## RETRACTION

**Alavi SH, Sinha A, Steward E, Milliken JC, Kheradvar A.** Load-dependent extracellular matrix organization in atrioventricular heart valves: differences and similarities. *Am J Physiol Heart Circ Physiol* 309: H276–H284, 2015.

An investigation by the University of California-Irvine concluded that research misconduct, in the form of fabrication of data that were included in the published article, was committed by one of the authors. The article is therefore being retracted by the American Physiological Society at the request of the institution and with the concurrence of all authors, except the first author.
