### **Program Notes**

The 21<sup>st</sup> Century is giving way to the most extraordinary technological advances from medicine to travel. Even our sports, like baseball and football, are following these new trends. For instance, hyperspeed cameras are being used for instant replay to better officiate games. New sports all together have been birthed from the all-mighty internet. I am speaking of course, of Drone Racing. A drone is a small, four-propellered flying machine. The newest racing units are reaching speeds upwards of 100mph! What started out as a YouTube video is now a multi-million-dollar industry and soon-to-be televised sport. In this piece, I am attempting to tap into the fast-paced and energetic curiosity as to where this sport could end up.

This piece was premiered on March 15<sup>th</sup>, 2017 in Stamps Auditorium at the University of Michigan, Ann Arbor, and was part of the *CoLab Concert Series* between student composers and the studios of cello, oboe, voice, and piano.

JP Wogaman II (b. 1994), is an American composer and performer for both the screen and stage. In August of 2018, he graduated from the University of Michigan School of Music, Theatre, and Dance with a Bachelor of Music in Trumpet Performance. Immediately following graduation, he returned to his hometown of McLean, VA and began working on multiple projects, notably including a commission from the Washington Ballet. He is continuing to provide his services for the Washington D.C. Metropolitan area's musical demands regarding visual media, concert engagements, theatre, and dance.

### Performance Notes

- All tremolos are to be played *sul ponticello* and very intensly. This is meant to sound like a small, furious engine.
- All glissandi are to be played as connected and intensly as possible. Imagine the drones buzzing around and suddenly dropping in altidude, swerving and looping, crossing each other in order to get a lead for the final lap!
- The beginning to measure 9 is the sound of the drones firing up their tiny little engines and floating around in their starting postitions.
- Measure 9 is meant to be the countdown to the beginning of the race.

for Cello Trio

Cello Score JP Wogaman II (2017)
