses can determine who starts by holding and who by guessing; team members sit in a line facing the opposite team, many of the holding team drumming and singing special slalal songs some with spiritual power; two people mix the bones behind their backs then hold one in each hand; one the guess is made the holders slowly bring out their hands and open them palm up to show the bones; the marked bone is called the lady and the plain bone is called the man (or vice versa?); if the opposite team guesser guesses the correct hand of each bone (he only gets one guess for the set) the bones are passed to the holder and the guessing is reversed; if only two bones are guessed right, the guessers pay the hiders a tally stick (?but receive two of the bones); if no bones are guessed right the guessers pay the hiders a tally stick; there is also a larger "kick stick" that is held as the final stick; sticks are laid or stuck in the dirt in front of the team that has them; bets are made before each guess by holding up money— if someone catches your eye and holds up the same amount you have bet; bets can also be made on the final outcome; bone-games can take all night with the bones changing hands many times; psychology, singing, spirit power, intimidation, skill, and rarely cheating when revealing the bones are all attested; nowadays these games are usually held at the
summer canoe-races and big money can change hands; guessing gestures in the Stó:lō area include tapping one’s chest to indicate you are now going to guess, palms down moving one index finger in an arching motion pointing downward (both marked bones on inside hands), palm down pointing at the bones with thumb and index finger extended at right angles (both marked bones on outside hands), right hand held palm facing guesser’s left and index finger pointing left (both marked bones on guesser’s left), and right hand palm up fingers curled thumb thrusted pointing right (both marked bones on guesser’s right), syntactic analysis: intransitive verb, borrowed from Chinook Jargon /lahál/ hand game, gambling game < Chinook Proper according to Gibbs 1863 (Johnson 1978:137), attested by Deming, Salish cognate: Sechelt /lēhāl/ slahal game T77:15, Samish /lēhēl'/ the bone game, slahal game and /lēhēl'el/ playing slahal (gambling) G86:81.

Galloway: Upriver Halkomelem Dictionary, Halkomelem-to-English

sthí:m., //c-əl 4i[-]m tê s=ê`-m/, I'm picking berries!, semantic environment ['answer to question, chex wxe'í:t What are you doing?], attested by Elders Group, <éhltsel lhí:m.>, //lit-4-c-əl 4i[-]m/, I was picking!, semantic environment ['answer to question, lhí:m twéx metabol What were you doing?], attested by BHTTC; found in <éhí:mstel.>, //lit-4[-]m-c-əl/, I'm going to start picking!, (semological comment: immediate future meaning of present tense), semantic environment ['answer to question, xwe'í:t twéx metabol What are you going to do today?'], attested by Elders Group (10/20/76); example: <li lhí:m tw sa hégw kw'e skw'õ:l mexw?>, //lit 4i[-]m tê s=wèq=qé ê k`ê s=k`ê`l mexx=x/, Is your husband picking blackberries?, attested by AC, <éwá:lkekexw lhí:m.>, //lêwê-êt-c-ære x 4i[-]m/, Weren't you going to pick? (s?), (semological comment: perhaps continuous shown in going), phonology: downstepping, attested by EB, <éwêltas lhí:m.>, //lêwê'-êt-c-are x 4i[-]m/, I didn't pick anything!, literally /'it is nothing -my -nominalizer continuous picking/, (semological comment: emphasizes the extended continuous nature of the picking with no results, even though this is not overtly translated), attested by EB, <lêst lhí:m.>, //lêc-êt 4i[-]m/, We're going to pick (berries)., Let's pick (berries)., (Let's go picking.), syntactic comment: imperative 1p, attested by EB, AC.

<lémhí:m>, plv //CₐCₐ=4i[-]m/, cts, HARV ['lots of people picking'], (<R₃>= plural (agents)), phonology: reduplication, lengthening, syntactic analysis: intransitive verb, attested by Elders Group.

<léhí:m>, dmv //Cₐ=4im/, HARV I/a small person (old or young) is picking or trying to pick, an inexperienced person is picking or trying to pick, picking a little bit, someone who can't pick well is picking!, (<R₄>= diminutive (of agent or action or both)), (semological comment: note that a continuative meaning is also added), syntactic analysis: intransitive verb, attested by EB, SP, BHTTC; example: <léhí:m, t'ôt>, //Cₐ=4im, t'át/, 'She's picking, poor thing.', attested by EB.

<lémét>, pcs //4i=[Aê]=m=ê/oT/, [hémát], HARV /pick s-th, (harvest s-th)/, (<é-ablaut> derivational), ((<et> purposeful control transitivevizer), phonology: ablaut, syntactic analysis: transitive verb, attested by BHTTC; example: <txwém lhémetchexew.>, //txʰ=xʰ ́ém 4i=[Aê]=m=ê/oT-c-ære x 4i=[Aê]=m=ê= s=T-c-œl c-es=x/, I'm going to start picking., syntactic analysis: imperative, attested by BHTTC; found in <léméchelcha.>, //4i=[Aê]=m=ê/oT-c-œl c-es=x or 4i=[Aê]=m=ê= s=T-c-œl c-es=x/, I will pick it., phonology: stress-shift either resultative or merely resultative, (semological comment: possible resultative), attested by BHTTC.

<lémth>, df //4i=[Aê]=m=ê`, cts, FOOD ['picking food by the fingers before the meal'], (<é-ablaut> continuous), lx <élth> probably small portion lx as also in <sqwémth ~ sqwémth> lump (beside <sqwóm=ecel> hunchback) and in <ew=th=át> tease s-o (beside <ew=6(,:)=em> play) and in <líhíhëth> making fun and <lílhì:h(t)th't> making fun of s-o beside Musqueam /hi/lë =t/> make fun of him (because of accident or bad luck) and /Hë?=it/> insult him (Suttles 1984:14.6.15), phonology: ablaut, syntactic analysis: intransitive verb, attested by BHTTC.

<lámth't>, df //4i=[Aê]=m=ê`=oT/, FOOD ['pick food by one's fingers (before a meal)] , (<é-ablaut> derivational, perhaps resultative?), lx <ét=th> small portion, (<et> purposeful control transitivevizer), phonology: ablaut, syntactic analysis: transitive verb, attested by BHTTC; found in <lámth'tes>, //4i=[Aê]=m=ê`=oT-œl, /He picked food by his fingers., attested by BHTTC.

<lím>, HARV /picking (berries, etc.)/, see lhím.

<límès>, df //4im=œς/, CAN /pull in once with a canoe paddle wide or slow, pull in in turning (a canoe paddling stroke done by a bowman)/, lx <es> on the face, in the front or bow of a canoe, possibly root <lím> pick off, (pull off as in harvesting, pluck), syntactic analysis: intransitive verb, attested by Deming, Elders Group.

<límesem>, mdls //4im=œς=œm/, CAN ['pry (a canoe paddling stroke when the canoe is hard to
turn'), literally perhaps '/pull off on one's bow, pluck on one's bow'/, (="em" middle voice), syntactic analysis: intransitive verb, attested by BHTTC (9/10/76).

<lhímesem>, CAN ['pry (a canoe paddling stroke when the canoe is hard to turn)'], see lhímes.

<lhíq' ~ lhíq'>, free root //líq' ~ líq'/, TIME /'sometimes, (yes [RM])/], syntactic analysis: adverb/adverbial verb, attested by EB, LJ (Tait), also /yes'/, dialects: Chill., attested by RM, may be ultimately analyzable as <lih>, free root //líi//, /'when, (sometimes [EB])/ + <q> /'on something else, within something else'/, see <lhíq'>.

<lhíqw>, bound root, meaning unknown

<slhíqw>, dnom //s=qliw//, ANA /'flesh (human, non-human), meat (of dried fish, animal, or bird)/, (="sl= nominalizer), phonology: ambi-valent root, syntactic analysis: nominal, attested by Elders Group (3/15/72, 7/27/75), AC, other sources: ES /slíq"oq"/ meat, H-T <sléuq> (macron over e) flesh, example: <ewá:ta a slhíqw?>, //s=té =éla ?a =s=qliw'//, /'Have you got any meat?'/, literally /'is it none your meat'/, attested by AC.

<slheqwéla>, ds //s=qliwel=él=as or s=ti[=A=]s=qi[[=M2=]=]él=as/, ANA ['cheek'], literally /'flesh on the head/beside the ear'/, semantic environment [of fish, human, animal'], lx <él:la> on the side of the head, beside the ear, possibly /e-ablaut/ derivational or possibly merely valence triggered vowel reduction (before high toned/high stressed suffix), phonology: vowel-reduction due to stress-shift, possible ablaut, syntactic analysis: nominal, attested by Deming.

<slhiqwetsel>, ds //s=qliwél=él=es/, FSH ['long thin slices of fish removed to dry from slhíts'es (wind-driedsalmon)'], literally /'flesh on the back'/, lx <ets~=ets~=(ew)íts> on the back, phonology: weak-stress valenced suffix, syntactic analysis: nominal, attested by Elders at Fish Camp (7/11/78).

<lhístélémét>, EFAM /'feel embarrassed and shy because ashamed, be ashamed'/, see lhíy.

<lhístexw>, EFAM ['ashamed of s-th'], see lhíy.

<lhít'>, bound root //líit' pass around to give out/.

<lhít'et>, pcs //líit'=ét//, SOC /'pass it around (papers, berries, anything)/, ECON, TVMO, (="et" purposeful control transitivizer), syntactic analysis: transitive verb, attested by SJ, MV, Salish cognate: Squamish /hít'it/ give it around (esp. gifts at potlatch), distribute (tr.) W73:116, K67:330.

<lhít'es>, ds //líit'=és//, SOC ['pass around to give away (at a dance example)'], ECON, SPRD, lx <es> dollars, blankets, wealth, round objects, face, syntactic analysis: intransitive verb, attested by Elders Group.

<lhít'est>, pcs //líit'=ét=él//, ECON, SPRD, TVMO, (="ét" purposeful control transitivizer), syntactic analysis: transitive verb, attestd by Elders Group.

<lhít'es>, SOC ['pass around to give away (at a dance example')], see lhít'.

<lhít'est>, SOC /'pass it around to s-o'), see lhít'.

<lhít'et>, SOC /'pass it around (papers, berries, anything)/, see lhít'.

<lhíts' ~ lhíts'>, free root //líis' ~ lís'/, ABDF ['get cut'], HARV, FSH, HUNT, MC, phonology: ambivalent or variable-stress root, syntactic analysis: intransitive verb, attested by Elders Group, BJ
<lhíts'elhtset>, bens //ɪc'-ʌT-c-əT//, FOOD ['cut something off for s-o'], FIRE, HUNT, HARV, MC, (<>lhíts' benefactive), syntactic analysis: transitive verb, attested by EB, example: <lhíts'elhtsetelchelcha te sméyeth>, //ɪc'-ʌT-c-əT-c-əT-c-əT-c-əT-c-əT-c-əT c-s=məyəcəl, //I'll cut off some meat for someone.'l, attested by EB. <lhíts'elntoméclhclcha te sméyeth>, //ɪc'-ʌT-c-tám-c-əT-c-əT-c-əT c-s=məyəcəl, //I'll cut off some meat for you.'l, phonology: consonant merger, attested by EB, <lhíts'elntoméxchelx sméyeth>, //ɪc'-ʌT-c-T-ʌc-əT-c-əT c-s=məyəcəl, //Cut off some meat for me., (Cut off some meat for ME.'l), phonology: consonant merger, emphatic lengthening, attested by EB.

final suffix, then epenthetic re-stressing of first syllable (since the first three syllable would be unstressed)--this would work something like sentence-stressing changes--it may in fact be sentence-stress since the form was only obtained in a sentence; additional evidence that this is not derivational ablaut may be provided by the continuative form which has the original root vowel unchanged (see below), syntactic analysis: intransitive verb, attested by Elders Group, example: 

\[ \text{lhéch'elechá:ls te só:xwel ( ), } \] 
\[ \text{//híc'c}=\text{él}=\text{sl to sá-x*èlell/, 'to cut the hay, (He cuts the hay./)}, \] 
attested by Elders Group (5/5/75).

\[ \text{<lhílhech'elchá:ls>, cts //h[C,-c]=c}=\text{él}=\text{sl} \text{(sic for } h[C,-c]=\text{el}=\text{sls)}//, \text{HARV 'cutting (grass, hay)/, (<-R1-> continuative), (=<á:ls} \text{(sic for =els} \text{structured activity continuative)).}} \]

phonology: reduplication, syntactic analysis: intransitive verb, attested by Elders Group, example: 

\[ \text{<lhílhech'elchá:ls te só:xwel>, //h[C,-c]=c|=el=\text{sls to sá-x*èlell/, 'He's now cutting the hay./}, \]
literally /he's cutting on the bottom as a structured activity the grass'/, attested by Elders Group.

\[ \text{<lhíts'élqsel>, ds //h(i)c'=}=\text{élqsel}//, \text{ABDF ['cut off the tip of one's nose'], literally 'cut on the (tip of the?) nose'/, lx <=élqsel} \text{ on the (tip of the) nose, phonology: vowel-loss due to stress-shift to strong-valenced suffix, (semological comment: the form =élqsel seems to mean the tip of the nose rather than just the nose, this could be a feature of the initial =él or the final =el, or could just be due to the semantic environment), syntactic analysis: intransitive verb, attested by Elders Group.}

\[ \text{<lhíts'eqwem>, mdls //hic'=}=\text{eqwem}//, \text{ABFC ['cut one's hair'], lx <=eqw} \text{ on the hair, on the top of the head, (<em} middle voice), syntactic analysis: intransitive verb, attested by Elders Group.}

\[ \text{<slhíts'es>, dnom //s=híc'=}=\text{es}//, \text{FSH ['wind-dried opened and scored salmon'], ASM ['left on skin, kept open with spreading sticks, hung by the sticks on roofed wind-drying racks in drier windy areas such as the Fraser River canyon; not all types of salmon can be wind-dried well, some are better smoked or salted'], literally 'something cut/sliced on the face', (<es} nominalizer), lx <=es} \text{ on the face, syntactic analysis: nominal, attested by AC, MH (Deming), also <shxwílhts'es>, //sx'=}=híc'=}=\text{es}//, attested by EB, example: <shílah kwélém kw'e slhíts'es.>, //híle=R1-k*|=em k*|=e s|=híc'=}=\text{es}//, I'm making [wind-]dried fish/., attested by MH, <tesl táyem te shxwílhts'es.>, //c-=\text{sl} ìi=[A|=e]=y=\text{em} to sx'=}=híc'=}=\text{es}//, I'm making [wind-]dried fish/., attested by EB.}

\[ \text{<lhlhíts'ólts esp>, cts //h[C,-c]=c'=}=lts esp//, \text{HARV ['sawing wood'], FIRE, (<-R1-> continuative), lx <=ólts esp} \text{firewood, wood, phonology: reduplication, vowel-loss due to stress-shift to strong-valenced suffix, syntactic analysis: intransitive verb, attested by Elders Group.}

\[ \text{<lhts'ótythel}, \text{ds //h(i)c'=}=á-yéél//, \text{ABDF ['cut on the mouth'], ASM ['prob. about the lips, chin, or jaw'], lx <=ótythel} \text{ on the lip, on the chin, on the jaw, phonology: zero grade of root, vowel-loss due to stress-shift to strong-valenced suffix, syntactic analysis: intransitive verb, attested by Elders Group.}

\[ \text{<lhts'ches>, ds //h[i|A|=e]=c'=}=\text{es}//, [híc'=}=ts], \text{ABDF 'cut on one's hand, (cut one's finger [EB])/l, literally 'cut on the hand'/, (=<á:blaut} \text{resultative?), lx <=tese =}=ches} \text{ on the hand, phonology: ablaut, syntactic analysis: intransitive verb, attested by BJ (12/5/64), Elders Group, also 'cut one's finger'/, attested by EB.}

\[ \text{<shxwílhts'tses>, dnom //sx'=}=h[i|A|=e]=c'=}=\text{es}//, [sx'=}=híc'=}=ts], \text{ABDF ['a cut on the hand']/, (=<shxw=}=nominalizer), phonology: ablaut, syntactic analysis: nominal, attested by EB, example: <mí iy'áyel tel shxwílhts'tses.>, //mí C,-eC-==y=|=\text{sl to sx'=}=h[i|A|=e]=c'=}=\text{es}//, 'The cut on my
hand got well.', literally 'get/become better my cut on the hand/', attested by EB.

<lhísts'el>,  dnom //ṭi=[A=]=c'=x=ʔoll/., ABDF ['cut one's foot'], literally '/cut on the foot, cut on the leg/', (<é-aablaut> resultative), lx <-xel> on the foot, on the leg, phonology: ablaut, syntactic analysis: intransitive verb, attested by Elders Group (4/16/75).

<lhà:ts'ímél>, df //ṭi=[M=]=m(=)=ʔoll or ṭi(ic)c'=ʔoll=ʔoll/., PE ['comb (for hair')], HHG, possibly <metathesis> derivational, possibly <-em> intransitivizer, verbalizer or middle voice, possibly <-im> repeatedly, possibly <-el> get, become, come, go, inventive, possibly <-els> device to, (but <-els> would require an ad hoc loss of final s), possibly root <lháts'> cut, phonology: possible metathesis, possible consonant-loss, syntactic analysis: nominal, attested by EB, Elders Group, DM (12/4/64).

<lhà:ts'íméls te pítxel>, cpds //ṭe=c'ítulo-s te pí=x=ʔoll/., EZ /'centipede, and poss. millipede'/, [class Chilopoda and poss. class Diplopoda'], literally /'comb of the salamander', (<s> third person possessive pronoun), syntactic analysis: nominal phrase with modifier(s), possessive, attested by Elders Group (9/1/76).

<lhìts'elhtset>, FOOD ['cut something off for s-o'], see lhíts' ~ lhìts'.

<lhìts'egwem>, ABFC ['cut one's hair'], see lhìts' ~ lhìts'.

<lhìts'ets>, FSH /'cut s-th (with anything: knife, saw, scythe, etc.), cut s-o', see lhìts' ~ lhìts'.

<lhìwi:ws>, df //ṭi=[Ai]=w=í-ws or ṭi=ʔoll=ʔoll/., CLO ['petticoat'], probably root <lhíaw> run away probably due to the fact that petticoats tend to swing in unauthorized directions and have to be pushed down often), lx <-ì:ws> on the body, phonology: ablaut, syntactic analysis: nominal, attested by DM (12/4/64).

<lhìxw>., free root //ṭi=x'/., NUM ['three'], syntactic analysis: num, attested by BJ (5/64), NP (12/6/73), CT (9/5/73), AC, also <lhìxw>, //ṭi=x'/., attested by AC, other sources: ES and JH /ṭi=x'/, example: <lhìxw s(y)ilólém >., /ṭi=x'=s=ʔoll=ʔoll/., /'three years'/, phonology: updrifting, attested by AC, <ó:pel qas kwé lhìxw>., /ʔá-péq s kʷ<e> ṭi(x)'oll/., /'thirteen'/, literally /'ten and the (remote, abstract) three'/, attested by AC, also <ó:pel qas te lhìxw>., /ʔá-péq s te ṭi=x'/., literally /'ten and the (unmarked) three'/, attested by CT (9/5/73), <ts'kwéx̣qas te lhìxw>., /c=kʷ=éx̣q s te ṭi=x'/., /'twenty-three'/, literally /'twenty and the three'/, attested by CT (9/5/73).

<lhelhíxw ~ lhìxw>., ds //ṭi=x'=él=t ~ ṭi=x'=él=oll/., NUM ['three things'], nca <R5=> things, nca possibly an old distributive (see <xe:xèqthel> four to each also with <R5=>), phonology: reduplication, syntactic analysis: num, attested by IHTTC.

<lhxwálé: ~ lxwálé:>, ds //ṭi=x'=él~ ṭi=x'=él=oll/., NUM ['three people'], SOCT, ASM ['includes sasquatches'], nca <á:le> people, phonology: vowel-loss due to stress-shift to strong valenced suffix, syntactic analysis: num, attested by Elders Group, AC; found in <lhìxwáléchet>., //ṭi=x'=él-
c-əll/, *(There's) three of us.*/, literally /'we are three people'/, phonology: updrifting of stress/tone to last vowel before suffix of main verb subject suffix (also noted on object pronoun affixes in this position), attested by AC, example: <lhxwá:le sásq'=ets>, //4xʷ=ə:ɋ səsqʷ=əc//, *(three sasquatches'/, Elder's comment: "EB's grandmother told a story of three sasquatches and another one about four sasquatches', attested by Elders Group (1/30/80).

<lhelhxwále>, dmpn //C,ə=4xʷ=əlws//, NUM ['three little people'], SOCT. (<R₅=) diminutive plural), phonology: reduplication, syntactic analysis: num, attested by IHTTC.

<lhxwáléws>, ds //4xʷ=əlws//, NUM ['three leaves'], EB, nca <áléws> leaf, leaves, phonology: zero-grade root, perhaps allomorph before strong-valenced suffix, perhaps vowel-loss due to stress-shift to suffix, syntactic analysis: num, attested by AD.

<lhxwáléws>, ds //4xʷ=əlws//, EB ['vanilla leaf'], *[Achlys triphylla*], literally /'three leaves (since each leaf is trifoliate)/, ASM ['leaves hung up to scent the house (with a vanilla-like scent)'], nca <áléws> leaf, syntactic analysis: nominal, attested by Elders at Fish Camp (7/27/79), also <lhxwáléws>, //4xʷ=əlws//, attested by AD.

<lhxwá:lt'h's>, df //4xʷ=ə:ɋt'h's//, NUM ['third month since'], TIME, nca <á:lt'h's> meaning uncertain, affix not attested elsewhere, possibly month/moon, syntactic analysis: nominal?, num?, attested by AK (in IHTTC).

<lhxwá:lth>, ds //4xʷ=ə:ɋth//, NUM /'three times, thrice', TIME, nca <á:lh> times, occasions, phonology: zero-grade of root, either allomorph or phonological rule of vowel-loss due to stress-shift to strong-valenced suffix, syntactic analysis: num, adverb/adverbial verb, attested by AC, also <lhxwá:lth>, //4xʷ=ə:ɋth//, attested by Elders Group.

<lhxwámeth'>, ds //4xʷ=əmē:ə'//, NUM /'three ropes, three threads, three sticks, three poles, (three long narrow objects)/, EB, MC, nca <ámeth'> long narrow object, pole, stick, rope, thread, phonology: zero-grade of root, syntactic analysis: num, attested by AD.

<Lhelhxwáyleq>, df //C,ə=4xʷ=ɇyələq//, PLN ['Three Creeks Mountain'], ASM ['mountain at east end of Seabird Island, i.e., Mt. Hicks or Bear Mt., probably Mt. Hicks since this is probably the mountain which Síhlíxw flows down from Hick's Lake and Síhlíxw is a creek with three tributaries; the mountain in question can be seen heading east on Haig Highway where the last road with a stop sign joins Haig Hwy. from the north; if one stops there and faces north, the last mountain at the east end of Seabird Is. is Lhelhxwáyleq'], literally /'three creeks'/, (<R₅=) derivational possibly diminutive plural), 1x <áyleq~áy eq~oyeq> creeks (compare St'ít'xoyeq> (another place name, lit. little forks in a creek)), phonology: reduplication, zero-grade of root, syntactic analysis: nominal, attested by AK (8/30/77), source: place names reference file #253.

<lhxwáyiws>, ds //4xʷ=ɇyiws//, NUM ['three pants'], CLO, nca <ɇyiws> pants, phonology: schwa-grade of root, vowel-change due to stress-shift to strong-valenced suffix, syntactic analysis: num, attested by AD.

<lhxwellxá'>, ds //4xʷ=Ɋlxʷ=Ʉxʷ=ɇl//, NUM ['thirty'], probably <ə-ablaut> derivational, nca <əlxá ~ elhxá> tens, times ten, phonology: possible ablaut or schwa-grade of root + secondary stress returned to root, syntactic analysis: num, attested by AC, BJ (12/5/64), MC (9/5/73), also <lhéxwellxá'>, //4xʷ=ɇl//, attested by DM (12/4/64), CT (9/5/73), others.

<lhxwellxá:s>, ds //4xʷ=Ʉxʷ=ə=ɇl//, NUM ['thirty cyclic periods'], nca <ô:s> cyclic period, dollars, blankets, on the face, phonology: ablaut, vowel merger, syntactic analysis: num, attested
by DM (12/4/64), example: <lhíxwes kwóte ~ lhíxw kwóte>, //4íx"=es k₄₄ κατς ~ 4íx"k₄₄ κατς, /'three quarters, seventy-five cents/', attested by Deming, <lhíxwes mít ~ lhíxw mít>, //4íx"=es mít ~ 4íx"mít/, /'three bits, three dimes, thirty cents/', attested by Deming. ASM /'three cycles periods', <lhíxwes kwóte>, //4íx"=es k₄₄ κατς, /'third quarter moon, gibbous moon/', attested by Elders Group (3/12/75), ASM /'three Indian blankets, three dollars', <lhíxwes>, //4íx"=es/, /'three Indian blankets, three dollars/', source: <tléqus> (macron over e) Boas Scowlitz field notes--APS Library.

lhíxwís, ds //4íx"=íwls/, NUM /'three birds', HUNT, nca <íws> on the body; bird, phonology: zero-grade of root with strong-grade suffix, syntactic analysis: num, attested by Elders Group (3/29/77).

lhíxwmó:t, ds //4íx"=má:t/, NUM /'three kinds, three piles of things/', MC, nca <mót ~ =mó:t> kinds, piles of (different) things, phonology: full-grade root plus full grade suffix., syntactic analysis: num, attested by IHTTC, Elders Group.

lhíxwóls, ds //4íl=[Aν]=x"=áls/, NUM /'three fruit in a cluster (as they grow on a plant)'), HARV, nca <íls ~ =ól:s> fruit, spherical objects, rocks, balls, phonology: ablaut, syntactic analysis: num, attested by AD.

lhíxwó:lh, ds //4íx"=á:lh/, NUM /'three canoes, three wagons, three conveyances (any form of transportation), three boats/, CAN, TVMO, nca <ól:lh ~ =ólwh ~ =ólwh> canoe, conveyance, phonology: zero-grade of root with strong-grade of suffix, syntactic analysis: num, attested by Deming, also <lhíxwó:whelh>, //4íl=[Aν]=x"=ówhelh/, also /'three canoes, three boats/', attested by AD.

slhíxws, ds //ís=íx"=s/, NUM /'three o'clock (< the third hour); Wednesday (< the third day)'), TIME, nca <s~...s> (circumfix) day of the week; o'clock prob. related to <es ~ =ó:s> cyclic period, phonology: syntactic analysis: num, nominal, attested by Elders Group, Deming,
SJ, also <slihí·xws>, //s=tl·x*=sll/, attested by AC, <wetéses te slihí·xws>, //wə·tlęs·əs te
s=tl·x*=sll/, /'when it gets three o'clock'/, attested by AC, example: <wets'íml te slihí·xws>,
//wə·c'ım=tl te s=tl·x*=sll/, /'(It's) nearly three o'clock.'/, literally /'contrastive= nearly
= get/become the third hour'/, attested by Deming, <yiyelaw te slihí·xws>, //C=t=əw te s=tl·x*=sll/, /
'(It's) past three o'clock.'/, Elder's comment: "as close as the Stó:lō got to minutes", attested by SJ
(1/20/77).

<slihí·xws>, df //s(=)t=tl·x*=sll/, PLN 'creek from Hicks Lake [sic? from Deer Lake] that's actually three
creeks all leaving from the lake, probably Mahood Creek, (also Hick's Mountain [LJ])/, ASM
['Mahood Creek enters and leaves Deer Lake (the only lake on Hicks Mountain in the right area)
and also has a tributary after it leaves and before it joins Johnson Slough; the place name Qwôhôls
is sometimes identified as Mahood Creek but from its meaning it could well be Johnson Slough
instead'], probably <s> nominalizer, probably <ye> travelling by, syntactic analysis: nominal,
attested by LJ (Tait)(visiting IHTTC), source: place names reference file #190, also /'also Hick's
Mountain', attested by LJ (8/79 tape by AD).

<slhí:xwes>, NUM ['three containers'], see lhí:xw.

<slhí:xweqw>, NUM ['three fish'], see lhí:xw.

<slhí:xwes>, NUM /'three dollars, three tokens of wealth, three blankets (Boas), three cyclic periods'/, see
lhí:xw.

<slhí:xwmó:t>, NUM /'three kinds, three piles of things'/, see lhí:xw.

<lhí:x>, ds //l=tl·x=|x=əs=əml/, REL /'to paint red or black (spirit dancer, Indian
doctor, etc.)/, SPRD, IDOC, ASM ['may include other colors (white is used rarely on spirit dancers), but red and black are
the usual colors, they signify different powers or different quests, red is usually more powerful and is
used by more ritualists'], semantic environment ['Indian religious participant or ceremony'], (<-ablaunt> derivational, perhaps resultative?), phonology: ablaut, probably not a separate root,
(semantic comment: probably a derived root since painting of the kind done here is done by
spreading colored grease on the skin and root lhá:x is spread), syntactic analysis: intransitive verb,
attested by BHTTC.

<lhíxesem>, mds //l=tl·x=|x=əs=əml/, REL /'to paint one's face red or black (spirit dancer, Indian
doctor, ritualist, etc.)/, SPRD, IDOC, lx <es> on the face, (<em> middle voice), phonology:
ablaut, syntactic analysis: intransitive verb, attested by BHTTC.

<lhíxet>, pcs //l=tl·x=|x=əT/, REL ['spread red or black paint on s-th(?)/s-o'], (<et> purposeful
control transitivizer), phonology: ablaut, syntactic analysis: transitive verb, attested by BHTTC.

<lhí:x>, REL /'to paint red or black (spirit dancer, Indian doctor, etc.)/, see also lhá:x ~ lhá:x.

<lhíxesem>, REL /'paint one's face red or black (spirit dancer, Indian doctor, ritualist, etc.)/, see lhá:x ~
lhá:x.

<lhíxet>, REL ['spread red or black paint on s-th(?)/s-o'], see lhá:x ~ lhá:x.

<lhiyó·qwt>, df //lhiyá·qʷtl/, TIME /'be last, be behind, after'/, TVMO, PLAY, syntactic analysis:
adverb/adverbial verb, attested by Elders Group, AC, example: <mí lhíyó·qwt>, //mí= lhiyá·qʷtl/, /'He
came in after., He came in behind.'/.

M

<mà>, free root //mà/, EFAM /'meaning uncertain/, (perhaps right, correct)/, syntactic analysis: particle?, attested by Elders Group, example: <lí mà?>, //lí mà//, /'Is that right?/, attested by Elders Group, Salish cognate: perhaps Nooksack /mæ/ /'meaning uncertain/, (perhaps then, until)/.

<má >, free root //má ~ má'//, MC ['come off'], ANA, phonology: allomorph má before vowels, syntactic analysis: intransitive verb, attested by Elders Group, example: <lí mà?>, //lí mè//, /'Did it come off?/, phonology: downstepping, attested by Elders Group, <me má te yélés.>, //mə mə tə yélës//, /'The tooth came out.'/, attested by EB.

<ma'alèsem>, mdls //mè?=ə=ə=ə=ə=α=M2=॥=ə=ə=ə=ml//, ABDF /'castrated, he was castrated/, lx <élés ~ =elís> tooth, teeth, on the tooth/teeth, (=<em> middle voice), phonology: assimilation of the first vowel of the suffix (ê) to the final vowel of the root (à), glottal-stop insertion after vowel-final root; another explanation of the first stressed vowel could be metathesis (that is, //mè?=ə=M2=॥=ə=ə=ml// which would account for the stress-shift from the root to the first syllable of a suffix which seldom (if ever) allows stress on the first syllable (only on the second) and which is not attested elsewhere with an initial <a> /e/ vowel; or instead of processes one could say that <má> has allomorph <má' > before vowels (vowel-initial suffixes); a fourth possibility is that the root allomorph here is <ma'á> with an echo-vowel; historically the glottal stop is probably present in the root and lost except before vowels, syntactic analysis: intransitive verb.

<ma'elèstem>, pcs //mè?=ə=ə=ə=ə=α=α=α=M2=॥=ə=ə=ə=ml//, ABDF /'castrated, he was castrated/, lx <elés ~ áelés> on the testicles, (<=t> purposeful control transitivizer), (<=em> passive), phonology: consonant-loss and vowel-loss of final <el> in any suffix or root by regular rule before <(=e)t> transitivizer and several other suffixes, syntactic analysis: transitive verb in passive > intransitive verb, attested by DF (on Banff trip 8/30/78), Salish cognate: Musqueam /-ə=ə=ə=ə=ə/ -ó=ə=ə=ə=ə / -ó=ə=ə=ə=ə/ testicles (Sutcliffe ca1984:14.5.68).

<šxwemá>, incs //x=ə=më//, MC ['open'], semantic environment ['store, business, prob. box, door, etc.'], ECON, BLDG, SOC, (<sxwè=> become, get), syntactic analysis: intransitive verb, attested by IHTTC, example: <lí xwes šxwemá te shtxiwímálè?>, //lí x=ə=x=ə=më tə s=xt=ıy=mn=ë=ì=ì//, /'Is the store still open?/, dialects: Chill., attested by OW and AH (Deming).

<šxwemá>, stvi //x=ə=më//, MC ['it's open'], semantic environment ['box, store, business, building, door'], ECON, BLDG, HHG ['be open (at the top)'], SOC, DESC, (<s=> stative), syntactic analysis: intransitive verb, adjective/adjectival verb?, attested by IHTTC, EB.

<šxwemá=áls>, sas //x=ə=më?=ë=ìs//, BLDG ['open the door'], (<áls = =áls> structured activity non-continuative), phonology: possible downstepping in the suffix stress if =á:ls is not an allomorph, syntactic analysis: intransitive verb, attested by IHTTV.

<šxwemá=áls>, dnom //x=ə=ł=më?=ë=ìs//, BLDG ['doorman'], SOC, (< = > nominalizer), phonology: stress-shift, syntactic analysis: nominal, attested by IHTTC.

<šxwemá=ámel>, dnom //x=ə=ł=më=e=ə=ml//, HHG ['empty container (like bottles esp. if there's lots')], (<s=> nominalizer, sxwè=> become, get), lx <ámel = =ómél = =emél> part, portion, member, syntactic analysis: nominal, attested by IHTTC.

<šxwemá or lexwemá>, df //lx=ə=më?(=ə=më(?)=ə=ml//, DESC /'open (of a bottle, basket, etc.)/, MC, HHG, (<=em> intransitivizer or middle voice), possibly <lexw> always or possibly the <le> may be a separate word (past tense third person subject), phonology: the
speaker who gave this word here dropped the glottal-stop even before a vowel which allowed vowel merger, or if the suffix took the form of =m here the glottal stop would either be dropped or converted to length; either way the result would be the same; if there is the lex= prefix then consonant merger takes place; vowel-loss of the e in xwe= also, syntactic analysis: intransitive verb, attested by CT.

<shxwemá'am>, stvi //më=më=m//, DESC ['be empty'], (<<s>> stative, xwe= become, get), (<<m~ =em>> intransitivizer or middle voice), phonology: these speakers here lose the glottal stop without vowel merger, and apparently have =m rather than =em (other derivations show either glottal stop or length from vowel merger) (compare <shxwema'am> an opener, syntactic analysis: adjective/adjectival verb, attested by IHTTC.

<shxwéma'am>, dnom //s=x*ə=më=ml/, strts. HHG 'an opener, can-opener, bottle-openerl', ACL, (<á-ablaut> resultative, <=' = nominalizer), (<=em> intransitivizer), phonology: ablaut, stress-shift, syntactic analysis: nominal, attested by IHTTC.

<shxwémeqel>, dnom //s=x*ə=më=qel//, HHG 'an opener, can-opener, bottle-openerl', ACL, (<<s>> stative or nominalizer), (<=' = nominalizer), lx <=eqel ~ =qel> container, phonology: stress-shift, vowel-shift (of root vowel to schwa-grade), syntactic analysis: nominal, attested by AD.

<shxwémeqělys>, sas //s=x*ə=më=qə(l)=l-s//, HHG /'take a cover off, take it off (a cover of a container), open it (bottle, box, kettle, book, etc.)/, (<<we~ =em>> become, get), lx <=eqel> container, (<=et> purposeful control transitivizer), phonology: consonant-loss of l before =et, vowel merger (twice), (if =eqel has allomorph =qel here instead then length would have to be in an allomorph of root má', that is má: before consonants), compare <shxwémá:t> open it for possible long allomorph also, syntactic analysis: transitive verb, attested by IHTTC, Deming, EB, Elders Group, example: <shxwémá:qet te kw'ówxe>, //x*ə=më=qə(l)=T t= k'|=x*ə=l/>, 'Open a box/', attested by EB, <shxwémá:qelha ta' pékw.>, //x*ə=më=qə(l)=T t= t- e3=pék'//, 'Open your book/', attested by Elders Group, <shxwémá:qet ta (skú:k, lhémkiya)>, //x*ə=më=qə(l)=T t=e3 (s=kú-k, l=m=k=iye)\ //</, 'Open your (cooker, kettle)./', attested by EB.

<shxwémá:t>, pcs //x*ə=më=(e)T/\ //</, MC ['open it'], (<=eT> purposeful control transitivizer), phonology: length either comes from vowel merger or from an allomorph of má’ (/më=/ > l=më-/ before consonants (glottal stop historically > length in Upriver Halkomelem before consonant; here the consonant is =t), syntactic analysis: transitive verb, attested by IHTTC.

<shxwémá:x>, pcs //x*ə=më=x3//, MC /'open it (door, gate, anything)/, HHG, (<=ex> purposeful control transitivizer inanimate object preferred), phonology: vowel merger, syntactic analysis: transitive verb, dialects: Chill., attested by Deming, also <shxwémá:x>, //x*ə=më=(e)x3//, attested by AC, also <shxwémá:x>, //x*ə=më=x3//, dialects: Sumas/Matsqui, attested by Deming (5/20/76), example: <shxwémáx te xálh>, //x*ə=më=(e)x3 t=e3=k|x3=x3'\ //</, 'Open the door/', attested by AC.

<shxwémá:x>, pcs //më=(e)x3//, MC /'take it off (of a table example), take it away (from something), take it off (of eyeglasses, of skin off an animal), take s-o off/away (from something), take s-th out (a tooth for ex./), (<=eX> purposeful control transitivizer indefinite object preferred), phonology: vowel-loss (in suffix), syntactic analysis: transitive verb, attested by Elders Group, AC, EB, CT, HT, HT, example: <shxwémá xwe léts'e>, //më=x3 k*=e lóc'ë=\ //</, 'Take one off/', attested by Elders Group, <shxwémá ta st'ólê’oléstel.>, //më=x3 t=ë s=t’alë=\ //</, 'Take off your eyeglasses./', attested by AC, <le
máx̣əs te yéləs.>, /lə mè=x̣-əs tə yéləs/, 'He went (go) to take out the tooth.', attested by EB, <le máx̣em te yéləs.>, /lə mè=x̣-əm tə yéləs/, 'The tooth got taken out.', syntactic analysis: passive of pcs, attested by EB.

<há mêx̣>, cts /hè-mè=x̣/IL, MC ['taking s-th off'], HUNT, (<há>- continuative before resonants), phonology: vowel-reduction to schwa-grade of root after strong-grade stressed prefix, syntactic analysis: transitive verb, attested by EB, CT, HT, example: <há mêx̣ te kweléws te sméyəθ>, /hè-mè=x̣ tə kʷʷələ=əwə sə=méyəθl/,'skin(ing) an animal, taking off the skin of an animal', attested by CT, HT.

<memáx̣>, plv /C,ə=mè=x̣//, SOC 'to separate people fighting, to split up people fighting!', (<R5>= plural object), phonology: reduplication, syntactic analysis: intransitive verb, attested by EB, Salish cognate: Musqueam /məmèʔx̣l/ remove it (plural perfective) from /mèʔx̣l/ remove it Suttles ca1984: ch.7 [p.105].

<melx̣látst>, pcs /mè=x̣=lə=ʃl=2=M=]=c=T or mè=x̣=lə=ʃl=2=M=]=A=E]=c=T/IL, pcs, /mələ kə=ʃl=2=M=]=c=T or mè=x̣=lə=ʃl=2=M=]=A=E]=c=T/IL, MC ['take off from the bottom of s-th (a pack for ex.)'], lx <=lets (==látst ?) on the bottom, possibly <metathesis> derivational, possibly <á- ablaut> resultative?, (<e=e)x purposeful control transitivizer inanimate object preferred, and =t purposeful control transitivizer), phonology: possible metathesis, possible ablaut, syntactic analysis: transitive verb, syntactic comment: doubly transitivized stem with two purposeful control transitivizers, attested by Elders Group (3/16/77).

<semáx̣el>, strs /s=ə=mè=x̣ʔəl/, ANAH ['(have a) bare foot'], CLO, literally 'have taken off on the foot', (<s=> stative), (<he> resultative), lx <=x̣el> on the foot, phonology: consonant merger, syntactic analysis: adjective/adjectival verb, attested by EB, also <sebáxel>, /ls=ə=bè=x̣ʔəl/, phonology: b traces in DM's (and the Lorenzetto family's) speech, attested by DM (12/4/64).

<mácḥe>, free root /mècəh/IL, /məcəts/IL, FIRE 'match, matches', syntactic analysis: nominal, attested by CT, HT, borrowed from English or from Chinook Jargon <matches> match itself or course from English <matches> Johnson 1978:363, example: <éxqst te máčhe qesu yéqwt kwə sisʔ>, /ʃʔ̥x=q=T tə mècəs qə-s-u yəqʷ=τ kʷʷə sɨ]=[C,ə=]qʔ/IL, 'strike the match and light the kindling?', attested by CT, HT.

<mákwlh>, possibly root /mèkʷhɪl/, ABDF ['get hurt'], syntactic analysis: intransitive verb, attested by JL, Salish cognate: Squamish /máʔkʷhɪl/ W73:147, K67:256, also <mákwlh= mákwlh/IL, /mèkʷhɪl/IL, attested by EB, example: <tsel mákwlh; tsel welhéeq' ʃə stəʔʃeq, ʃə=Ma=tsel mèkʷhɪl; c-əl wə=təq=əq' lə tə sə=ʔə=ʔəqʔ/IL, 'I got hurt; I fell splat in the mud.', attested by EB.

snowing on the mountain/., attested by AC.

<meqó:s>, dnom //m=əq=ə=ə//, TIME /'about December, (January to February [Billy Sepass])'/,
WETH, literally /'fallen snow season/', ASM ['each month name applies starting from the first sliver
of moon visible after the black moon and lasts till the next first sliver roughly, but it is used about the
time the event described usually happens, for meqó:s this is often in December but William
(Billy) Sepass of Sardis, B.C. placed it January to February in Jenness's field notes; the English
month it applied to probably depended on where one lived and what was the average month the
year's major snowfalls occurred in in the past dozen or more years; it may have been that in Sepass's
time (ca 1856-1936) before his interview (ca Jan.-Feb. 1936) the major snowfalls were more often
in Jan. to Feb., or it may be that there was snow on the ground when he was interviewed; the more
recent elders may also be reflecting more recent climatic changes to snow in December in their
areas (it snows earlier in the Tait area than in the Sardis area example)]], lx <=ọ:s> cyclic period,
round thing, on the face, phonology: vowel-shift to schwa-grade of root before full-grade suffix,
also vowel merger, syntactic analysis: nominal, attested by Elders Group, also <meqó:s>, //m[-Aa-
]q=ə=ə//, also /'about January to February/., phonology: ṣ-ablaut automatic on root vowel before
=ọ:s =-es suffix, there is also vowel merger of the final root vowel and suffix vowel, attested by
Diamond Jenness's field notes, William Sepass calendar.

<mótl'>, probably root //máè'/, EFAM ['(be) stumped'], syntactic analysis: adjective/adjectival verb, attested by Elders Group, example: <mótl' te Hank>>, //máè' te Hank///, /Hank is stumped.'/

<mótl'>, probably root //máè' ~ mèè'//, WETH ['be dirty'], DESC, ASM ['(blowing dirt or dust?)'], syntactic analysis: adjective/adjectival verb, probably borrowed from Squamish /máè'/ be dirty, comment: since chmítl' shows the Halkomelem root is métl' (as in one Squamish alternant) and since Halkomelem would have inherited mól', not mótl', corresponding to the Squamish form /máè'/, example: <mótl' te swáyel>>, //máè' te s=wêyêll///, /It's a dirty day./, Salish cognate: Squamish root /máè' ~ mèè' be dirty as in /mèè'/ get stained, get dirty and /máè'-n/ make dirty (tr.) W73:79,250, K69:45.

<chmítl'>, strs //c=ma[s=A=ê]/, BLDG ['(be) dirty'], DESC, (<ch>= have, be), (<í-ablaut> resultative), phonology: ñ-ablaut is the expected resultative on roots with ñ (schwa), syntactic analysis: adjective/adjectival verb, attested by EB (12/1/75), Salish cognate: Lushootseed /bíë'-il-dupl muddy, dirt (derived from root /bíë'(i)/ smash, crush by Hess, H76:36-37 but may be a separate (or related) root as here and in Squamish, more cognates would be helpful.

<móyhtel>, SOC /help out, go help, pitch in, help one another'/, see máy.

<móyt'>, pcs //má-y=Tll/, ABFC ['aim it'], (semological comment: not clear whether it also is a member of domains of HUNT, FSH, GAM, CAN, etc.), (<tt> purposeful control transitiivizer), syntactic analysis: transitive verb, attested by EB, AD.

<mómiyt>, df //má[-C,ê-]y=Tll/, ABFC ['aiming it'], comment: one would expect móníyt /má[-mê-]y/ as a more regular continuative, (irregular)stress-shift onto infixed reduplication, phonology: reduplication, irregular stress-shift, syntactic analysis: transitive verb, attested by EB (4/12/78).
<môkweset>, ABDF ['kiss s-o'], see mêkw.

<môkwéth>, ABFC '(take all of themselves, pick themselves all up)', see mêkw' ~ môkw'.

<môs>, bound root //môs=four//.

<smôs>, df //s=s=môs=sl/, TIME ['Thursday (a less common name)'], lx <s=...=s> -th day, hour, phonology: consonant merger, syntactic analysis: nominal, attested by AD and SP (both in BHTTC 11/9/76), usage: AD's parents and SP's father and stepmother used this form.

'Híltu te môxwoya.', //híltu t móx =ay //, /'The belly-button is a Hindu.'/, comment: comparison between the concentric wrapping of the turban and the concentric rings in some navels, usage: in the Híltu or Heel-toe song (sung to 'Jimmy Crack Corn'), attested by BHTTC.

<mímxwoya>, dmn //C í=máx =ay //, ANA /'little belly-button', (<R4=> diminutive), phonology: reduplication, syntactic analysis: nominal, attested by BHTTC, example: <Híheltu te mímxwoya.>, //C í=hltu t C í=máx =ay //, /'A little belly button is like a little Hindu.'/, usage: in the Híltu or Heel-toe song, attested by BHTTC.

<múmesmes>, EZ ['small adult cow'], see músmes.

<múmesmes>, free root //músmes=s/, EZ /'cow, bull, beef/', ['genus Bovis'], FOOD /'beef/', ACL, phonology: reduplication from the donor language, thus further reduplicating in derivations is tolerated, syntactic analysis: nominal, noun, attested by AC, Elders Group, Deming, EB, others, borrowed from Chinook Jargon <moos-moos> /músmus/ cow, horned cattle, beef, buffalo itself variously from Chinook Proper, Klickitat, Yakima or Cree Johnson 1978:287, example:

<te ts’q’éyx múmesmes>, //c’ =q’íx músmes=s/, /'the black cow/', attested by EB, <p’ip’eth’élmet te múmesmes>, //p’[í-C,ó- ]e’=ólmáx =éT té músmes=s/, /milking the cow/, literally /'squeezing s-th/s-o on the breasts the cow/', attested by Elders at Fish Camp (7/19/78).

<múmesmes>, dmn //mú= C,ó=jsmes=s/, EZ ['small adult cow'], (<=R1=> diminutive), phonology: double reduplication tolerated because the original reduplication was borrowed and not native, syntactic analysis: nominal, attested by IHTTC.

<mélúmesmes>, dmpn //m=ó=lú=C,ó=jsmes=s/, EZ /small adult cows, (small adult cattle)/, (<=él=) plural, phonology: non-redundicative infix, reduplication, syntactic analysis: nominal, attested by IHTTC (7/15/77).

<múmesó:llh>, dmn //músmes=á:lh/, EZ ['calf'], lx <ó:llh> offspring, young, phonology: downstepping, syntactic analysis: nominal, attested by AC, CT, HT.

<múmesò:llh>, EZ ['calf'], see múmes.
<n>, comment: The sound /n/ appears only in borrowings, a few words of baby talk, and some very old place names. The place names may have been obtained by George Gibbs ca 1858-1863 through speakers of Downriver Halkomelem (thus Tzeachten and perhaps Skulkayn for places which all fluent Upriver speakers pronounce Ch’iyáqtel /è’iy’e=tèl/ and Sq’ewqéyl /s=q’èw=qił/)., comment: Historically all Upriver Halkomelem n铃・It is so far not clear how recent that change was. There is a slight chance that it was still incomplete when Gibbs was gathering his information and that some of his Chilliwack and Tait word lists and place names may reflect real Upriver Halkomelem n’s., comment: Until more work on comparative Halkomelem is done and records on Gibb’s informants/speakers in the National Archives can be studied, the best guess is probably that Gibbs had a downriver speaker for some of the forms (possibly one from the Kwantlen dialect of Fort Langley). Words in baby talk are known to often tolerate sounds which are not phonemic in adult language. That seems the reason for the forms here..

<nána>, possibly root /nɛnɛ or R7=nɛ/ [nænæ], EFAM /’hurt, sore’/, ABDF, possibly <R7=> diminutive? or> meaning uncertain, possibly compare with <lá:la> Well!, phonology: possible reduplication, syntactic analysis: nominal?, intransitive verb?, usage: baby language, attested by AD, Elders Group (2/13/80), TG, example: <Where’s your nána?>, //Where’s your nɛnɛ/, /’Where’s your hurt?, Where’s your sore’/, usage: language switching, attested by TG.

<naníth>, possible root or stem, bound //nɛni(=)əè or nɛ(=)niè// root meaning unknown

<Snaníth>, df //s=ɛnɛnɛ/, PLN [‘a village at the south end of former Sumas Lake on the mountain’], literally /on the other side of the lake/, possibly <s=> stative or nominalizer, possibly <ɛth> edge, possibly root <lóli(y)> be leaning, comment: this may have been the village with houses built out over the protection from mosquitoes (described by Boundary Survey records), in which case a meaning of “leaning on the edge” might be appropriate; the literal meaning given above (“on the other side of the lake”) is provided by the Elders Group, phonology: possible reduplication, syntactic analysis: nominal, dialects: Sumas (thus the n’s and the th - ts variation), attested by Elders Group (8/31/77), other sources: Wells 1965 (1st ed.):23 <nah-NEETS> in records as Saneats also, Wells 1966, source: place names reference file #258.

<Nesókwech ~ Nasókwach>, df //n=ɛ=sák =ɛc or n=ɛ=sák* =ɛc//, PLN [‘Middle Creek’], possibly <le= ~ lexw= (downriver ne= ~ nexw=)> always, possibly <ech> on the back, possibly root <sókw’> inner cedar bark, possibly compare <Sókw’e’ách> a creek between Hope and Yale, syntactic analysis: nominal, source: Wells 1965 (1st ed.):13 <neh-SAK-wach.ch> , Wells 1966 <ne-SA-kwatch>, also <Lóyeqw’e’áts or Lóyaqw’e’áth’> or Lóyaqw’e’áth’, df //láy=’q”ɛʔc or láy=’q”ɛʔc’ or láy=’q”ɛʔc’//, PLN [‘Middle Creek’], possibly <loye> only, possibly root <qw’e’áts> little sucker-fish with big salmon-like mouth (prob. the largescale sucker, Catostomus macrocheilus), syntactic analysis: nominal, source: Wells 1965 (1st ed.):13 <LIY-ah-quh-AHT’z> from map by Billy Sepass where it is spelled <Lyaaquaatz>.

nominal, attested by SJ (Deming 3/15/79), also <qw’óeqw’ollys>, //C,θ=l=q”aq=iyáls/, attested
by SJ (Deming 3/15/79), also <qw’óeqw’kwyóls>, //q”á=[l]=l=q”iyáls/, comment: <kw>
probable error or mistranscription, attested by Deming (7/27/78).

<qw’óeqwet>, ABFC ['whip it'], see qw’óqw.

<qw’óeqwel>, df //q”al=C=θ or l=q”=Aåθ=θ=l/=l, EZ ['(be) tame'], SOC, probably <=AåR1=>
resultative or continuative, phonology: reduplication, probable ablaut, syntactic analysis:
adjunctive/adjectival verb, attested by CT (6/8/76), Salish cognate: Squamish /q”al/ tame (ab.
person), reserved, distant and /q”á-q”ay/ very tame, friendly and /q”áy-at/ tame (tr. verb)
W73:262, K69:83; Lushootseed root /q”=al(a) tame as in /l=θ=q”=al/ it is tame and /l=θ-q”=al-ex”/ it is
getting tame H76:425, Samish dial. of N. Straits lq”éI=q”=el/ tame G86:91; these cognates show that
Halkomelem may have either borrowed the word from a language with /a/ or may have ablaut since
the Halkomelem cognate should have /e/; example: <qw’óeqwel (smiyeth, spá:th, sqwemáy).>,
/lq”=el=C=θ=l (s=méyəθè, s=pθ-e, s=q”ən=θyyl/, /(It's a) tame (animal, bear, dog).', attested by
CT.

<qw’óeqw’el`ex>, df //q”á=[l]=θ=l(=)θ or q”=Aåθ=θ=l(=)θ or q”á=[l]=θ(=)θ or l=θ=θ(=)θ /=θ, LANG
‘excuse me, Excuse me., Watch out.’, semantic environment ['used when passing closely to someone,
polite'], root meaning prob. <qw’ólh or qw’álh>, bound root /q”aθ or q”=e// watch, notice as in
<qw’óeqwel> be on the watch for s-o and <qw’óeqw’el`ex> notice s-o/s-th or poss.?.
<qw’óeqwel> tame, possibly <=e> distributive, possibly <=R1= or =AåR1=> resultative or
continuative, (semological comment: there is no inflection for me present in the word), phonology:
reduplication, voicing, liquidization ablaut, syntactic analysis: intrasitive verb, interjection?,
syntactic comment: can be used all by itself as an utterance, attested by Deming, RP and EB, AC,
Salish cognate: Squamish /q”á-q”ay?áy?áy?áy?=q”=θəq”tqáncut-èn/ excuse me. I am going to pass by (a phrase of politeness when inconveniencing someone in a
narrow passage) cf. ? /q”áy?áy?=q”=θə/ shy, nervous, wild (ab. animals) W73:92, K69:83 (where one is
directed to K67:364); found in <qw’óeqwel`haxa>, /lq”=el=C=θ=l(=)θ=θtl/, 'Excuse me., Watch
out.', attested by AC, <qw’óeqwel’axhaxa>, //lq”=el=C=θ=l(=)θ=θtl/, 'Excuse me., Watch
out.,' attested by AC, <qw’óeqwel’axhaxa>, //lq”=el=C=θ=l(=)θ=θtl/, 'Excuse me., Watch
out you folks.,' attested by AC, <qw’óeqwel’elthox>, //lq”=el=C=θ=l(=)θ=θtl/, 'Excuse me.,
/Excuse us./, attested by RG & EH (4/10/99 Ling332), <qw’óeqwel’elthox>, //lq”=el=C=θ=l(=)θ=θtl/,
'Excuse us.,' phonology: downstepping, updrifting, attested by RG & EH (4/10/99 Ling332)
