Correction to: Decision making with visualizations: a cognitive framework across disciplines

Lace M. Padilla1,2*, Sarah H. Creem-Regehr2, Mary Hegarty3 and Jeanine K. Stefanucci2

Correction
The original article (Padilla et al., 2018) contained a formatting error in Table 2; this has now been corrected with the appropriate boxes marked clearly.

Table 2 Overview of the four cross-domain findings along with the type of processing that they reflect

<table>
<thead>
<tr>
<th>Evidence for Type</th>
<th>Cross-domain finding</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Visualizations direct viewers’ bottom-up attention, which can both help and hinder decision making.</td>
</tr>
<tr>
<td>X</td>
<td>The visual encoding technique gives rise to visual-spatial biases.</td>
</tr>
<tr>
<td>X</td>
<td>Visualizations that have greater cognitive fit produce faster and more effective decisions.</td>
</tr>
<tr>
<td>The italicised words correspond to section titles</td>
<td>Knowledge-driven processes can interact with the effects of the encoding technique.</td>
</tr>
</tbody>
