Haight-Ashbury

Haight-Ashbury was considered the epicenter of late sixties youth countercultures, specifically hippies, psychedelic rock musicians like the Grateful Dead, and the Flower Power anti-war movement against the Vietnam War. This solo project by Baruch documents the Haight-Ashbury neighborhood of San Francisco in 1967 during the Summer of Love. These photographs consists primarily of portraits of young people who embodied the anarchist/countercultural ideals for which the district became infamous. Also included are small photographs of the handpainted and handwritten signs related to the Summer of Love's drug culture, as well as the anti-war, anti-police brutality, and anti-capitalist movements--that hung throughout the area. These photographs were first exhibited in 1968 at the de Young Museum in San Francisco, California.

"San Francisco" (sign), from Haight-Ashbury. Photo by Ruth-Marion Baruch, 1967.

Designing the Colleges

A Bold Plan for Student Life

The First Colleges

Into the Redwoods

Building a Team, Creating a Vision

With the site selected, the Office of the President began planning for a dramatic new campus. In April 1961, **Jack Wagstaff**, at UC San Francisco at the time, was selected to be UCSC's first campus architect, and in July 1961 the Regents appointed Dean McHenry founding chancellor.

Working with University Architect Robert J. Evans, Wagstaff and McHenry gathered a team of talented northern California architects, advised at every stage by renowned landscape architect **Thomas Church**. Together they created the 1963 Long Range Development Plan (LRDP) that has shaped UC Santa Cruz ever since.

Dean McHenry, Clark Kerr, and Regent Donald

Hayden White: Frontiers of Consciousness at UCSC (Excerpt)

Transcript

Show/Hide Index

0:00 Cameron Vanderscoff: Today is Monday, July 16, 2012. My name is Cameron Vanderscoff and I'm here with Hayden White for his oral history for the UC Santa Cruz Library's Regional History Project. Let's start with--where were you raised? What influence did your family have on you in terms of how you developed your curiosity about learning and inquiry?

Hayden White: Well, I think we should make the biographical materials quite truncated. I was born just before the Great Depression hit in the South, in Tennessee, and my family made their way to Detroit in the early 1930s in search of work, and so I had a public school education. I can still remember I got my interest in history by the seventh grade. So, I didn't have any idea that I'd be doing academic work as a career, but I think it was my father's experience in the labor

Artists and their Books: Medieval and Modern Examples from Special Collections

During the 2015 winter quarter, students from the senior seminar on the "art of the medieval book" organized, prepared and installed both a physical and online exhibit. The class was held in McHenry Library's Special Collections and taught by Elisabeth Remak-Honnet. The items on exhibit, selected from Special Collections, provide a glimpse of what the students learned throughout the quarter: a survey of about a thousand years of the evolution of book production and use in Europe. Concentrating primarily on medieval illuminated manuscripts, the class looked at different types of books to examine not only how they were made, for whom they were made, how they were used and how and why they were decorated, but also how they have
