Environ Health Perspect 127(12):126001, 2019. <https://doi.org/10.1289/EHP5133>

In this article, the statement “Over 40,000 chemicals are approved for commercial use,” found in the second sentence of the abstract, is incorrect. The statement has been corrected to “More than 40,000 chemicals are currently in commercial use in the United States.”

The authors regret the error.
